PREFACE

The rapidly increasing amount of commerce and social intercourse between this country and Japan has created a pressing demand for a really practical grammar for the acquisition of the Japanese language by English-speaking people. No apology therefore is needed for the appearance of the present work, which is designed to exhibit in as concise and scientific a form as possible the main features of Japanese accidence and syntax.

Usually, English people who take up the study of an Oriental language are not children, but those of mature years having a competent acquaintance with the mother-tongue, and it is from this point of view that the explanations contained herein have been framed.

Every Japanese phrase and sentence in the book is taken from some work by an author of eminence and 'published during the last decade, and authority (volume and page) can be adduced in every instance. This has been regarded as a point of special importance, inas-

much as it is a guarantee that the work exhibits the language to the student as it is really current in polite social intercourse at the present day.

My object during the compilation of the work has been to include everything of practical utility, and to discard everything superfluous. I have endeavoured to make the definitions clear and precise, that they may be easy of comprehension and readily retained. I have further endeavoured to arrange and distribute the matter, so as to embrace within narrow limits much more information than is generally embodied in a book of its pretensions, and I believe that there is not a useful Rule or Observation in the works of any recognised writer of eminence that is not found in this.

The native alphabet employed for writing the language has two different forms, one rendered intricate by the addition of numerous variations, known as the "Hiragana" form of character, and the other, the "Katakana" character, entirely devoid of variation, and therefore much simpler; but a movement has for some time been in active progress in favour of the adoption of the Roman alphabet according to the system employed in this work, where all the Japanese words are spelt in the native mode, by assigning to each of the native letters a corresponding equivalent from the English alphabet, and fixing accurately the sound of each. The acquisition of a knowledge of the Hiragana and Katakana characters is

therefore entirely unnecessary, and it is quite practicable to obtain a thoroughly intimate acquaintance with Japanese for colloquial purposes through the instrumentality of our own alphabet.

Owing to the peculiar structure and composition of the language, it is necessary to become acquainted with the functions and methods of use of all the parts of speech before an attempt can be made by the student to frame sentences of his own, hence the absence of the incidental exercises for translation found in the other grammars of the series. The publishers, however, have under consideration the issue of a small supplementary work as an Appendix to the present volume, comprising, amongst other useful features, a graduated series of Exercises and Examination Papers on the whole of the book, together with Reading Lessons consisting for the most part of excerpts from the works of modern native writers.

With this prefatory excursion I submit my work to the candid judgment of its students and of the friends of the Japanese language, trusting that it will be deemed worthy to range with the other publications of the *Hossfeld* series which has so long and so deservedly held a high position in public favour.

H. J. WEINTZ.

GRAMMAR

OF THE

JAPANESE SPOKEN LANGUAGE.

THE SYLLABARY.

In Japanese, an Alphabet, in the sense of the term understood by 'Western grammarians, does not exist. The various sounds of the language are represented in writing and printing by symbols or "ideographs," termed "syllabies." These are grouped together in what is known as "the Syllabary," which corresponds, in a measure, to the Alphabets of Europe.

The Syllabary is divided into *Vowel Syllabies* and *Consonant Syllabies*, the former consisting of pure vowel sounds, and the latter, with one exception, of consonantal sounds combined with the vowels, although each consonant syllabic is represented in the native character by a single sign.

The following scheme shows the Japanese Syllabary denoted in the Roman character, and arranged in the order adopted by most transliterators.

INTRODUCTION

THE SYLLABARY.

VOWEL SYLLABICS.

а	e	i	0	u

\$ CONSONANT SYLLABICS. ka ke ki ko ku ga gigrgogn shi sa se so suji 20 211 z_{ii} 20 ta te chi to tsu ji da dvdzudo ni na ne no nu ha he hi fu ho ba bchi bo bupapepi p_0 puma mi me mo mu уa i yе yo yu ra re ri ro ru i wa ye wo u

From an examination of the preceding table it will be observed that, when represented by the Roman Alphabet, the Japanese language employs the same letters as English, excepting l, q, r, and x.

It will also be noticed that certain irregularities and duplications occur; thus sh is substituted for s before i; t is replaced by ts before u; i does duty for both wi and yi; and so on. These peculiarities owe their appearance to the inability of the Japanese organs of speech to articulate the sounds replaced by the substitutions indicated; and as will be seen subsequently, many apparent anomalies of conjugation are due to them.

PRONUNCIATION.

1. The Vowels.

Except when the sign of long quantity is placed over them the vowels are invariably short.

a is pronounced approximately like at in and

٠	o in lucia	очисси аруа	oximatery	DIKC:	• • •	111	mill.
i	ł "	••	,,	,,	u	••	calm
•	,,	,,	;)	,,	•	٠,	pen.
(),,	**	**	,,	ry	٠,	preg.
i	. ,,	,,	٠,	,,	;	,,	cigar.
1	• ,,	**	,,	,,	i	••	police.
() ,,	**	,,	"	0	,,	shore.
Ċ	ó ,,	15	,,	,,	"	,,	gold.
1	1 ,,	**	,,	,,	"	,, ,	full.

Great care must be taken not to confuse the short and the long vowels in pronunciation, as there are many pairs

ū.,

., on ., tool.

of words spelt exactly alike, but which differ in the length of their yowels. Such are:—

sato, village.

kuki, the stem of a

plant

toru, to take.

sato, sagar.

kuki, the atmosphere.

toru, to pass through.

Under some circumstances i and u are sounded so lightly as to become almost inaudible. This occurs chiefly when they follow f, h, k, s, sh, or ts, as exemplified in the following:—

shita, hencath, is pronounced almost like shta. takusan, much, ,, ,, ,, taksan, tsuki, the moon, ,, ,, ,, tski.

In such cases these quiescent vowels are distinguished throughout this work by the diacritic sign of short quantity; thus, shita, takisan, tshki.

In diphthougs (ae, ai, ao, au, ci, oi, ui) each vervel must be distinctly sounded; thus au is not to be pronounced like au in cause, but very nearly like ov in cov; oi is much like oi in going, never as in boil, etc.

II. The Consonants.

Those not mentioned below are pronounced approximately as in English.

C occurs only in the combination ch, which is pronounced as in charm, couch—never as in chaos or machine.

F. This letter, which is used only in the syllabie fu, is pronounced by means of the lips alone, and not as in English, where the lower lip is brought into contact with the upper

teeth. Thus the pronunciation of fu is almost identical with that of the English word who strongly aspirated.

G at the beginning of a word is hard, like g in girl, good; in all other cases it has the sound of ug in singer.

M, which is the only letter that may terminate a syllable; has in this position the nasal sound of n in the French ton, enjant, i.e. somewhat like ng in our wing, thing. In other positions it is pronounced as in next, now.

R before a, v, o, or u is pronounced as in English, but never with the trill characteristic of the continental languages. In the syllabic ri, however, its exact sound has no counterpart in English, but the student can obtain a just conception of its pronunciation by placing the tip of the tongue at the same point in the roof of the mouth as in pronouncing our letter r, and then articulating the letter d.*

S has invariably the sound of s in sat, soon never as in rise or pleasure.

Y is always a consonant, and is pronounced as in *yacht*, *youth*—never as in *by* or *myth*.

When a consonant is repeated, it must be distinctly sounded twice, as many pairs of words are distinguished only by a doubled consonant: thus—

itai, painful. ittai, allogether. oto, a sound. otto, husband.

^{*} Students acquainted with Arabic or Hindustani will recognise this sound as being almost identical with the patatal d of those languages.

LETTER PERMUTATIONS: THE NIGORI.

It will be observed on referring to the Syllabary, that certain syllabics are given in italics. These all commence with a soft consonant, and in the native character they are written with symbols identical with those representing the syllabics beginning with hard consonants in the lines immediately preceding, the distinction between the two being indicated by a small mark termed the "nigori" placed by the side of the hard-consonant syllabic. Sa, for example, with the discritic sign is read :a; and so on.

Under certain circumstances, to be noted later, words commencing with hard consonants take the nigovi, i.e. their initial letters become softened; thus $sat\bar{o}$ when used as the second member of a compound becomes $zat\bar{o}$; func becomes bunc; and so on.

ARTICULATION AND ACCENT.

There is a great and striking distinction between Japanese and English as regards articulation—both in character and degree. Speaking generally, the Japanese pronunciation of both consonants and vowels is lighter and narrower than that of English. There is no tendency to diphthongise vowel-sounds, or to mouth and drawl them as is sometimes the case in some European languages. Japanese articulation is sharp, clear, and forcible; the lips are more vigorously employed, and the mouth is opened more freely.

Tonic and rhetorical accent are both very slight, that is to say, the various syllables of a word, and all the words of a sentence, are uttered with almost uniform stress of the voice, so that in English ears most Japanese words appear to have no accent, properly speaking.

Rule I. In words of two syllables the accent is on the first syllable, as ku'-mo, mu'-ri.

Exceptions.—When the first syllable contains $\check{\imath}$ or $\check{\imath}$, and when the second syllable contains a long vowel, the accent is on the second syllable; as $sh\check{\imath}-ki'$; $ts\check{n}-ka'$; $mu-s\check{n}'$; $su-t\check{o}'$.

Rule II. In words of three syllables the accent is on the second syllable; as Tsu-ga'-ru; O-sa'-ku.

Exception.—When the second syllable contains $\check{\imath}$ or $\check{\imath}$, the occent is on the first syllable unless the last syllable contains a long vowel, when, of course, the accent is placed on the last; as, $k\alpha'$ - $sh\check{\imath}$ -ra: α' - $ts\check{\imath}$ -ku.

RULE III. In words of more than three syllables the accent is on the last but one; as, a-sa-ma-da'-ki; Shi-mo-no-se'-ki.

Exception.—When the last syllable but one contains \tilde{i} or \tilde{n} , the accent is removed to the preceding syllable; as, a-ta-ra'-shi-ki; Yo-ko'-sh-ka.

It must be remembered, as a general rule, that long vowels always bear the accent, and where a word contains two such long vowels, the accent is laid equally upon them, similar to the Spondee in English prosody.

The student should carefully bear in mind the remarks made previously on diphthongs, and he must beware, for example, of taking for three syllables a word which really has four; thus in the words *Terauchi* and *Niigata*, each vowel must be pronounced separately; as, *Te-ra-u'-chi*, *Ni-i-ga'-ta*.

CLASSES OF WORDS; PARTS OF SPEECH.

In construction and methods of use Japanese differs materially from all European tongues. Language being, however, the vehicle for the communication of thought, and as all human thought is, in its essential characteristics, alike, Japanese must in common with all languages contain, under some guise or other, words denoting persons and things, and also words to indicate certain relations among those persons and things, as well as their qualities and actions.

Native grammarians do not, however, classify these words in the same manner as they are classified in Europe, that is as nouns,* pronouns, udverbs, conjunctions, etc. They divide them into (a) NA, or name-words proper—i.e. uninflected words which include the noun and pronoun; (b) Kotoba or Hataraki-kotoba, i.e. inflected words including the rerb and adjective; and (c) Teniwoha, i.e. particles, which are equivalent to our prepositions, conjunctions, and interjections.

As, however, no violence is done to the language by adopting the European classification, we have retained the familiar words *noun*, *pronoun*, etc., to facilitate the progress of the student.

^{*} There is no Article in Japanese; thus, hake signifies "box," "the box," and "a box," indifferently.

THE NOUN.

In Japanese the Noun is indeclinable, distinctions of gender and number being exhibited by the context, and case relations are indicated, as in English, by separate words or particles.

I. Number.

(a) Singular.—As a rule, no distinction is made between the singular and plural, but if it is necessary to specify only one thing of a certain kind the numeral for "one" ichi, hitotsu, or hito—is attached as a prefix or suffix; thus:—

ichi-nen, one year — a year. tsutsumi-hĭtotsu, one parcel — a parcel. hĭto-tsŭki, one month — a month.

(b) Placed.—When more than one thing is implied, certain particles are agglutinated to the word. These particles are ra, domo, shu (often pronounced shi), tachi and gata thus.—

Singular.

kuruma-ya, 'riksha-man. onna, woman. hyakŭsho, peasant. shikwan, official. Plural.

kuruma-ya-ra, 'riksha-men. onna-domo, women. hyakúshō-shu, peasants. shikwan-tachi. officers. yakunin-gata, officials.

The order in which the preceding particles and examples are shown is in a gradually increasing degree of politeness, tachi and gata being generally employed for polite speech, whilst among the others ra is familiar and least respectful (see "Honorities," p. 158).

Occasionally, the idea of plurality is conveyed by reduplication, but the forms thus produced serve to render the idea which English idiom expresses by the noun preceded by "every" rather than the ordinary plural; thus—

kuni, country. kuni-guni, every country, or various , countries.

iro, a sort, a kind. iro-iro, all kinds.

shina, object. shina-jina, all kinds of objects.

tokoro, place. tokora - dokoro, different places, many places, here and there.

hō, a side. hō-bō, everywhere.

As will be gathered from the foregoing examples, the reduplication almost invariably assumes the nigori when commencing with a letter susceptible thereof.

II. GENDER.

Conformably with the absence of number in the noun, Japanese usually ignores all considerations of gender: thus tori is either cock or hen; ushi, bull or cow; tima, horse or marc. If, however, it be absolutely indispensable to distinguish the sex of an animal, it can be effected by prefixing o or on, made, for the masculine, and me or men, female, for the feminine, the compound thus produced often undergoing a slight change of form for the sake of euphony; thus—

ushi = any bovine animal.
o-ushi, bull. me-ushi, cow.

tori = fowl, bird.

on-dori, cock. mendori, hen.

ŭma = any equine animal.
omma, horse, memma, mare.

The words osu, male; mesu, female; otoko, man; and onna, women, are also used for the same purpose; thus—

inu = any canine animal.

 $\begin{array}{ll} \text{inu no osu} \\ (or) \text{ osu no inu} \end{array} \right) a \ dog, \qquad \begin{array}{ll} \text{inu no mesu} \\ (or) \text{ mesu no inu} \end{array} \right) a \ bitch.$

ko = a child.

otoko no ko, man-child, i.e. a male-child, or bay. onia no ko, woman-child, i.e. a female-child, or girl.

Osu and mesu are used for (lower) animals only, whilst otoka and onna may be applied indifferently to persons and animals.

Difference in gender is indicated in a very few instances, principally the names of the degrees of relationship, by the use of separate words; as—

Masculine.

ojisan, grandfuther. chichi, futher. otottsan, papa. musüko, son, boy. oji, uncle. ani, elder brother. ototo, younger brother.

Feminine.

obasan, grandmother. haha, mother. okkasan, mamma. musume, daughter, girl. oba, aunt. ane, elder sister. imoto, younger sister.

III. CASE.

Although, strictly speaking, nouns have no cases in Japanese, equivalents for the European case-forms can be formulated for them by the use of certain particles as suffixes, as exemplified in the following table:—

Yama, a mountain.

Nominative,	yama, or yama ga,	mountain.
Vocative,	Yama! or yama yo!	O mountain!
Accusative,	Yama, or yama wo,	mount ai n.
Genitive,	Yama no, or yama ga,	of a mountain, or
		a mountain's.
Dative,	Yama ni, or yama ye,	to a mountain.
Ablative,	Yama kara, or yama tori,	from a mountain.

(For further illustrations of the uses and employment of these particles, reference should be made to the section on "Postpositions," p. 32).

IV. Compound Nouns.

The Japanese language is very rich in Compound Nouns which are produced for the most part in the following manner:—-

1. From two nouns; as—

gakumon, science, study:

hanazono, flower-garden;

kazaguruma, wimbwill;

tehukuro, glove;

from gaku, tearning,
and mon, a gale.

from hana, flower, and
sono, garden.

from kaze, wind, and
kuruma, wheel.

from te, hand, and
fukuro, bug.

2. From a noun preceded or followed by the stem of an adjective (see p. 120); as—

to-megame, helescope; from toi, far, and megame, spectacles.

yasu-mono, cheaparticle; from yasui, cheap, and mono, thing.

3. From a noun preceded or followed by the stem of a verb; as—

nusubito, thief: from nusumu, to steal, and hito, person.

kaimono, a purchase; from kau, to buy, and mono,

thing.

te-nugui, torrel; from te, hand, and nuguu,

to wipe.

hito-goroshi, murderer; from hito, person, and

korosu, to kill.

4. From two verbal forms; as---

haki-dame, dust-heap; from haku, to sweep, and tameru, to collect.

kigaye, change of dress; from kiru, to wear, and kayeru, to change.

hiki-dashi, drawer; from hiku, to pull, and dasu, to take out.

As will be seen in the preceding examples, the first letter of the second component in compounds usually takes the nigori, thus hanazono has zono for sono; hito-goroshi has goroshi for koroshi, and so on.

In some instances, the final vowel of the first member in a compound is modified, the substitution of a for c being the change of most frequent recurrence; as—

saka-ya, grog-shop; from sake, beer, and ya, a house.

kaza-deppō, air-gun; from kaze, mind, and teppō, gun.

V. Classes of Nouns.

1. Abstract Nouns.

These are frequently derived from adjective stems by adding thereto the syllable sa; as--

samusa, cold, the degree of coldness; from samui, cold. takasa, height; from takai, high. shirosa, whiteness; from shiroi, white.

Equivalents for abstract nouns are also produced by adding to an adjective or verb the word **koto**, *fact*, *act*, (abstract) thing; as--

shiroi koto, whiteness, the fact that something is white, fukai koto, deep-fact = depth, machigata koto, a mistake, dekinai koto, "cannot-fact," i.e. impossibility.

These locations are frequently heard with an ejaculatory signification; thus --

Takai koto! What a height!
Atsui koto! How hot it is!

2. Concrete Nouns.

These may be formed in a similar manner to abstract nouns, by adding to an adjective the word mono, thing; as:

shiroi mono, a white thing, an object which is white, ao mono (aoi, green), green things = regetables, nui mono, embroidery; from muu, to sew.

It must be noted that mono nearly always signifies a tangible, material object, whilst koto means "a thing of the mind," "an act or fact."

3. Augmentative and Diminutive Nouns.

(a) Augmentatives.

These are formed by prefixing ō, the root of okii, large, to nouns; thus---

nezumi, rat. ô-nezumi, large rat.

fune, boat. ō-bune, ship.

tera, temple.. ô-dera, large temple. shima, island. ô-shima, large island.

(b.) Diminutives.

To produce these, the word **ko**, *child*, *little*, is employed, prefixed to nouns; thus—

inu, dog. ko-inu, child-dog, little dog, i.e.

рирру.

ishi, a stone. ko-ishi, a pebble.

tera, temple. ko-dera, small temple. shima, island. ko-jima, small island.

As exemplified in the preceding instances, the words to which \bar{o}_{\bullet} and ko are prefixed often assume the nigori.

N.B.—Care must be taken to distinguish o large, from o, honourable (see p. 155).

VI. Notes on Various Nouns.

The word, hazu, obligation, necessity, is often employed to render the idea expressed by the English verbs "ought" and "should"; thus—

Mô kuru hazu da*

already comes necessity is

Sakujitsu sono kane wo
yesterday that money
uketoru hazu deshita.
obligation was.

He should be here by
now.

I ought to have been
paid that money
yesterday.

^{*} For the arrangement of words in the sentence, see "Syntax," p. 167.

Aida, interval, is sometimes used to correspond to our "while" or "whilst": thus—

```
Watakŭshi wa Tokyo ni
me as:for Tokio in
oru aida.
dweli whilst

Sö suru aida,
so do while.

Whilst I was in
Tokio.
Whilst we were doing
```

The word toki, time, is frequently employed to translate "when"; thus—

```
Watakushi to omaye wa

I and you

kuni kara kita toki from our province.

province from, came time

Meshi kuu toki.

rice eat time.

When you and I came
from our province.

When eating rice
= when dining.
```

The locution toki ni is sometimes heard at the beginning of a phrase, with the signification "by-the-bye."

THE PRONOUN.

1. PERSONAL PRONOUNS.

The Japanese substitutes for the Personal Pronouns of Western languages are merely nouns which by process of time have become pronominal, and their discussion as separate parts of speech is merely to suit the convenience of the foreign student. They are arranged in several classes expressing the various grades of respect or politeness peculiar to the colloquial idiom, and are somewhat similar to the English expressions "your obedient servant," "your

lordship," etc., or to the Spanish "vuestra merced" (your honour).

(a) Singular.

1st Person.

The ordinary word for "1" is watakushi (literally, "selfishness"). The lower classes generally use the contraction watashi or washi.

Boku (*lit.* "servant") is much used for the first person by soldiers, students, and young men in general, when addressing each other familiarly.

Temae (or temaye) is a very humble and therefore respectful equivalent for I, and is in frequent use amongst the lower classes to address their superiors. It possesses the peculiarity of being also employed as a rude equivalent for the pronoun of the second person.

Ora, a contraction of *ore wa* is the word for "1" generally used by **?**colies to each other.

Other equivalents for "I" are sessha; oira (used familiarly); wattchi (used by peasants); shosei, and ore which is a vulgar corruption of ware, the ordinary word for "I" in the classical language.

2nd Person.

Anata, a contraction of ano kata, that side, was formerly a pronoun used only for the third person, but it has come to be employed for the second, like the Spanish "Usted" and the German "Sie." Anata is used when addressing equals or superiors, and with the addition of sama (= Mr, Mrs, Miss), it expresses the highest degree of respect.

Omae was originally respectful, but it is now familiar and condescending, and is used to address inferiors, children, and one's own servants.

Omae san (san is short for sama) is nearly the same as anata, but more familiar, and it is heard usually from the mouths of women.

Kisama and **temae** are employed in addressing inferiors familiarly.

Sensei is used in speaking to learned persons.

Students, soldiers, and young men in general use **kimi** when addressing each other in a familiar way.

Danna, danna san, and danna sama are the expressions used by servants to their masters.

Other equivalents for the second personal pronoun are sochi (to inferiors); konata; sonata (familiar); sokka (formal); nushi (contemptuous); ware (by peasants); and unu (abusive).

Of these numerous equivalents for the second person, anata and omae will usually be found to suffice for the needs of ordinary conversation between Europeans and natives.

3rd Person.

Are is often used for "he" or "she," but is frequently replaced by the more polite forms ano hito, ano o kata, ano otoko ("that man"), and ano onna ("that woman").

Mukō, literally "the opposite side," is used indiscriminately for "he," "she," or "they."

(b) Plural.

The so-called pronouns just discussed may assume the

plural suffixes given on page 9, the forms most commonly employed being as follow:--

1st Person.

wataküshi domo. sessha domo. boku ra. sessha ra

oira, for ore-ra (vulgar).

2nd Person

"You."

anata gata. omae (san) gata. sensei gata. omae (san) tachi. danna shu. kimi tachi.

danna shu. Kimi tachi. danna gata. Kisama tachi.

temae tachi-ra.

3rd Person.

"They."

ano hito tachi. ano o kata gata. are ra (rude).

- Note, -1. Wataküshi domo is frequently used for the singular, and is slightly humbler than wataküshi.
 - 2. The Japanese never use the equivalents for "we" as in English to signify "you and L." They only employ them to mean "other persons and L." To render "we" meaning "you and I," the location and a to watakāski to may be used, but usually the idea is rendered more idiomatically by means of "Honorifics" (see p. 154).

The so-called personal pronouns may be followed by the particles (postpositions) exactly as with other nouns, and in this manner the cases may be formed. Thus, exactly as we say—

Ano hito to kenkwa that man with, quarrel
$$\{ baseline Man \ baseline Me \ baseline Me$$

so we may say----

Watakŭshi to kenkwa | He had a quarrel with we shita.

In like manner the possessive pronouns are formed simply by the addition of the possessive particle **no** or **ga**, and exactly as we say —

Ano hito no oya that man of, purent \int The parent of that man.

so we may say---

Watakushi no oya, The parent of me - my parent.

Mine, yours, his, hers, theirs, are also translated by watakushi no, anata no, etc., but they may easily be distinguished from my, your, etc., by the particles used with them, or by the context.

From the preceding observations it will be gathered that there is no special declension for pronouns, nor any separate class of possessive pronouns.

Examples of Personal Pronouns.

$$\left. egin{array}{ll} ext{Watakushi mo mairimasu,} \ I & will go too. \end{array}
ight.
ight.$$

Kimi wa doko ye iku ka?	st $\Big\}$ Where are you off to?
Boku wa shibai ye I theatre to, kacru tokoro da, return place am	Lam returning to the theatre.
Anata ni o hanashi you (hon.) tutk möshitai koto ga wish-to thing gozaimasti, there-is	There is something I wish to tell you.
Unu uso wo tsuku ze, you lie stick!	You are telling a lie.
Ano hĭto wa daiku carpenter de gozaimasŭ, is	$\left. iggreen He \ is \ a \ carpenter. ight.$
Watakŭshi ni kwankei me to, connection ga nai, (nom.) is-not	It has nothing to do with me.
Ano hito no ta wa rice-field yohodo tōi, cery-much is-fier	His rice-field is a long way off.
Omae no kiukin wa . wages ikura? how-much	How much are your wages!

^{*} See remarks on "ka," pp. 38 and 174,

The student must note that the use of personal pronouns is much less frequent in Japanese than in English. Except in cases of special emphasis, or where their omission would occasion ambiguity, they are unemployed. Thus, "I am going to Hiogo to-morrow," will be translated Miōnichi Hiogo ye mairimusŭ unless it be doubtful to whom, the speaker refers, in which case watakŭshi will be added. If there be an emphasis on the pronoun, as in the sentence, "I shall go to Hiogo, but you may please yourself," the pronouns will also then be inserted.

The constant repetition of watakishi and anata is one of the commonest errors into which Europeans fall, and a Japanese will often carry on quite a long conversation without employing a single pronoun.

II. Reflective Pronouns.

Jibun or Jishin, self (usually followed by de), is the Reflective Pronoun in most frequent use; thus--

The above are used only when it is desired to emphasize the idea of "self."

"Self" may also be expressed by **onore**, which is sometimes heard as an insulting equivalent for "you."

Waga, whose real meaning is "my," is frequently used with the signification "one's own," "my own," "our own"; thus—

waga ko, one's own child.
waga kuni, my country, one's country (der vaterland, la patrie).
waga kiōdai, one's own brothers and sisters.

Waga hai, we, is also in use, but is confined chiefly to the public platform.

* Each other," "one another," are generally rendered by the adverb tagai ni, whose literal meaning is "mutually"; thus--

Tagai ni tasŭkeru, they-help \ They help one another.

Tagai ni mite ofimashite, \ They leoked at each other.

III. Demonstrative Pronouns.

(Substantive) Kore,
$$\uparrow$$
 This. | (Substantive) Sore, \uparrow That. (Adjective) Sono, \uparrow (near). (Substantive) Are, \uparrow That. (Adjective) Ano, \uparrow (remote).

The Japanese, like the Latin and Spanish, distinguishes a near "that" (sore; Latin, iste; Spanish, ese) from a remote "that" (are; Latin, ille; Spanish, aquel), the former being used when the object is near or in the possession of the person spoken to, whilst the latter is used when the object is distant, not in the possession of the person spoken to, or has relation to the person spoken of.

It must be noted, too, that Japanese, like French, distinguishes substantive forms of these pronouns from pronominal adjective forms; thus **kore** corresponds to the French *celui-ci*, *celle-ci*, and stands alone, whilst **kono** corresponds to *ce*, *celle*, and is joined to nouns.

Examples.

Kore wa ikura desŭ ka, this as-for hor-much is (it)

Kore wa teppo de gozaimasu, this is a gun.

Kono nedan, This price.

Kono michi, This road.

Sore wa, nau desŭ? What is that (near you, etc.)?

Sono hako, That hox (in your hand, etc.).

Are wa, dare no uchi desŭ? Whose is that house that as-for, who of house is (it) (yonder)?

Ano takai yama, That high mountain (yonder).

Remarks.

- 1. Are and ano are sometimes replaced by kare and kano respectively, but the latter forms belong more to the classical language, and are heard only from the lips of cultured speakers. Kano sometimes occurs with the meaning "a certain."
- 2. Sore and sono are used in reference to the immediate object of conversation; are and ano are used when a new subject is proposed. Sono boshi, for example, signifies that hat, i.e. the hat you are wearing, or, of which we are speaking; ano boshi, the hat you were yesterday, etc.

- 3. **Ano** is frequently heard at the beginning of a sentence, serving merely to draw attention similarly to our "I say, Mr ——."
- 4. The pronominal adjectives this and that are often rendered by tō before words derived from the Chinese. Tō signifies "the one in question," "the actual one," as tō-nin, this (or that) person, the person in question.

The demonstratives in the following list are derived from the same roots as those just discussed.

N.B.—The remarks on the words in the first list apply equally to the corresponding words in this, and need not be repeated.

Examples.

6

Konna nedan,
Kō iu rōsoku,
Sonna koto,
Sō iu koto,

This kind of price.
This sort of candle.

That kind of thing.

Anna htto ni korarecha, that-sort-of person by, gettling-come, meiwaku shimasŭ, tranble docs

A in hanashi wa mettani swch-us-that story seldom kikimasenŭ, (one) hears One is perplexed when such people come to one's house.

One seldom hears a story of that sort.

The words in the succeeding list are adverbs from the

same roots as the pronouns just dealt with, and they may be advantageously discussed at this stage.

	Ko,	Thus, like this,	, <i>ŝo.</i>
	Koko, \	Here, hither.	
	Kochi(ra),	Here, maner.	
	Kōya,	This manner.	
	Konnani,	In this kind of	ray.
	Kokoera,	Hereabouts.	v
	Near.	R	Pemote.
Sō,	Like that, in that way, so.	A,	Like that, in that way, so.
Soko, Sochi(ra),	} There.	Asŭko, Achi(ra),	There.
Sayō, .	That manner.	İ	
Sonnani,	In that kind of way.	Annani,	In that kind of way.
Sokoera,	The reabouts.	Asŭkoera,	Thereabouts.

Examples.

```
Koko ye oite oite kudasai, 1
                                    Please put it here.
here to, putting condescend
Achira ye mate,)
                      Wait there.
there in wait
Asūko kara saki wa jiki
there, from, front as-for immediately
desŭ,
io

It is no distance
from there to the
next place.
Só moshimashĭtareba, mina )
                                  They all became angry
so, when-I-said,
                          all
     okorimashita.
     became-angry
                             Ah! that is how it was.
A! sayō deshĭtakke,
ah thus it-was
```

Shō shō sokoera de matte ore, a-little thereabouts waiting remain a little.

Somani yasuku wa uranakatta, I did not sell so cheap (I) did-not-sell cheaply as that.

Kochira ye o tōri nasai, to to-pass condescend Please come in here.

IV. Interrogative Pronouns.

Dare, Donata (polite),
$$Who? = (Subst.)$$
 Dore, $(Adj.)$ Dono, $Which?$ (Subst.) Nani, $What?$

Examples.

Dare ga so itta, $\frac{1}{thos\ said}$ Who said so !

Donata desň, $\{is\ (it)\}$ Who is it?

Dore ii shimasho, Which shall I take!

Dono fune, Which ship!

Nani shi ni kita, do to have-come } What have you come to do!

Dare no hako, who of box ?

Dare ni kane wo yatta, To whom did he give the to money (acc.) gave I money?

Remarks.

- 1. Donata (for dono kata, which side), is employed as a polite substitute for dare. A still more respectful phrase is donata sama.
 - 2. Nani, what? is applied to inanimate objects only.

There is no adjectival form, nani no, nanno, or dono being used instead; as-

Namo go yō desŭ ka,
$$what$$
 (hon.) business is ? What is your business?

The Interrogatives in the following list are derived from the same roots as those last discussed.

Dokoera, Whereubouts?

Examples.

Do shiyo, how shall do?

Dō in wake de, konna what-like reason by, such baka na koto wo suru, foolish things! foolish things do

Doko de sono tokei wo o where that watch Where did you buy that kai nasatta, watch!

Donnani ureshi ka what-way jouful ? You don't know how pleased shivemasenú, I am.

V. Indefinite Pronouns.

The Indefinite Pronouns are formed from the Interrogative Pronouns by addition of the particles ka, mo, de mo, and 20: thus -

Somebody (or other). Dare ka, Anybody, everybody. Dare mo. Dare de mo, Anybody, everybody, any one whatever.

Dore ka, Some one thing, one or other.

Any one thing, nothing. Dore mo.

Dore de mo, Anything whatever, either one, any one (thing).

Anything, nothing, something (or other). Nani ka,

Nani mo, Anything, nothing.

Nan de mo, Anything, Everything.

\ Something, anything, any, something or \ ather. Nanzo, Nani zo.

Examples.

Dare ka sõ itta, so said Somebody said so.

Dare de mo shitte imasu, Ercrybody knows it.

Dare de mo yoroshu gozaimasŭ,

is

Anybody will do.

Dore ka hitotsu chōdai, Please give me one or the

ikemasen ka, Will not one of these suit you! any-one-thing will-go

Daiku ni nani ka o carpenter to, something yari nasare, give do

Nani mo gozaimasenŭ, There is nothing whatever.

Nani de mo shitte iru, He knows everything.

Nan de mo yoroshii, Anything will do.

Nanzo omoshiroi hanashi amusing story ga gozaimasen ka, is-not ?

Can you not tell us something amusing.

Remarks.

1. The polite forms for dare are donata ka, donata mo, and donata de mo; thus---

2. Dare mo, dore mo, and nani mo are generally used with negative verbs, and are equivalent to the English "nobody" and "nothing."

Indefinite adverbs may be formed from the interrogative adverbs in like manner to the indefinite pronouns; thus—

Dōka, Somehow (or other).

Dōmō, Really, somehow.

Dō de mo, Anyhow.

Doko ka, dokko, Somewhere (or other).

Doko mo, Everywhere.

Doko de mo, Anywhere.

Dochi(ra) ka,
,, mo,
,, de mo,
for dore ka, dore mo, and dore de mo when two only are spoken of.

Examples.

Doka nasaimashita ka,

Sore wa, dochira de mo
yoroshii,

Doko ka de mita yo
somewhere seen manner

I believe I have seen him

ni omoimasŭ, think

a

Doko ni mo gozaimasen, There are none to be had anywhere.

VI. RELATIVE PRONOUNS.

In the Japanese language there are no Relative Pronouns, and to express reference or relation to another noun or pronoun in the sentence the verb is prefixed to the noun attributively exactly as an adjective might be. Thus, just as we say "a good boy," so also we may say "a runs boy," i.e. "a boy who runs"; "a plays boy," i.e. "a boys who plays," as exemplified in the following phrases:—

Nigeta hito, ran-away person }

Kuru hito, ran-away person }

The person who ran away.

The man who comes.

Kita hito, ran-away.

The man who comes.

The man who came.

Sakujitsu katta hako, ran-away.

The box I bought yesterday.

Shiranu hito, A man whom I do not know.

Tsunekichi to in hito, The man called Tsunekichi.

that-called

Note.—The appearance of ambiguity caused by the use of the active where we should expect the passive, as seen in the last phrase but one, is in most *cases dispelled by the context. Thus *sākajitsa katto hako cannot be construed as "the box which bought (something) yesterday," but only "the box which I bought yesterday."

Remarks.

The words tokoro no (literally, "of place"), are not in frequently heard from the mouths of learned people, with the force of the relative pronouns who, which, and that; thus...

Kuru tokoro no hito

(for) Kuru hito,

Koroshita tokoro no
akindo,
(for) Koroshita akindo,
killed merchant

Korosareta tokoro
no akindo,
(for) Korosareta akindo,

The merchant who killed.

The merchant who was killed.

POSTPOSITIONS.

In Japanese that relationship of words which, in English, is expressed by *Pre*positions, is indicated by what are termed by Western grammarians "*Post*positions" from the fact of their being placed after the words with which they are directly connected. These postpositions, in

addition to fulfilling the prepositional office, are also used as conjunctions, and they serve also, as we have seen, to express those relations of words which Latin, German, and other European languages indicate by the use of case-inflections.

The following scheme shows all postpositions in common use, together with their most usual significations, and to facilitate reference they are arranged alphabetically.

Dano.

Dano is a combination of the verb da, is, and the postposition no. It is employed in enumerating a number of objects when it is desired to particularise each one as fully as possible. It is generally translated "and," and must be repeated after each of the things enumerated; thus—

Daiku dano, kajiya dano, carpenters blacksmiths yaneya dano, tiles

The student should note carefully the distinction existing between dano and ni (see p. 41) used in enumerations, for whilst the latter is employed simply to join together the names of a definite number of objects, dano expresses the idea of a group or series of things similar to those enumerated. Thus daiku ni, kajiya ni, yaneya ni signifies "carpenters, blacksmiths and tilers," and no more than these three classes of workmen, but daiku dano, kajiya dano, yaneya dano means "carpenters, blacksmiths, tilers and the like," and may thus include other workmen also.

The word dano is considered to be somewhat impolite, and cultured speakers usually substitute its more courteous equivalent de gozaimasu no.

De.

The primary use of this postposition is to convey the meanings expressed by the English "by," "with," "at," "in," "on account of"; as---

Wakaranai de komaru, \ I am troubled on account not-understanding am-troubled of his not understanding.

A second use of **de** is puzzling to the student as it seems to have no meaning and to be superfluous in the sentence. It is then a corruption of **nite**, the gerund of an obsolete verb. Its real signification in these cases is "being"; thus....

```
Ima no bettő wa, dajaku
now of, groom torg;
de yaku ni tatanai,
bring usefulness stands-not

Watakŭshi wa isha de
me doctor being
gozaimasŭ,
om

The groom I have now is
useless, (as) he is so lazy.

I am the doctor.
```

The last sentence exemplifies the most common mode of expressing the English verb "to be," that is, by means of

de aru, de arimasă, de gozaimasă. With these various verbs for "to be," de forms a group of contractions, thus de aru is usually contracted to da; de arimasă and de gozaimasă to desă; de arimashita to deshita; de atta to datta, etc. (see pp. 78, 92, 106, and 164); thus the last sentence above would commonly be rendered Watakăshi wa isha desă.

In some cases the postposition wa is added to de, usually in expressions indicative of displeasure, and in interrogative and negative sentences. De wa is generally contracted into ja in conversation; thus—

I ja nai ka, Is it not good! Are you not satisfied?

A substantive with **de** affixed frequently renders an English nominative, when the substantive verb is accompanied by a qualifying word or expression after de; thus—

Kore bakari de taranŭ this alone not-enough d'arō, will-be d'aro, will-be d'aroshiŭ)

This will not be enough alone (i.e. something else will be required in addition).

Hĭtotsu de yoroshiu

one good
gozaimasŭ,
is

J addition).

One will be sufficient.

De is often combined with mo, even, also, and de mo is frequently thus employed in a manner not needing translation into English, although retaining the significa-

tion of "even" in the Japanese sentence, as the following examples show:—

(For de mo with Interrogative Pronouns, see p. 29.)

Ga.

This particle was originally a genitive sign, and it still possesses the sense expressed by our "of" in the names of certain places and in a few locations, as: Koma-ga-take, Colt's Peak (a mountain); Hoshi-ga-oka, The Mound of the Stars (a part of Kamukura); ga sŭki, liking, fond of; ga kirei, not liking, not fond of; ga hoshii, desirous of.

Ga is now, however, employed as the generic nominative sign, though the nominative case is not necessarily associated with ga, as, for instance, when a noun is followed by wa or mo.

Examples.

```
Ame ga futte kimashita, rain falling has-come

Fuyu ga kimashita, winter has-come

Kane ga nai, money is-not

Kane ga aru ka, s
```

Ga frequently follows a substantive in cases where the accusative is naturally expected; thus—

Kono imi ga wakarimasenŭ, I do not understand meaning is-unintelligible this.

In the above sentences "tabako" and "imi" are regarded by native grammarians as the subjects of the sentences.

When situated at the end of a clause ga may usually be rendered by "but" or "yet," and this force is frequently conveyed merely by a pause; as—

Konnichi o taku ye agaru to-day house to go-up no desű ga, ashi ga is leg itamimashĭte, being-painful

I would go to your house to-day, but my leg is painful (therefore I cannot go).

Tori-naosō to omou ga, take-will-mend think tori-naosenai, take-cannot-mend I wish to mend it, but I cannot.

Kochira de zonjite oreba here in knowing if-be moshi-agemasu ga, say-will-lift-up but I would tell you if I
knew, but (I do not
know).

Tokoro ga, or daga, at the commencement of a sentence, signifies "well then—"; "in this case, then—"; "upon this——"; thus—

Tokoro ga, sono ban ni that night on } Well, then, on that night—.

Ka.

Ka serves to ask a question or to express a doubt, and in the English translation of a Japanese sentence where it is used in this connection, it may be replaced by a note of interrogation; thus—

Arimasŭ, There is. Arimasŭ ka, Is there! Kita ka, Has he come!

When the sentence includes some other interrogative word, ka is generally omitted, as, for instance, in the following—

Dare $\left(\frac{\text{des i}}{w \text{ho}}\right)$ Who is it? Itsu shinimashĭta, W When did he dic?

Between two substantives ka corresponds to the English "or," and when repeated in the sentence it has the force of the correlatives "whether—or," "either—or"; as—

Kore wa atarashii ka

this new
furui ka,
old

Otoko ka onna ka,
man woman

Tama ka ya ni,
bullet arrow
atatte shinimashĭta,
striking he-died

Whether is this new
or old?

Whether is it a male
or a female?

He was killed either by a
bullet or by an arrow.

(For ka with Interrogative Pronouns and Adverbs, see p. 29.)

Kara.

Used with nouns kara means "from" and "since," but with verbs it bears the significations "because," "after," "for" (when meaning "because"); thus—

Shinagawa kara Tōkyō made, Shinagawa to	} From Shinagawa to Tokio.
Sakujitsu kara, Rusu datta kara, shiranai, absent was not-know.	Since yesterday, Y I do not know because I was absent.
Asa-han wo tabete kara, breaktast having-caten de nakŭcha ikimasenŭ, if-not do-not-go	I shall not go until after breakfast.
Kutabiremashĭta kara, choto, hare-broome-tired a-little yasuminashō, will-probably-rest	Let us rest a little for Lam tired.

Made.

This postposition may be employed to render the ideas conveyed by such English words and locutions as "to," "up to," "as far as," "till," "until," etc., as exemplified in the following:—

Hiogo made aruite ikimasu, I shall walk as far as

Hiogo.

Yokohama made donogurai,
what-amount
aru,
is

Sakuban osoku made,
last night—late
kayerananda,
not-returned

Komban made machimasu,
to-night—will-wait—late hall walk walk-wait

I will wait until
to-night,

Watakŭshi no kuru made
me of, to-come
matte ite kudasai,
waiting being deign

Please wait till my
coming, i.e. till I come.

Mo.

When used alone, mo signifies "also," "too," "even"; thus—

Kono hako mo o kai
box buy
nasare,
do

Ore mo ikô,
I will-yo

Aru keredo mo omaye
are although even you
ni wa yaranai,
to give-not

Buy this box also.

I will go too.

I have some, but I shall
not give you any.

When repeated, in an affirmative sentence, "mo—mo" renders the English "both—and"; as—

Inu mo neko mo õi

dogs cats numerous

tokoro desŭ,

place is

It is a place where there are

both cats and dogs.

In a negative sentence, "mo-mo" means "neither-nor"; as-

Yoku mo, waruku mo good bad It is neither good nor nai, bad.

N.B — Mo must not be confounded with the adverb $m\bar{a}$ (see p. 145),

Ni.

The primary meaning of this particle is "to, in, into"; as-

Kioto ni orimasu, He lives in Kioto.

Tera ni hairimashita, temple has-gone He has gone into the temple.
Tökyö ni mairimasu, I go to Tokio.

Ni means "and" in enumerating several objects; thus—

Mikan ni budō, oranges and grapes.

With passive verbs **ni** means "by," and when preceding a causative verb (see p. 109), it denotes the person who is caused to perform the action; as ---

Neko wa inu ni kamereta, and the cat was bitten by the dog.

Ame ni furi-komeraremashita, and the were kept in by rain (we)-were-kept-in the rain.

Inu ni ye wo kuwasero, and the dog its food.

Hito ni sagasasemashō, and by will-make-seek the man to seek it.

When suffixed to the indefinite forms of verbs (see p. 80) ni means "to," "in order to"; thus—

Hana wo mi ni ikimasu, flowers see (1)-go } I go to see the flowers.

Kimono wo arai ni yatta, He sent the clothes to be clothes wash sent washed,

Ni is often suffixed to nouns to form adverbs; thus-

baka,	a fool.	baka ni,	foolishly.
dai-ichi,	number one.	dai ichi ni,	firstly.
daiji,	care.	daiji ni,	carefully.
heta,	one unskilled.	heta ni,	unskil/ully.
ima,	the present time.	ima ni,	presently!
jōzu,	one who is skilled.	jōzu ni,	skilfully.
makoto,	truth.	makoto ni,	truly, really.
rippa,	magnificence.	rippa ni,	magnificently.
shinsetsu,	kindness.	shinsetsu ni,	kindly.
tashĭka,	certainty.	tashika ni,	certainly.
ue,	the top.	ue ni,	above, on.

Care should be taken to distinguish between the uses of de and ni, both of which may sometimes be rendered by "in." De is employed to indicate the place where an action is performed, whilst ni denotes the place where something exists. Compare the two examples following:—

No.

No, of, is the ordinary genitive sign, and after a noun it usually indicates possession; thus-

```
Inu no tsume, dog of, claws

Hako no kagi, box of, key

A dog's claws.

The key of the box.
```

```
Kin no kahei,
gold of, coins

Amerika no Daitoryo,
of, President

Omaye no kimono,
you of, clothes

Hari no ana,
needle of, hole

Gold coins.

The President of America.

The eye of the needle.
```

No is also employed to join two nouns in apposition; thus—

```
Bettő no Kurokawa,

ýroom Kurokawa

Yamato no kuni,
Y. province

Dokushin no watakůshi,
bachelor

Bettő no Kurokawa

The groom K.

The province of Y.

I (who am) a bachelor.
```

At times, no is employed attributively after adjectives, with the force of the English "one" or "ones," as shown in the following sentences:—

```
Motto yasui no ni shiyō, f will take a cheaper more cheap one to will-do f one.

Kore wa ii no da, this good one is f This is a good one.
```

Kore! nibui no bakari aru; these blunt ones only are togatta no ga arimasenŭ ka, sharp ones are-not !

Kō iu no mo hayarimasă, this-sort ones also arc-fashionable kara, goran nasai, as glance deign These are only blunt ones; are there no sharp ones?

These also are fashionable so kindly look at them. When a cardinal numeral precedes a noun qualified by it, the postposition no is generally suffixed to the numeral, thus—

$$\left. \begin{array}{ll} \text{Mitsu no hako,} \\ \textit{three} & \textit{boxes} \end{array} \right\} \ \textit{Three boxes.}$$

instead of-

Hako mitsu.

ŧ.

instead of-

Tsutsumi hĭtotsu.

A very favourite idiom is the employment of **no** as an equivalent for **koto**, *act*, *fact*. Most frequently this construction is used in conjunction with the verb **da** or **desu**, and is generally translated by "it is that," or "is it that?"

Examples.

In sentences like the preceding, the o of the word no is usually elided in conversation, so that the phrases become Nani wo suru n'desă and Konai n'darō. If, however, no is placed at the end of the clause, the o cannot be omitted, as for example in—

Aru no ?
$$\{s, fact\}$$
 Is there ? (Is it a fact that there is ?)

This postposition often serves as the copulative "and" with verbs in the Indicative Mood. Care must be taken not to confound it with the Indefinite Form of the verb suru, to do (see p. 73).

Examples.

Sawashi hi mo aru shi; busy day hima na hi mo aru, interval

•Takai shina mo aru shi,) expensive articles yasui no mo aru, chean

I have busy days and restand ing days (hima, rest leisure, interval).

| shi, and | There are expensive articles

and also cheap ones.

Aono tera wa yama mo

temple mountain

mieru shi, kawa mo mieru shi,

is-seen river also

One van see the

mountain from

this temple, and
the river also is
to be seen. Kono tera wa yama mo • is-seen river also

Used with nouns, to may be taken as an equivalent for the copulative "and." It is usually repeated after each noun, but even when not so repeated it invariably belongs to the word immediately before it and not to the one following; thus—

Budō to mizu to wo motte wine water bring Bring wine and water.
o ide,
Ano htto to ikimashtta,
that man and (I) went

Another the state of the stat Anata to, watakushi to, You and I.

Other idiomatic uses of to may be classed under this head; as-

Kono betto to issho ni ike, } (to with this groom. Kore to wa chigaimasŭ, this and as-for differs } It is different from this. Akindo to kenkwa wo shita, \ He and a merchant merchant and quarrel (he) did I had a quarrel.

To has also at times the sense of the conjunction "that," and it is used as the sign of quotation or of indirect statement; thus—

```
Uso da to omoimasă, lethink that it is a lie (literally, lie is, that (l) think a lie," that I think).

Hönto da to iimasu, truth is, that (he) says are lethink is, that (he) says are lethink is, that (he) says are lethink is truth," that he says).

Koko de awō to wa here will-meet omowananda, did-not-expect are lethink is a lie," that I think).

I did not expect to see you here (literally, "will - meet you here," this I did not expect).
```

In phrases like the two first above, "that" is often omitted in English, but to cannot be so dispensed with in the Japanese sentence. Thus we may say in English "I say it is a lie," or "I say that it is a lie"; "he says it is true," or "he says that it is true."

The following examples illustrate an important idiomatic use of to with the literal meaning "that," but being untranslatable into English:—

```
O namaye wa nan' to iu ka, what is your name?

Illerally, "as to your name, what (do people) say that it is."

Watakushi wa Hagiwara to moshimasu, call

Maruyama to mosu tokoro, that say place

A place called M. (literally, a place (of which they say) it is M.).
```

Very frequently in a sentence containing to an ellipsis

occurs with certain parts of the verbs iu, to say; omou, to think; kiku, to hear; and suru, to do; thus:--

O gakkö ni iku tote,
school to, (I) go (saying)
demashĭta.
that went-out

Anata ni kenkwa (shō),
you with quarrel (will do)

He went out saying that he
was going to school.

He came intending to

to (omotte) kimashita, free came intending to thinking came

To after verbs often means "if" or "when"; as—

Sugu ikanai to, okuremasŭ, \ If you do not go at once at-once go-not if are-late \ \ you will be too late.

'Kuru to sugu ni, \ come when immediately \ \ Immediately \ Immediately he comes.

Yoku-jitsu ni naru to, next-day become when \} When the next day came.

Placed at the end of an assertion to has a strongly emphatic form. When thus used it is generally followed by mo; **s—

Arimasŭ ka? Arimasŭ to mo! Are there any? Of course there are!

 $egin{array}{ll} Yar{o} & ext{gozaimasu} & ext{to itte mo,} \ ext{good is} & ext{that said even} \end{array} igg\} \ ext{Certainly I shall I}$

Wa.

This is a distinctive, separative or isolating postposition corresponding somewhat to the French "quant $\dot{\alpha}$ " and may be translated by "as for," "with regard to," "so far as . . . goes (is concerned)," etc. In English the same notion is expressed, not by a separate word, but by an emphasis on the noun.

Examples.

Kore de wa ikenai,
this with cannot-yo This wont do.

Atsui koto wa atsui, thick fact is-thick

Konda wa sonna wake such reason this-time ja (for de wa) nai,

is not

As far as thickness is concerned, it is thick.

This time, there will be nothing of that sort.

Konnichi wa, yoi tenki good weather to-day de gozaimasă,

To-day it is fine (whatever the weather has been).

Ima wa te-sŭki de gozaimasŭ, | Now I am at liberty (although I have been so busy).

Kore wa umai, are wa mazui, this is-delicious, that is-unpleasant agreeable.

In interrogative sentences wa often appears to be employed in asking a question, but an ellipsis must always be supplied. For example, ato wa, prenounced interrogatively, signifies "What is the next (thing)!" but literally it is "As for the next (thing), what is it!"

Examples.

O atsurave wa? What is your order, Sir? order

From the preceding observations and examples it will be gathered that wa is not, as is advanced by some writers, a sign of the nominative case. Certainly the word which wa follows has often to be rendered, in the English translation,

by a nominative, but in the Japanese sentence it never has the nominative force.

Beginners are often puzzled to know when to use wa and when ga, inasmuch as in many cases the same English translation must be rendered to two Japanese sentences, one containing wa and the other ga.

This is an important point, and one that must be clearly apprehended by every one endeavouring to express English ideas in the Japanese language. Although an incorrect use of the two words is impossible when the mind is fairly penetrated by Japanese, yet it is impossible to formulate precise rules for their employment.

The following explanations will probably suffice to minimise the difficulty and enable the student to recognise the distinction between wa and ga.

If the doctor is regularly visiting a patient in my house, the servant will probably announce his arrival by the words, "Isha wa miemashita," "The Doctor has come." In this case the "Doctor" (subject) is uppermost in the servant's mind. If, on the other hand, there be no one ill in the house, the Doctor's visit would be unexpected, and if he came he would be announced by, "Isha ga miemashita," "The Doctor has come!" Here the unexpected arrival of a medical man is predominant in the maid's thoughts.

Similarly, if a friend has died suddenly and unexpectedly, a person would inform me of his death by saying, "Seibun San ga shinimashita," "Mr Scibun is dead!" but if he had been ill and his death were expected at any moment, the sentence would be, "Seibun San wa shinimashita," "Mr Seibun is dead."

From the preceding observations it will be understood that wa is separative and emphatic, although there will usually be no emphasis on the corresponding part of the English sentence when the English substantive is a nominative. Ga, however, has nothing particularly emphatic about it, although in the English translation of a sentence in which it appears, its nearest equivalent is an emphasis on the word which it follows.

The rule for two nominatives in antithetical phrases is, that either ga may be employed in each, or else wa may be employed in each; thus, for the example on page 48, Kore wa umai, are wa mazui, This is delicious, that is disagreeable, we might substitute Kore ga umai, are ga mazui, in which case the two subjects would receive a stronger emphasis than the two predicates.

Wo.

Wo denotes that its associated word is the object in the sentence, and it is the nearest equivalent for the accusative case in Japanese although a noun in this case is not necessarily followed by wo. The accusative may be signified by the employment of other words than wo as well as by the form of the sentence, and the accusative case governed by a preposition does not take wo. It is also rejected before suru and itasu, to do, as well as in various other connections.

Examples.

```
Kondate wo misete kudasai, \ Please allow me to see bill-of-fare showing condescend \ the bill-of-fare.

Ato kara go aisatsu wo after reply \ moshimashö, \ will-say \ \ Nani wo suru, \ what \ do \ \ \ Hon-yaku suru, \ translation \ to-do \ \ \ To translate, to make a translation.
```

Kannin shite kudasare, $Please\ have\ patience$ patience having-done give $with\ me$.

Meshi kuu toki, $When\ dining\ (literally,\ when\ eating\ rice)$.

Wo is not infrequently employed in cases where a preposition appears in the English sentence, as in the following:—

Kuruma wo orite,

'riksha having-got-down | 'riksha.

Hachijin yen to in taikin

cighty called large-money

wo torareta,

was taken | Thanks to you, I was not

you shadow by money

wo torarenai,

not-taken | The went out of his shop.

Ya.

This postposition is sometimes expressive of hesitation, doubt, or reflection, and often it is simply an ejaculation. In some contexts it is a conjunction, and should be translated "and" or "or."

Examples.

Kurokawa ya! I say, Kurokawa (a name)
Uma ya inu ya buta ga
horses dogs pigs
arimasŭ,
are

Nido ya sando,
twice three-times
Omocho ya nani ka,
toys something

I say, Kurokawa (a name)
There are horses, dogs
pigs
pings, and such.

Two or three times.

Toys or something.

Ve.*

Ye signifies "to," "into," "towards," "at," and when added to nouns it is an equivalent of the dative case; thus—

Gakkō ye, o ide desŭ ka, school exit is?

Shibai ye iki-gake ni theatre to going-while gakkō ye chotto yorimasŭ school at, just will-stop

Suteishon ye itte o machi at yo wait nasaı, condescent

Do you go to school?

On the way to the theatre I will just drop in at the school.

Kindly go and wait a the station.

Yo.

With this particle, an equivalent for the vocative case can be formed for Japanese nouns, although its function extends somewhat beyond that of a mere vocative particle. It is not easy to furnish an exact English counterpart of yo, but a very approximate rendering is—"...I can tell you!" or "... and that's the end of it!"

Examples.

Yasui yo! | It is cheap, I can tell you!

Shiranai yo! | I don't know, and that's an end to it!

Arimasen yo! | I haven't any, so that's all about it!

Okkasan yo! | Mother!

O agari nasai yo! | Do come in, please!

* By many speakers the y in ye is omitted entirely in conversation, and even where not dropped entirely most people pronounce it very lightly.

Yori.

Yori means "from," "since," "than"; thus-Hiogo yori, From Hiogo. Ima yori, From now, henceforth. Sakujitsu vori. Since yesterday. Kore yori shichi ri, Seven vi from here. this from seven ri Omotta yori abunai, \ It is more dangerous than though than dangerous I thought. Roku-ji yori mo osoku, It will not do to be later six-o'clock than late natcha thun six o'clock. ikemasen. as-for-becoming is-no-go Moshi-agemashita nedan, stated price I cannot let you have it vori shĭta de at a lower price than than low L stated. sashi-ageraremasenŭ, offer-cannot

THE VERB.

The treatment of this most important part of speech in all languages—the Verb—varies considerably from that of Western tongues. For example, the Japanese verb possesses no forms which show distinctions of number or person; thus "I hear," "thou hearest," "he, she, it hears," "we hear," "you hear," "they hear," may all be rendered by the same word, kiku, and similarly with the other tenses.

The ultimate element of the verb—the germ out of which spring all inflectional forms—is termed the "root," which in many instances has become obscured and difficult to trace, through decay during process of time and other causes.

Japanese roots are a vexed question with philologists, but a clear and ample insight into the nature and functions of the verb can be obtained by the beginner without entering deeply into the study of verb-roots.

It is sufficient for all practical purposes to take as a starting point for verbal inflection, a certain developed form of the verb, termed the "stem," which can be utilised as a primary unit for further development. From the stem by the agglutination of one or more letters, are formed the "bases," which are four in number, and which serve to support certain affixes for the production of all the conjugational forms. The bases are—

- 1. The Certain Present. 2. The Indefinite Form.
- 3. The Conditional Base. 4. The Negative Base.

and as their process of formation from the stem, and the subsequent conjugational development are not in all cases identical, the verbal forms differentiate into two distinctly marked groups termed "Conjugations."

The following table exhibits the terminations of the bases in the two conjugations:—

FIRST CONJUGATION.

It will be observed that in the Second Conjugation there are two classes of terminations, one characterised by the vowel e, and the other by the vowel i. Some grammarians treat the latter class as a Third Conjugation, but as the forms of inflection are in other respects precisely the same, this separation is quite unnecessary.

EXAMPLES OF BASES IN THE TWO CONJUGATIONS. (The termination is italicised.)

First Conjugation.

Cert. Pres. Indef. Form. Neg. Base. Condl. Bas	Cert. Pres	. Indel. Form	. Nea. Base.	Condl. Base.
--	------------	---------------	--------------	--------------

to write	kaku	kak <i>i</i>	$\mathrm{kak}a$	kake
,, sell	uru	ur <i>i</i>	ura	ure
" read	yomu	yom <i>i</i>	voma	yom <i>e</i>

Second Conjugation.

to lose	${ m mak} er$	$\mathrm{mak} e$	$\mathrm{mak}e$	mak <i>ere</i>
", eat	${ m tab}\it{eru}$	ab e	${ m tab} e$	tab <i>ere</i>
,,• see	$\mathbf{m}iru$	$\mathrm{m}i$	$\mathbf{m}i$	$\mathbf{m}ire$
" fear	ojiru	oji	oj <i>i</i>	oj <i>ire</i>

The student should note that the letter r is always a component of the terminations of the bases of the Second Conjugation, but it never appears in those of the First. Any verb, however, may have it in the *stem* (e.g. uru, to sell, above).

Before proceeding to demonstrate how the various Moods and Tenses are formed by agglutinating suffixes to the bases, it is advisable to append a few remarks with reference to the points of difference between the Moods and Tenses of Japanese and English verbs.

Tense.—In Japanese, inflection of the verb to indicate the time of the action or state denoted by the verb, is limited almost entirely to forms expressing present or past time, and this time as either certain, or merely probable. Among the verbal forms present time is not clearly distinguished from future time as it is with most European languages. Future actions and states are indicated either by using words in conjunction with the present tenses or by employing the Probable Present tense alone.

In Japanese, then, four tenses only are produced by inflection, and these are—

- 1. The Certain Present.* 2. The Probable Present.
- 3. The Certain Past. 4. The Probable Past.

Taking the verbs Naosu, to mend, and Taberu, to eat, as examples of the First and Second Conjugations respectively, the following forms exemplify the method of forming the above tenses by the agglutination of suffixes to the bases. The terminations are marked by a hyphen.

Certain Present (or Future).

naosu, I mend, or shall mend. taberu, I cat, or shall cat.

Probable Present (or Future).

naos-ō, I probably mend, or tabe-yo, I probably cat, or shall probably mend. shall probably eat.

Certain Past.

naoshi-ta, I mended, or tabe-ta, I ate, & have have mended.

Probable Past.

naoshi-taro, I probably mended, tabe-taro, I probably ate, or probably have or probably mended. have caten.

N.B.—As observed previously, the Japanese verb ignores person and number, so that where the pronoun "I" is used in paradigms any other person would be equally appropriate; thus—

$$\label{eq:neode} \begin{split} \mathbf{naosu} = & I \quad mend, \quad thou \quad mendest, \quad he \quad mends, \quad she \quad mends, \\ \quad we \quad mend, \quad clc. \end{split}$$

^{*} It may here be stated that verbs are entered in Dictionaries and Vocabularies by the *Certain Present* form. In English the *Infinitive* is used for this purpose, but the latter form has no exact equivalent in Japanese.

Another time-inflection, peculiar to the language, is an indefinite tense form termed the "Frequentative" or "Alternative," form. Its primary function is to imply that the action is occasional or to denote the alternation or opposition of two different actions. The equivalent in English varies according to circumstances.

Frequentative Form.

mendina.

naoshi-tari, sometimes tabe-tari, sometimes eating, sometimes eats.

sometimes mends.

Mood.—The mode or manner of the assertion expressed by the verb is denoted by inflected forms intimating simple declaration, contingency or doubt, and command. Thus among Japanese verbs we have (1) Indicative, (2) Subjunctive, and (3) Imperative Mood forms.

The Subinuctive Mood consists virtually of two forms (a) the Conditional, and (b) the Concessive, according as the action or state expresses dependence, or involves concession.

> INDICATIVE MOOD. Present Tense.

naosu. I mend.

taberu. 1 cut.

Past Tense.

naoshi-ta. I mended.

tabe-ta. / ate.

SUBJUNCTIVE MOOD.

(a) Conditional. Present Tense.

naose-ba, if I mend. tabe-reba, if I eat.

Past Tense.

naoshi-tara, if I had mended. tabe-tara, if I had eaten.

(b) Concessive.

Present Tense.

naose-do, though I mend. tabe-redo, though I eat.

Past Tense.

 $\begin{array}{ccc} \textbf{naoshi-taredo,} \ though \ I \ have & \textbf{tabe-taredo,} \ though \ I \ have \\ mended. & eaten. \end{array}$

IMPERATIVE MOOD.

naose, mend!

tabe-ro, eat!

Verbal-Adjective forms.—Two other verb-forms closely allied with adjectives are—(1) the Gerund, and (2) the Desiderative. The formation and uses of these will be explained later.

GERUND.

naoshi-te, having mended, tabe-te, having eaten, mending. eating.

DESIDERATIVE ADJECTIVE.

naoshi-tai, I want to mend. tabe-tai, I want to eat.

The student will now be in a position to follow the verbal paradigms now to be given, arranged in accordance with European methods. The formation and uses of the tenses will be discussed fully later (see pp. 68 and 78).

FIRST CONJUGATION.

Naosu, to mend.

Indefinite Form—naoshi. Negative Base—naosa. Certain Present—naosu. Conditional Base—naose.

INDICATIVE MOOD.

Certain Present or Future.

Positive—naosu, I mend, I shall mend.

Negative—naosa-nai,*
(or) naosa-n(u),†

I do not mend, I shall not mend.

^{*} Where two forms are given, the first is the one in most common use.

[†] Letters in brackets may be dropped at will.

Probable Present or Future.

Pos. naos-ō, I probably mend, I shall probably mend.

Neg. naosa-nakarō, I probably do not mend, I shall probably not mend.

Certain Past.

Pos. naoshi-ta, I mended, I have mended.

Neg. naosa-nakatta, naosa-nanda.

Probable Past.

Pos. naoshi-tarō, I probably mended, I probably have mended.

Neg. naosa-nakattarō, naosa-nandarō, } I probably did not mend.

Frequentative Form.

Pos. naoshi-tari, sometimes mending, at times mending.

Neg. naosa-nakattari, sometimes not mending, at naosa-nandari, times not mending.

Desiderative Adjective.

Pos. naoshi-tai, I want to mend.

Neg. naoshi-takunai, I do not want to mend.

Gerund.

Pos. naoshi-te, mending, having mended.

Neg. naosa-nakŭte, naosa-zu, not mending, not having mended.

SUBJUNCTIVE MOOD.

(a) Conditional.

Present Tense.

Neg. oji-nakattara(ba), oji-nandara(ba),

 $_{f}$ if I had not feared.

(b) Concessive.

Present.

Pos. ojire-do(mo),

though Liear.

Neg. oji-nakeredo(mo), oji-nedo(mo),

 $\}$ though I do not fear.

Past.

Pos. oji-taredo(mo),

though I have feared, though
I teared.

Neg. oji-nakattakeredo, oji-nandaredo,

 $\Big\}$ though I have not feared.

IMPERATIVE MOOD.

Pos. oji-ro!

fear!

Neg. ojiru-na!

do not fear!

Note.—The student should bear in mind that, as observed before, the two forms of the Second Conjugation are distinguished from each other only by the letters c and i of the bases. A comparison of the two forms will show that the terminations are identical, so that when the first form has been memorised the second one can be at once formed.

Orthographical Modifications of the Stem.—It will be observed on reference to the preceding paradigms of the regular verbs, that the terminations are in most cases simply added to the bases without any changes taking place, but the Stems of all verbs of the First Conjugation undergo various orthographical modifications, chiefly euphonic, during conjugation, these changes occurring for the most part in the Gerund, in the Past Tenses, and in the Frequentative Form. The nature of these modifications is dependent in every case upon the final letter of the Stem, and they will be readily understood from a careful examination of the numerous exemplifications appearing in the following series—

(a) Stems ending in a vowel-

	Warau,	Iu,	Omou,
	to laugh.	to say.	to think.
Indef. Form	warai	ii	omoi
Neg. B\se	warawa	iwa	omowa
Gerund	waratte	itte	omotte
Cert. Past	waratta	itta	omotta
Condl. Past	warattara	ittara	omottara
Freq. Form	warattari	ittari	omottari

Here the consonantal element t of the suffixes is doubled.

With regard to the w in the negative base of verbs ending in a vowel stem (warawa, iwa, omowa), formerly the stem of all these verbs terminated with an f: as, Present, warafu; Indefinite Form, warafi; Conditional Base, warafe; Negative Base, warafa; but in accordance with a rule governing the entire vocabulary of the modern language, the f has been left out before u, i, and e, and has been changed into w before a, thus producing warau, warai, warae, warawa.

(b) Stems ending in s-

	Nasu,	Naosu,	Orosu,
	to do.	to mend.	to lower.
Indef. Form.	nashi	naoshi	oroshi
$Neg.\ Base.$	nasa	naosa	orosa
Gerund	nashĭte	naoshĭte	oroshĭťe
Cert. Past	nashĭta	naoshĭta	oroshĭta
Condl. Past	nashĭtara	naoshĭtara	oroshĭtara
Freq. Form	nashĭtari	naoshĭtari	oroshĭtari

Here the change of s into sh in the Indefinite Form is caused by the inability of the Japanese to pronounce s before i.

(c) Stems ending in t-

	Motsu,	Katsu,	Butsu,
	to hold.	to win.	to beat.
Indef. Form	mochi	kachi	buchi
$Neg.\ Base$	mota	kata	outa
Gerund	motte	katte	butte
Cert. Past	motta	katta	butta
Condl. Pres.	mottara	kattara	buttara
Freq. Form	mottari	kattari	buttari

Here the change of t into ch is caused by the inability of the Japanese to pronounce t before i or u.

(d) Stems ending in b or m-

	Tobu,	Manabu,	Yomu,	Amu,
	to fly.	to study.	to read.	to weave.
Indef. Form	tobi	manabi	yomi	ami
Neg. Base	toba	manaba	yoma	ama
Gerund	tonde	manande	yonde	ande

Cert. Past tonda mananda yonda anda Condl. Past tondara manandara yondara andara Freq. Form tondari manandari yondari andari

Here, before the suffixes, the b and m are changed into n, and the t of the suffixes becomes d.

(e) Stems ending in k-

	Kiku,	Kaku,	Nozoku,
	to hear.	to write.	to peer.
Indef. Form	kiki	kaki	nozoki
Neg. Base	kika	kaka	nozoka
Gerund	kiite	kaite	nozoite
Cert. Past	kiita	kaita	nozoita
Condl. Past	kiitara	kaitara	nozoitara
Freq. Form	kiitari	kaitari	nozoitar

Here k is dropped before the terminations.

Exception - Iku, to go (Indefinite Form, iki), forms its Gerund as itte (not *iite*), its past tenses as itta, etc. and its Frequentative Form as ittari.

(f) Stems ending in g-

	Hegu,	Kagu,	Tsugu,
to	pect off.	to smell.	to join.
Indef. Form	hegi	kagi	tsugi
$Neg.\ Base$	hega	kaga	tsuga
Gerund	heide	kaide	tsuide
Cert. Past	heida	kaida	tsuida
Condl. Past	heidara	kaidara	tsuidara
Freq. Form	heidari	kaidari	tsuidari

Here g is dropped and the t of the suffixes is changed to d.

(g) Stems ending in r	·

	Aru,	Shiru,	Noboru,
	to be.	to know.	to climb.
Indef. Form	ari	shiri	nobori
Neg. Basc	ara	shira	nobora
Gerund	atte	${ m shitte}$	nobotte
Cert. Past	atta	shitta	nobotta
Condl. Past	attara	shittara	nobottara
Freq. Form	attari	shittari	nobottari

Here r is dropped, and the t of the suffixes is doubled.

The student cannot have failed to observe that the foregoing letter-changes cause ambiguity in verbs whose stems end in b and m, and also those ending in a rowel, in r and in t. Thus the context alone shows whether yonda is to be treated as the Certain Past of yobu, to call, or of yomu, to read; whether utte is the Gerund of utsu, to strike, or of uru, to sell; whether nattara is the Conditional Past of naru, to become, or of nau, to twist; and similarly in other instances.

FORMATION OF THE BASES, MOODS, AND TENSES.

INDEFINITE FORM.—Affix i to the stem for the First Conjugation, and e or i for the Second.

CERTAIN PRESENT OR FUTURE.—(Positive): Affix u to the stem for the First Conjugation, and eru or iru for the Second. (Negative): (a) Affix nai to the Negative Base; (b) affix na to the Negative Base.

NEGATIVE BASE.—For the First Conjugation affix a to the stem. The Negative Base of the Second Conjugation is identical with the Indefinite Form.

CONDITIONAL BASE.—Affix e to the stem for the First Conjugation, and ere or ire for the Second.

PROBABLE PRESENT OR FUTURE.—(Positive) For the First Conjugation affix u to the Negative Base, producing the

diphthong au, which must then be contracted to ō; for the Second Conjugation affix yō to the Negative Base. (Negative): (a) Affix nakarō to the Negative Base; (b) affix mai to the Certain Present for the First Conjugation, and affix it to the Negative Base for the Second.

CERTAIN PAST.—(Positive): Affix to the Indefinite Form, noting the phonetic modifications in the First Conjugation (p. 65 et seq.). (Negative): (a) Affix nakatta to the Negative Base; (b) affix nanda to the Negative Base.

PROBABLE PAST.—(Positive): Affix tarō to the Indefinite Form, noting the modifications in the First Conjugation (p. 65 et seq.). Tarō represents te arō, literally, "probably shall be having finished." (Negative): (a) Affix nakattarō to the Negative Base; (b) affix nandarō to the Negative Base. Nandarō is deduced from the Negative Certain Past on the model of the same tense of the Positive.

FREQUENTATIVE FORM.—(Positive): Affix tari to the Indefinite Form, noting the modifications in the First Conjugation (p. 65 et seq.). Tari represents to ari, so that its original signification is identical with that of the Past Indicative. (Negative): (a) Affix nakattari to the Negative Base; (b) affix nandari to the Negative Base. Nandari is deduced from the Negative Certain Past on the model of the same tense of the Positive.

DESIDERATIVE ADJECTIVE.—(Positive): Affix tai to the Indefinite Form. Tai is an adjective originally identical with itai, "painful," and may be conjugated like other adjectives in accordance with the paradigms on pages 120, 121, and 123. (Negative): Affix takunai to the Indefinite Form.

GERUND.—(Positive): Affix te to the Indefinite Form, noting the modifications in the First Conjugation (p. 65 et seq.). Te is supposed to be a part of the verb hatern, "to finish," so that naoshite means, literally, "having finished mending," or "finishing mending." (Negative): (a) Affix

nakute to the Negative Base; (b) affix zu to the Negative Base. This form often takes the postposition ni after it, without, however, altering its signification.

CONDITIONAL PRESENT.—(Positive): Affix be to the Conditional Base. Ba is really wa under an irregularly nigoried form. (Negative): (a) Affix nakereba to the Negative Base; (b) affix neba to the Negative Base.

CONDITIONAL PAST. —(Positive): Affix taraba to the Indefinite Form, noting the modifications in the First Conjugation (p. 65 et seq.). Taraba represents to araba, literally, "if am having finished," araba being a classical form—the "Hypothetical Mood"—of ara, "to be" (see pp. 87 et seq.). (Negative): (a) Affix nakattaraba to the Negative Base; (b) affix nandaraba to the Negative Base.

Concessive Present.—(Positive): Affix domo to the Conditional Base. Do is the postposition to with the nigori, and mo is also a postposition. (Negative): (a) Affix nakeredomo to the Negative Base; (b) affix nedomo to the Negative Base.

CONCESSIVE PAST.—(Positive): Affix taredomo to the Indefinite Form, noting the modifications in the First Conjugation (p. 65 et seg.). Taredomo represents to aredomo, literally, "though am having finished." Aredomo, the Concessive Present of arm, "to be," is a compound of the Conditional Base are, with the postpositions to and mo. (Negative): (a) Affix nakattakeredo to the Negative Base; (b) Affix nandaredo to the Negative Base.

IMPERATIVE.—(Positive): In the First Conjugation this is the same as the Conditional Base, and in the Second it is produced by affixing ro to the Indefinite Form. Ro is probably a corruption of yo, which is an ejaculation somewhat similar to the English "oh!" In addressing one another the members of a household often use a form obtained by affixing na to the Indefinite Form, as shina! "do!"; yobi-na! "eall!" (Negative): Affix na to the Certain Present.

IRREGULAR VERBS.

Japanese verbs present very few irregularities in comparison with those of most European languages, and in the small number of those which deviate from the general scheme of conjugation the irregularity is but slight.

The three irregular verbs in most common use are **kuru**, to come: **suru**, to do: and **masŭ**, to bc. Used as auxiliaries with other verbs kuru and suru have an extended application in expanding and describing the actions expressed by the principal verb, and the same two verbs serve also to afford verbal meanings to nouns, etc.

The use of *masi* as a separate word has now become obsolète, and it is only employed in combination with other verbs to form an honorific conjugation which is in constant use to express politeness, respect, or reverence.

The following are the paradigms of these irregular verbs, and instead of exhibiting mass alone, it is shown combined with the verb naosu, to mend, but it should be observed that the respectful form for nearly every other verb can be deduced by substituting the Indefinite Form of such verb for naoshi- in the paradigm:—

THE IRREGULAR VERB Kuru, to come.

Indefinite Form—ki. Negative Base—ko. Certain Present—kuru. Conditional Base—kure.

INDICATIVE MOOD.

Certain, Present, or Future.

Pos.	kuru,		1	come	, I s	shall co	me.		
Neg.	ko-nai,*	1	1	do	not	come,	ſ	shall	not
(or)	$\mathbf{ko}\cdot\mathbf{n}(\mathbf{\check{u}})^{\dagger}$	J		com	r.				

^{* †} See footnotes, p. 58.

Probable Present or Future.

Pos. ko-yō, I probably come, I shall probably come.

Neg. ko-nakarō, I probably do not come, I shall probably not come.

Certain Past.

Pos. ki-ta, I came, I have come.

Neg. ko-nakatta, ko-nanda, I did not come.

Probable Past.

Pos. ki-tarō, I probably came, I probably have come.

Neg. ko-nakattarō, ko-nandarō, l probably did not come.

Frequentative Form.

Pos. ki-tari, sometimes coming, at times coming.

Neg. ko-nakattari, ko-nandari, sometimes not coming.

Desiderative Adjective.

Pos. ki-tai, I want to come.

Neg. ki-takunai, I do not want to come.

Gerund.

Pos. ki-te, coming, having come.

Neg. ko-nakŭte, not coming, not having ko-zu come.

SUBJUNCTIVE MOOD.

(a) Conditional.

Present Tense.

Pos. kure-ba, if I come.

Neg. ko-nakereba, if I do not come.

Past Tense.

Pos. ki-tara(ba), if I had come.

Neg. ko-nakattara(ba), ko-nandara(ba), if I had not come.

(b) Concessive.

Present.

Pos. kure-do(mo), though I come.

Neg. ko-nakeredo(mo), though I do not come.

Past.

Pos. ki-taredo(mo), though I came.

Neg. ko nakattakeredo, ko-nandaredo, though I have not come.

IMPERATIVE MOOD.

Pos. koi! come!
Neg. kuru-na! do not come!

THE IRREGULAR VERB Suru, to do.

Indefinite Form—shi. Negative Base—se. Certain Present—suru. Conditional Base—sure.

INDICATIVE MOOD.

Certain Present or Future.

I do, I shall do. Pos. suru,

Neg. shi-nai,* $ig\}$ I do not do, I shall not do. se-n(ŭ), †

Probable Present or Future.

I probably do, I shall pro-Pos. shĭ-vō.

bablu do.

 $\left\{ egin{array}{ll} I & probably do not do, I probably shall not do. \end{array}
ight.$ shi-nakarō. Nea. se-mai.

Certain Past.

Pos. shĭ-ta. I did. I have done.

Nea.shi-nakatta, } I did not do. se nanda,

Probable Past

Pos.I probably did, I probably shi-taro. have don.

shi-nakattaro, Neg.\ I probably did not do. se-nandarō.

Frequentative Form.

Pos.sometimes doing, at times shi tari, doing.

sometimes not doing, at times not doing. Neg. shi-nakattari, se nandari.

Desiderative Adjective.

Pos.shi tai. I want to do. Neg.shi takunai, I do not want to do.

Gerund.

Pos.shi-te, doing, having done.

Neg shi-nakute, } not doing, not having done. se-zu,

SUBJUNCTIVE MOOD.

(a) Conditional.

Present Tense.

sure-ba, Pos.

if 1 do.

shi-nakereba, Neq.se-neba.

 $\left. \left. \left. \right\} \right.$ if I do not do.

Past Tense.

Pos.shi-tara(ba), if I had done.

Neg.shi-nakattara(ba), se-nandara(ba),

if I had not done.

(b) Concessive.

Present.

Pos. sure-do(mo),

though I do.

shi-nakeredo(mo), Neg.se-nedo(mo),

 $\left. \left. \right| \right.$ though 1 do not do.

Past.

shi-taredo(mo), Pos.

though I have done, though I did.

shi-nakattakeredo, Neg.se nandaredo.

though I have not done.

IMPERATIVE MOOD.

Pos.shi-ro! do!

Neg. suru-na!

do not !

THE IRREGULAR POLITE SUFFIX Masu.

(Exemplified in the Conjugation of the Verb Naoshimasu. to deign to mend.)

Indefinite Form-mashi.

Negative Base—mase.

Certain Present -- masu, or Conditional Base -- masure.

masuru.

INDICATIVE MOOD.

Certain Present or Future.

Pos. naoshi-masu) you deign to mend, you will naoshi-masuru.

Neg. naoshi-masen(ŭ), you do not deign to mend, you will not deign to mend.

Probable Present or Future.

Pos. naoshi-mashŏ, you probably deign to mend, you probably will deign to wend.

Neg. naoshi-masumai, you probably do not deign to mend, you probably will not deign to mend.

Certain Past.

Pos. naoshi mashita, you deigned to mend. Neg. naoshi-masen deshita, you did not deign to mend.

Probable Past.

Pos. naoshi-mashitaro, gon probably *deigned to mend.

Neg. naoshi masen deshitaro, you probably did not deign to mend.

Frequentative Form.

Pos. naoshi-mashitari, sometimes deigning to mend.

Neg. naoshi-masenakattari, sometimes not deigning to mend.

Desiderative Adjective. (wanting) Gerund.

Pos. naoshi-mashite, deigning to mend, having deigned to mend.

Neg. naoshi-masezu, naoshi-masen de, not deigning to mend, not having deigned to mend.

SUBJUNCTIVE MOOD.

(a) Conditional.

Present Tense.

Pos. naoshi-masureba, if you deign to mend. Neg. naoshi-masen(a)kereba, if you do not deign to mend.

Past Tense.

Pos. naoshi-mashitara(ba), if you had deigned to mend.

Neg. naoshi-masen(a)kattaraif you had not deigned to mend.

(b) Concessive.

Present.

Pos. naoshi-masuredo(mo), though you deign to mend.

Neg. naoshi-masen(a)keredo(mo) though you do not deign to
mend.

Past.

Pos. naoshi-mashitaredo-(mo), Neg. (wanting).

IMPERATIVE MOOD.

Pos. naoshi-mashi! | deign to mend!

Neg. naoshi-masuna! | do not deign to mend!

Other slightly irregular verbs are the following:—

Aru (First Conjugation), to be: The Negative Voice of this verb is not in use, the negative adjective nai (see p. 122) being employed in licu thereof. The Improbable Present or Future, arumai only is found, employed with nakaro.

The Desiderative Adjective also is wanting. When the postposition de precedes aru the final syllable is discarded, and the combination becomes de instead of daru.

Gozaru, to be. With many speakers the r in the final syllable of this verb is rejected when masŭ is affixed: thus, gozaimasŭ for gozarimasŭ. This also takes place in the polite verbs irassharu, to go, to come; nasaru, to deign to do; kudasaru, to condescend; and ossharu, to deign to say, and the resulting forms—irasshai, nasai, kudasai, and osshai—are also used as Imperatives; osshaimashi is, however, much more frequent than osshai.

Besides the elimination of the r in gozaimasă, in familiar intercourse several other of the letters in the body of the word are frequently dropped, so that it becomes in the mouths of many speakers gozasă, gasă, or gesă, and when gozaimasă is preceded by de the combination de gozaimasă is often contracted to desă; de gozaimashta to deshta, etc.

Shinuru, to die. This verb partakes of the nature of both the First Conjugation and of the Second. Throughout the greater part of its conjugation it is treated as if it belonged to the First Conjugation and had the form shinu (stem, shin). The termination ru, however, causes its Certain Present shinuru, and its Negative Imperative shinuru-na to be irregular.

Uses of the Bases, Moods, and Tenses.

(The three regular verbs naosu, taberu, and ojiru given in the paradigms on p. 58, et seq., are used in illustration.)

The Indefinite Form, naoshi; tabe; oji.—As will have been observed in the paradigms, this base is used more extensively than any of the others to support verbal inflections. It is also constantly employed without any modification to produce nouns; thus—

warai, laughter, yorokobi, happiness, hori, moat, canal, nokori, remainder, akinai, commerce, hikari, lustre, (from) warau, to laugh.

- " yorokobu, to be happy.
- ,, horu, to dig.
- " nokoru, to remain over.
- " akinau, to trade.
- ., hikaru, to shine.

The Indefinite Form is also used to form compounds with nouns, adjectives, and other verbs; as—

te-nugui, a towel; from te, hand, and nuguu, to wipe. kimono, clothes; from kiru, to wear, and mono, thing. wakari-nikui, difficult (to comprehend); from wakaru, to understand, and nikui, distasteful.

kiru-korosu, to cut to death; from kiru, to cut, and korosu, to kill.

shi-ageru, to finish; from suru, to do, and ageru, to raise.

The negative forms of the verbs suru, or itasu, to do, preceded by the Indefinite Form of other verbs with the postposition wa or mo following, are used for Negative tenses, the forms thus obtained being more emphatic than the corresponding simple tenses. In such cases wa is usually pronounced ya in familiar conversation; thus—

Ari wa shimasen (familiar),
Ari ya shinai (polite),
Kamai ya shinai,
care do-not

Mõ ki ya itashimasen, | I know he will not come
again coming will-not-do | again.

A most important rule exists in the classical language, governing the use of the Indefinite Form, and it is also

frequently observed in set speeches, and by careful and educated speakers. This rule is as follows:—

"In sentences where two or more consecutive clauses contain verbs characterised by the same tense and mood, all the verbs except the last are put in the Indefinite Form, the final verb alone taking the termination indicating the tense or mood of the whole sentence."

Thus it is necessary to wait till the finish of the final clause before it can be seen whether the present, past, or future, the indicative or conditional, etc., is intended.

In the Negative voice the Indefinite Form is replaced by the Negative Gerund.

Examples.

Certain Present or Future: (Positive) maosu; taberu; ojiru: (Negative) maosa-mai, maosa-m(\check{u}); tabe-mai, tabe-m(\check{u}); oji-mai, oji-m(\check{u}). And Probable Present or Future: (Positive) maos- \check{o} ; tabe-y \check{o} ; oji-y \check{o} : (Negative) maosa-makar \check{o} , maosu-mai; tabe-makar \check{o} , tabe-mai; oji-makar \check{o} , oji-mai.

As has been observed before, the Japanese verb does not clearly discriminate between present and future time. If an Englishman intends definitely to read a certain book at some future time, and expresses that intention, he decides upon the tense to employ by considering the time when the reading takes place, and thus uses the Future, "I shall read the book." If, however, his mind is not fully made up, he still employs the Future, and intimates the

uncertainty by the use of some such word as "perhaps," and says, "Perhaps I shall read the book."

Similarly, if my servant desires to let me know that some one is reading a newspaper in another room, as the act of reading is proceeding while she is speaking, she says, "He is reading the newspaper;" but if not quite sure whether the man is reading or not, she says, "Perhaps he is reading the newspaper."

Now in Japanese, things are different. The verb has one form serving to fulfil the purpose of indicating any certain act or condition be it present, habitual, or future, and another form to indicate any probable act or condition, whether present or future, and thus it is the certainty or uncertainty that is considered instead of the time. ever, since acts and conditions belonging to the present are necessarily more certain than those of the future, the form implying probability is used in most cases for future time. whilst the form which denotes certainty is used for present time. The adverting to the sentences just given-"He is reading the newspaper," and "I shall read the book."the verbs in both sentences are translated by the Certain Present or Future, whilst in "Perhaps he is," etc., and "Perhaps I shall," etc., both verbs are rendered by the Probable Present or Future.

From the foregoing remarks it will be readily understood that when a Japanese says "Miönichi mairimashö," he is not giving a decided promise to come to-morrow, he says merely "I shall very likely come to-morrow." If he intended to promise faithfully he would say, "Miönichi mairimasü."

Examples.

Hiogo ni honya aru ka, book-shops Arimasu to mo,

Are there any booksellers in Hiogo?

Certainly there are.

```
I believe there are.
Arimashō.
                              I believe not.
Gozarimasůmai,
Kimasii ka (certainty),
                              Will he come?
Kimashō ka (probability),
                              Will he come (do you think)?
                                Is he likely to come?
                              I do not think he will come.
Kimasimai.
                              He will probably come.
Kimashō.
Ame ga furimasu,
                           \ It rains, it is raining (or)
                                it will certainly rain.
rain falls
                              It will probably rain.
Ame ga furimashō,
Dare ka, soto de matsu,
                            Somebody is waiting outside.
somebody outside waits
Mushi ga taisõ oru,
                            There are a lot of insects.
insects manu abide
Mičnichi sono hako
to-morrow
  kaimasho.
  will-bury
Shiranu,
```

The dominating idea inherent in the Probable Present or Future being one of uncertainty, with an inclination towards probability, it is frequently employed to translate such conjectural assertions as those in which "may" or "must" appears in English as—

It should be carefully borne in mind that where the English "must" implies *obligation*, the above idiom cannot be employed. In this case, "must" is expressed by a double negative; as—

N.B.—It is sometimes permissible for narană to be understood, as Ikancha, "I must go."

Certain Past: (Positive) naoshita; tabe-ta; oji-ta: (Negative) naosa-nakatta, naosa-nanda; tabe-nakatta, tabe-nanda, oji-nakatta, oji-nanda, and Probable Past: (Positive) naoshi-tarō; tabe-tarō; oji-tarō: (Negative) naosa-nakattarō, naosa-nandarō; tabe-nakattarō, tabe-nandarō; oji-nakattarō, oji-nandarō.

The difference between the Certain Past and the Probable Past is precisely similar to that between the Certain Present and the Probable Present (see p. 80).

Note that *Hiogo ye itta* signifies both "He went to Hiogo," and "He has gone to Hiogo." When it is necessary to intimate distinctly the Perfect signification, the Gerund with oro or its must be used, as **Hiogo ye itte oru** (itte iru or itteru), He has gone to Hiogo (literally, Having gone to Hiogo, he remains).

The student should also carefully note the difference between itta kara and itte kara. The former signifies "because he has gone," whereas itte kara means "after he has gone." The only difference between the two phrases is the use of the Past Tense in a to convey the sense of "because," and of the Gerund in e when "after" is meant.

Certain anomalous uses of the Past Tense are apt to embarrass the beginner. Thus it is sometimes heard where the Present is preferred in English, as Wakarimashita, I have understood, i.e. I understand; O naka ga sukimashita, I am hungry (literally, inside has become empty).

The Certain Past (and Certain Present) construed with the **koto**, action, thing, fact, is somewhat equivalent to our Infinitive, a mood for which Japanese has no exact counterpart, thus miru koto, to see (in general); mita koto, to have seen.

Examples.

Kita ka,	Has he come?
Kimashĭtaro ka,	Do you think he has come?
Kio kita,	He came to-day.
Doko ye itte kita, where having-gone has-come	Where has he been?
Ikimasenanda,	I did not go.
Mae ni mo itta tõri, before in also said way	$\Big\} \ As \ I \ said \ before.$
Taigai wakarimashitta, mostly have-understood	$\Big\}$ I understand most of it.
O-warai shimashita, great-langhing (we) did	We laughed heartily about it.
Dare ni kiita, whom from have-heard	\ From whom here yo \ \ \ heard it?
Amari mita koto ga too-much have-seen fact gozaimasen, is-not	I have scarcely ever seer any.
Sazo go taikutsű de surely tedium gozaimashitaró, will-have-been	You must have found the time long.

Frequentative Form: (Positive) naoshi-tari; tabe-tari; oji-tari: (Negative) naosa-nakattari, naosa-nandari; tabe-nakattari, tabe-nandari; oji-nakattari, oji-nandari.

The dominating idea of this form is to denote occasional action, or alternation of action. It is commonly used with

an accompanying word having the same inflection, the second one being generally followed by suru, to do.

Examples.

Kitari konakattari shimasi, sometimes he comes, and sometimes he does not.

Kono yuki ga futtari yandari this snow fulling stopping suru tenki, do weather

Kono yuki ga futtari yandari when it is alternately snowing and being fine.

Desiderative Adjective: (Positive) naoshi-tai; tabe-tai; oji-tai: (Negative) naoshi-takunai; tabe-takunai; oji-takunai.

This is deduced from the verb by affixing to the Indefinite Form the termination *tai*, which means "desirous" or "desirable," the form thus compounded being employed where such seas as "want," "wish," or "desire" appear in English; as —

```
Sono mono wo mitai,
that thing wish-to-see

Mitai mono,
desire-to-see thing

I kitaku-nai,
O hanashi wo (or ga) shitai,
talk wish-to-do

to omotte imasu,
thinking remain

I wish to see that.
A thing I desire to
I do not wish to go.

I have been wishing to
talk to you.
```

Either of the postpositions ga or wo may precede the Desiderative, as exemplified in the last sentence.

THE GERUND: (Positive) naoshi-te; tabe-tai; oji-te: (Negative) naosa-nakŭte, naosa-zu; tabe-nakŭte, tabe-zu; oji-nakŭte, oji-zu.

The following sentences show the ordinary uses of the Gerund.

```
Furuki wo tazunete, atarashĭki

old enquiving new by studying the old (Proverb).
  know
                               A Please show me the
Kondate wo misete kudasai,
             showing condescend
Ame ga futte kimashĭta,
                                  { It has begun to rain.
      falling has-come
Chiri tsumotte yama to naru, dust houping mountain becomes (Proverb).
                               Where has he been to?
where having-gone has-come
        kite
Motte
                      agemashö, \ L will bring it for
having-taken having-come will-offer
Shio wa irezu to yoroshiu,
salt not-putting-in good
 gozaimasŭ,
```

The Gerund very frequently appears in sentences where the word "so" is employed in English; as —

Te ga hiete tamaranai,) My hands are so cold I hands being-cold cannot-bear | cannot bear.

Construed with miru, to see, the Gerund denotes that an action is to be performed, but without the exercise of much exertion as it were; thus--

Construed with oku, to put, the Gerund denotes a final and decided completion of some state or action; thus—

Conditional Present: (Positive) naose-ba; tabere-ba; ojire ba: (Negative) naosa-nakereba, naosa-neba; tabenakereba, tabe-neba; oji-nakereba, oji-neba: and Conditional Past: (Positive) naoshi-tara(ba); tabe-tara(ba); oji-tara(ba): (Negative) naosa-nakattara(ba), naosa-nandara(ba): tabe-nakattara(ba), tabe-nandara(ba): oji-nakattara(ba), oji-nandara(ba).

To understand clearly the uses and formation of these tenses it is privile to advert briefly to the Classical form of the language.

In this form there exists what is termed a "Hypothetical Present and Past"; thus —

Condl. Pres. naoseba, when I mend, as I mend.
,, Past naoshttareba, when I had mended, as I had mended.

Hypo. Pres. naosaba, if I mend.
,, Past naoshitaraba, if I had mended.

It will be observed that the Hypothetical Present is deduced from the Negative Base by adding ba. In the modern Colloquial the distinction between hypothetical and conditional is gradually dying out, and to convey the idea of "when," a periphrasis with the word toki, time, or with the postposition to, is usually employed; thus—

So mõshimasu to sugu so said when at-once ni shikaremashĭta, got-scoided

Kuru toki.

When I said so, I at once got scolded.

When he comes.

The Present Tense of the ancient Conditional and the Past of the Hypothetical have remained, and the single modern mood thus deduced by combining parts of the two ancient forms might more logically be called the Hypothetical since it expresses the signification "if . . ."

The only surviving Present Tense Hypothetical forms are *iwaba*, from **iu**, *to say*, which is used to render the idea of "thus to speak," and *naraba*, from **naru**, a Classical verb signifying "to be," which latter must be distinguished from **naru**, *to become*. The real signification therefore of *naraba* is "if it be," but when used with other verbs as an auxiliary its meaning is nearly "if." Some speakers reject the final *ba*, saying "nara"; thus

Dekiru nara, kyō-ju n forthcomes if hy-to-night kore wo utsushite, this haviny-copied Naro koto naraba, will-become thing if it-he Fusoku nara, motto not-sufficient if-it-be more toraseyō, will-make-take

If it can be done.

If it is not sufficient, I will give you more.

Examples (Conditional).

Uwasa wo sureba kage gossip if-do shadow a sasu, strikes If you talk of a man, his shadow will fall upon you (Proverb).

Yuki ga ii kagen good condition yameba, yoroshi ga, if-stop is-good but Warui koto sureba, warui bad . thing if-do mukui ga aru, reword Areba, yo gozaimasu ga, \ If there were some I should if there-be good is Dekitara(ba), motte kite if-has-forthcome carrying coming kudasai. condescend Ittaraba, kayō na koto if-had-gone this-sort wa dekinai hazu

not-become necessity

de armashita.

If it ceases snowing in reason-able time, it would be a good

If you do evil, there is an

be glad.

If it is ready, please bring it with you.

Nothina like this would have happened if he had gone.

CONCESSIVE PRESENT: (Positive) muose-do(mo); taberedo(mo); ojire-do(mo); (Negative) masa-nakeredo(mo), naosa-nedo(mo): tabe-nakeredo(mo), tabe-nedo(mo); ojinakeredo(mo), oji-nedo(mo): and Concessive Past: (Positive) naoshi-taredo(mo); tabe-taredo(mo); oji-taredo(mo): (Negative): naosa-nakattakeredo, naosa-nandaredo; tabenakattakeredo, tabe-nandaredo; oji-nakattakeredo, ojinandaredo.

The signification of these tenses is very similar to "though" in English, but in practice it is usually conveved more conveniently by commencing the subsequent clause with "but."

The forms given in the paradigms are not much used, the substitute more commonly heard being the word keredo

(to which mo, even, is often affixed) in conjunction with the Present or Past of the Indicative; thus—

Tazunemashĭta keredomo, (I) enquired though gozaimasenŭ,
$$I$$
 enquired, but there was not any.

Keredo and keredomo are often replaced by to wa iedo(mo), literally "though one say that," and thus the phrases oitaredo(mo), oita keredo(mo) and oita to wa iedo(mo) all have precisely the same meaning.

Examples (Concessive).

Tenki naredo samni, Though the weather is weather though-it-is is-cold fine, it is cold.

Aru keredo mo omaye ni are though even you to I have some, but I will not give you any.

Sagashita keredomo, sought though shiremasen, cannot-know

Yohodo maye ni kane, wo kashita, keredo, mada kayeshima-senű,

The Imperative: (Positive) naose; tabe-ro; oji-ro: (Negative) naosu-na; taberu-na; ojiru-na.

The ordinary use of this form is, like that in other languages, to express command or direction, but the bare Imperative is seldom used except in military commands, as it sounds, in Japanese ears, decidedly abrupt and dis-

courteous. Even in addressing members of the lowest classes an honorific periphrasis is usually substituted, as will be explained later.

Examples.

O•tōshi mōse, let-through say	} Show the gentleman in.
To wo shimero,	\} Shut the door.
Sűkoshi mate	Wait a little.
Tomare!	Halt!
Yasume!	Stand at case!
Sore we taberuna!	Don't eat that!
Shòchi suruna!	Do not consent!

A common construction, by means of which the English first person plural of the Imperative (let us...) may generally be revilered is given in the following examples:—

Itte kikimashö, having-gone will-hear } Let us go and listen to it.

Ko shiyö ja nai ka thus will-do is-not? } Let us do it like this.

(or the future alone without ju na kai).

AUXILIARY VERBS.

A considerable number of the affixes contributing to the production of the moods and tenses are really auxiliary verbs which were originally independent. For example, in the expression naoshimashita, I have mended, the affix mashi formerly signified "to be," and the terminal ta (for te ara) means "am having finished," and thus the word naoshimashita when decomposed is shown to mean "am having finished mending." The auxiliaries have also con-

tributed to the production of verbal stems. Thus with the auxiliaries eru, to get, and aru, to be, are formed—

yameru, to cease. mazaru, to be mixed. kakeru, to hang (trans.) kakaru, to hang (intrans.)

The following are the chief auxiliaries in use at present as separate and independent words: ---

1. Aru, to be.

As an auxiliary aru is most commonly employed with the particle de to produce compound equivalents for the Probable Present or Future, and also for some of the Negative tenses. **De aru** is usually abbreviated to da; **de arō** to d'aro or darō; **de atta** to d'atta or datta, etc.; thus.--

Iku de arō,
iku d' arō,
iku darō,
Kasanai de atta,
kasanai datta.

for ikō, will probably go.
for kasanakatta, iii not lend.

Konai de attarō,) for konakattarō, has probably not konai dattarō,) come.

Note.—The postposition no is frequently placed between the verb and da, darö, datta, etc.; thus konai no d'aró, he is probably not coming.

When the polite termination masă is preceded by de and the verb ara, a still further abbreviation eccurs, which is in frequent use in familiar conversation. Thus de arimashō first becomes de mashō and then deshō; and de arimashōta contracts to deshōta.

It should be observed that the compound future denotes a slightly greater degree of doubt than the simple future, and that the shorter and more abbreviated the phrase, the less courteous it becomes. De jozarimasŭ is much politer and less familiar than desŭ.

Preceded by the Gerund, aru serves to produce another group of compound tenses, as **kite gozaimas**ŭ, they have come.

- 2. Iru (2nd Conj.; stem i).
- 3. Oru (1st Conj; stem ori).

These auxiliaries each mean, literally, "to dwell," hence "to live," "to be" (in a certain place), and combined with the Gerund their various forms compose a group of other tenses which are equivalent to such English compound tenses as are exemplified in the expressions "he is eating," "he was walking," "he has been reading," etc. This combination has therefore in some cases a Progressive signification and in others a Perfect signification. For example, nete orimasŭ means he is sleeping, whilst kite orimasŭ is, not he is coming, but he is having come, i.e. he is come. The simple past kimashita is more obscure, inasmuch as its meaning might be merely that the person had come but had gone away again, whilst the meaning of kite orimasŭ cannot be other than that he has come and is still here.

In some cases the English passive must be employed to render such phrases, the neuter being nearly always preferred in the Japanese construction; thus—

 $\begin{array}{ll} \text{Kirei ni sorotte} & \text{orimasú,} \\ \textit{prettily} & \textit{being-in-order are} \end{array} \right) \textit{ They are nicely arranged.}$

After the Gerund, the initial i is frequently clided, particularly in the Present tense, and thus shitte iru becomes shitteru, I know (literally, having learnt, I remain); kaite iru becomes kaiteru, etc.

Irassharu and o ide nasaru are honorific synonyms of iru and of various other verbs, as will be demonstrated later.

Iru and oru as auxiliaries are now frequently used in speaking of inanimate objects, although their original signification appears to restrict their application to living beings. In a few idious, however, aru is used for inanimates and iru for animates; observe, for example, the distinction between kite orimasü, he has come, and kite arimasü, it has come, or there is some.

Examples.

Nani wo shite imasu, what is he doing?

Dete orimasu, He has gone out.

Bakana koto wo itteru, You are talking at foolish thing say-remain random.

Mada nete orimasu, He is still sleeping.

Still sleeping is He is still sleeping.

Donata ka o ide ni natte someone-ar-other exit to having-become orimasu ka, is

4. Kuru, to come.

With this auxiliary, in conjunction with the Gerund, are produced what are sometimes termed "Illative tenses," so called because they contribute a secondary idea of motion towards the speaker or the one spoken to, added to the primary idea; thus—

```
Mizu wo motte koi! | Having carried water, come! i.e. Bring some water.

O Youe wo youde koi! | Tell O Youe to come having-called here.

Doko ye itte kita? | Where has he been to?
```

Kitto kuru yō ni to
positively come manner in that
sō itte koi,
so having-said

Anata ni sodan shō
you with consultation will-do
to omotte kimashita,
thinking came

5. Shimau, to finish.

This auxiliary employed with the Gerund, serves to indicate the conclusion of an action, usually in the sense of ending by . . . ; thus --

Kashi wo tabete shimatta, cakes cating has finished

does not mean "He has finished eating the cakes," but rather "He has finished by eating the cakes." Similarly---

Shisho Sama ni natte shimaimashita, teucher Me to having-become has finished

does not mean "He has ceased to be a teacher," but "He has ended by becoming a teacher (after trying other professions, etc.)."

Examples.

TRANSI VE AND INTRANSITIVE VERBS.

Many verbs are used in English with a difference of signification, sometimes as transitives, sometimes as intransitives, as "he ran away," "he ran a needle into his hand," "the child speaks already," "he can speak several languages."

In Japanese, however, the transitive and intransitive applications are nearly always indicated by different verbs containing the same root; thus—

himster (Let Comi) to giviling himstern (and Comi) to be

Transitive.

Intransitive.

niraku (ist Conj.) <i>to civitise.</i> –	nırakeru	(200	Conj.) to be-
			ϵ	ome civilised.
kaesu	(1st) to return.	kaeru	(1st)	to return.
kakŭsu	(1st) ,, hide.	kakureru	(2nd) " hide.
naosu	(1st) ,, cure.	naoru	(1st)	" get well.
nobasu	(1st) "stretch.	nobiru	(2nd) " stretch.
oru	(1st) ,, break.	oreru	(2nd) ,, break.
orosu	(1st) ,, lower.	oriru	(2nd) "descend.
yaku	(1st) " burn.	yakeru	(2nd) ,, burn.
chirasu	(1st) " scatter.	chiru	(1st)	" scatter.
nekasu	(1st) " put to sleep.	neru	(2nd) " sleep.
dasu	(1st) " put out.	deru	(2nd) " go out.
akeru	(2nd) ,, <i>open</i> .	aku	(1st)	be oven.
hajimeru	(2nd),, <i>begin</i> .	hajimaru	(1st)	,, begin.
soroeru	(2nd),, match.	sorou	(1st)	", match.
tasŭkeru	. (2nd) ,, <i>save</i> .	tasŭkaru	(1st)	,, be saved.
tateru	(2nd),, set up.	tatsu	(1st)	,, stand.
susumer	${f 1(2nd)}, encourage.$	susumu	(1st)	", advance.
yameru	(2nd),, cease.	yamu	(1st)	" cease.
ireru	(2nd),, put in.	iru	(1st)	" enter.
sageru	(2nd) let down.	sagaru	(1st)	come down.

No rule can be framed for forming transitives and intransitives from a common root, and it is only from the dictionary, and by practice, that the student can tell whether a Japanese verb is transitive or not. It may, however, be observed that whilst the ending ern may belong to either form, the termination su belongs almost exclusively to transitives, a noteworthy exception being dasu which is sometimes intransitive as in the compounds hashiri-dasu, to run out, naki dasu, to begin to cry.

The student should also note that a large number of intransitives in the First Conjugation terminate in aru, as sagaru, to come down; todomaru, to stop; kakaru, to hang; etc. These are produced by adding aru, to be, to the stem, hence their intransitive force. Most of them have corresponding transitives in eru of the Second Conjugation, as sageru, to let down; kakeru, to hang; etc.

Passive and Potential Verbs.

In Japanese no special conjugation for the Passive Voice exists, and the paradigms of all the so-called passive verbs are in accordance with the First Form of the Second Conjugation of regular verbs given on p. 60. The change from the active to the passive is produced by affixing reru to the Negative Base of the First Conjugation and rareru to the same base of the Second; thus—

First Conjugation.

Shiru, to know,	(neg.) shira,	(pass.) shirareru, to l	w
Yobu, to call,	,,	yoba,	known. ,, yobareru, to b called.	ie
Korosu, to kill,	,,	korosa,	,, korosareru, to b	ie
Warau, to laugh,	"	warawa,	" warawareru, t be laughed at	

Second Conjugation.

First Form.

Taberu, to eat, (neg.) tabe, (pass.) taberareru, to be cuten.

Keru, to kick, ,, ke, ,, kerareru, to be kicked.

Eru, to obtain, ,, e, ,, erareru, to be obtained.

Second Form.

Miru, to see, (neg.) mi, (pass.) mirareru, to be seen.

Omonjiru, to esteem, ,, omonji, ,, omonjirareru, to be esteemed.

Iru, to shoot, ,, i, ,, irareru, to be shot.

Strictly speaking, however, there is no Passive Voice in Japanese, and the so-called passive termination areru is a condensed form of ari, being, blended with eru, to get, thus the literal meaning of shirareru, for instance, is "to get being knowing," and similarly mirareru is from the stem mi, a euphonic r, and ari eru, i.e. "to get being seeing."

Thus it is that all passive verbs belong to the Second Conjugation together with the verb eru, to get, and herein also lies the susceptibility of intransitives to passive forms, as, for example, okorareru, to be got ungry, i.e. to be made angry, from okoru, to get angry; shinareru, to have someone die (belonging to one).

A sentence illustrative of this idiom is *Teishi ni shinaremashita*. Here the literal meaning is "she was died by her husband," which at first sight appears to signify that "she was killed by her husband," but the real meaning is "she had her husband die," or "she lost her husband by death."

An idiom bearing a near resemblance to the so-called passive, is formed by the verb moran, to receive (more

politely itadaku, "to put on the head," referring to the native custom of lifting a gift to the brow) in conjunction with the Gerund; thus—

Kami wo kitte moratta, I got my hair cut. having-cut received Lwish you would kindly Oshiete itadakitai. tracking wish-to-put-on-the-head show me how. Dare ka Hiôgo made I want someone to go to soureme us fur-us itte moraitai. having-gone wish-to-receive I wish you would kindly Kiite itadakitö. heaving wish-to-receive Ane no menjo to yara mo I wish my elder brother's elder-brother passport watakushi made kayeshite passport, if that is what me 10 return. it is called, to be remoraitai. Invaced to me wish-to-receive

Note.—The foregoing sentences exemplify the method by which wishing is indicated in the Passive Voice, the Desiderative Adjective of passive verbs not appearing in the spoken form of the language.

The passive forms of the irregular verbs kuru, to come, suru, to do, and shinuru, to die, are korareru, serareru (sometimes abbreviated to sareru) and shinareru respectively. Masă, the polite termination, is not susceptible of the passive form.

As has been mentioned before, passive constructions are used much less frequently than in English, and in the majority of instances an intransitive verb or an active but subjectless construction is employed to render an English passive.

```
The following exemplifications will be found useful:—
  Donnani ureshi ka shiremasenu, \ I can't tell you how
  how-much joyful ! cannot-know
                                        pleased Lam.
  Hayaző to iu otoko, )
                         A man called Hayazō.
             san man
         shimai ni narimashitaro,
                                    \ It is probably.
  already finished
                   will-have-become
                                        finished by now.
  Sono kusuri wa ichi nichi
                                       That medicine is
        medicine
                    one day
                                         taken three times
    sando dzutsu nomu no desű.
    3-times
                   drink
  Kore wa nani ni
  this
           what for
                            What is this used for?
    tsukaimasŭ,
          ni narimasen, \ He is not to be depended
  reliance to becomes-not
                             unon.
  Dekinu toki wa shikata
                                 If it cannot be done, there
  not-can-do time
                    da-muaner
                                    is no help for it.
    ga nai,
       is-not
  Miògonichi made ni
                                 It will be finished by the
  day-after-next by
    deki-ogarimasů,
                                    day after to-morrow.
    is-finished
  Kono shina wo naoshi ni
                                 I think I will send this
        article
  this
                  mend
                                    article to be mended.
    varimashö,
    will-probably-send
  Sakuban sono kane wo
                                 I was to have been paid
  last night that money
                                   that money last night.
    uketoru hadzu deshĭta,

  Narō
            koto naraba.
                                 If it can be done.
  will-become thing if-it-be
                                 There is nothing which
 Shiyo koto ga nai,
 will-do thing
                 is-not
                                   can be done.
```

THE POTENTIAL VOICE.

Potentiality, that is having power to do a certain thing, is indicated by the same verbs as those by which passive significations are rendered, thus mirareru may mean either "to be seen," or "to be able to see"; okureru may mean either "to be put," or "to be able to put."

Note.—The one important deviation from this rule is the form omowarera from omou, to think, whose potential signification is not "to be able to think," but "to venture to think," "to be inclined to think."

Examples.

Kyō no atsusa wa,

to-day of heat I cannot endure the

koraeraremasen,
cannot-bear

Ikareru de arō ka?

Mazukŭte taberaremasen,
being-nasty cannot-cat

Moraware ya itashi-masenŭ,
can-accept do-not

Korareru ka kiite mimashō,

I will ask him if he can

Another frequently recurring method of expressing potentiality is the use of dekiru, a verb formed from the classical de-kuru, to come out. Dekiru has come to mean "possible," "to take place," "to be ready," but frequently it is best translated "can," "can do"; thus-

Iku koto ga dekiru, I can go.
Iku koto ga dekinai, I cannot yo.
Mabushikŭte, miru koto ga,
being-dazzling to-see dekimasen,
forthcomes-not I cannot see; the light
is so dazzling.

Kaneru, to be unable, cannot, attached to the Indefinite Form of a verb, is constantly used to indicate impossibility or inability, but the use of this construction is almost exclusively confined to persons of culture and refinement.

There is an extensive group of verbs which are in practice best translated by passive or potential constructions in English, although, properly speaking, they are intransitives in Japanese.

If we take such a sentence as "the bridge is being broken," we observe that the breaking is caused by the intervention of some external influence, whereas in the expression "the bridge is breaking," no such outer influence is implied. In the first case, the verb corresponds to the Japanese orareru, to get broken (passive, from oru, to break, transitive); in the second, to oreru, to break, intransitive. Thus from transitives belonging to the First Conjugation, are produced a large number of intransitives of the Second Conjugation, by changing the termination u into eru as exemplified in the following series:—

Intrans. Trans.

toreru, from toru, to take.
furueru, " furuu, to shake.
yakeru, " yaku, to burn.

oreru, from oru, to break.
kireru, ,, kiru, to ent.
ureru, ,, uru, to sell.
yomeru, ,, yomu, to read.

Kireru, urcru, yomeru, etc., are employed to render such expressions as "that wood cuts easily," i.e. "is easy to cut"; "this article sells readily," i.e. "is readily sold"; "that poem reads beautifully," i.e. "is beautiful when read."

In such constructions it is often convenient to introduce the word "can"; thus, "one can cut that wood easily"; "this article can be sold readily."

The student should carefully note the difference between the true potentials in arcru and rarcru, and the intransitives in cru. The latter forms denote the possession of strength or power to do anything such as is expressed by "can" in English, whilst with the true potentials is associated the notion of permission which is indicated by "may," thus ikarcmasŭ signifies "one can go" (because permission is granted), and ikemasŭ signifies "one can go" (because one possesses the physical ability, not being lame, etc.)

As verbs of the Second Conjugation are not capable of forming intransitives in *cru*, the passive potentials in *rareru* have to be utilised. The form **mieru**, *to seem*, *to be visible*, formed irregularly from **miru**, *to see*, should be noted.

THE VERB Suru.

The paradigm of this verb, which is probably the one most frequently heard, has been given on page 73. Its primary signification is "to do," "to make" (French, *juire*), and it is often used independently in this sense, the noun

governed by it taking the postposition wo, although the latter is in most cases dropped before suru; thus-

hon-yaku suru, to translate, to make a translation. chōai suru, to lore, i.e. to make lore. eshaku suru wo suru, to make an apology. ban wo suru, to keep watch. 's jisatsu suru, to commit (do) suicide. saisoku suru, to urge on (literally, to do urgency).

Omne do shimasă, What are you doing?

Sō suru to yokatta, It would hare been better to do
so do if was-good that.

At times instead of wo, the particle gu is employed with suru used independently, and the signification of the verb is then "to be"; as—

Zutsü ga suru,

There is a headache, i.e. I have a headache.

Hanshō no oto ga suru!

There is the firebell!

The most frequent use of *suru* is, however, that of supplying the place of a suffix to nouns of Chinese origin, and other uninflected words. The following are useful illustrations:--

shimpai suru, to be anxious, from shimpai, anxiety. kenkwa suru, to quarrel, ,, kenkwa, a quarrel. ryokō suru, to tracel, ,, ryokō, a journey.

tochaku suru, to arrive, "tochaku, arrival.

If the noun is *monosyllabic* and terminates in *n*, the *s* of *suru* in the verb formed with it assumes the uigori, and *suru* becomes *jiru*, which is made to conform to the paradigm of verbs with stems in *i* of the Second Conjugation. Thus from the combination of *suru* with *kin*, a word of Chinese origin signifying "prohibition," is produced the verb *kinjiru*, which is inflected like *ojiru* and not like *suru*.

This sometimes occurs even in cases where the termination is other than n.

Examples.

sonjiru, to spoil, from son, loss.
ronjiru, to argue, ,, ron, argument.
ōjiru, to correspond, ,, ö, correspondence.

THE EQUIVALENTS OF "to be."

To recognise the distinction between the numerous Japanese equivalents of the English verb "to be," and to employ them correctly, is one of the most bewildering tasks which the student has to encounter, and as it is impossible to attain a thorough knowledge of the language until a familiarity with such locutions is attained, the following suggestions and examples are offered with a view to minimising the difficulty:—

Aru, atta, arō, etc. These forms are mostly used with the signification "there is," "there was," "perhaps there will be," In many instances their meaning is conveniently rendered by "I (you, etc.) have, had, shall have," the subject in the Japanese construction being replaced by the object in English; thus...

Mizu ga aru, water there is I have (some) water.

If masā is affixed, as arimasā, arimashīta, arimashō, a politer signification is imparted. Still more respectful but identical in meaning are the forms gozaimasā, gozaimashōta, gozaimashō (cf. p. 78).

Used with a Gerund, however, arimasi, gozaimasii mean "to be" only, and not "there is"; as—

Kami ni tsutsunde arimasů, $\int It$ is wrapped up in paper in laxing-wrapped is $\int paper$.

This is also the case when gozaimasŭ has an adjective associated with it; as—

Yama ga takō gozaimasŭ, } The mountain is high.

The Certain Present of arn and of arimasn are seldom used in this connection accompanied by adjectives in the u or o form as the notion of "to be" is inherent in the adjective itself. Thus the last sentence would be, in a less respectful form, "Yama ga takai" (see p. 118).

De aru, de atta, de aro, etc. (Jamiliar).

De arimasŭ, de arimashĭta, de arimashō, etc. (politer).

De gozaimasŭ, de gozaimashĭta, de gozaimashō, etc. (politest).

These are forms of the verb "to be" without "there," and their signification is therefore simply "I am, he, she, it is," etc., and similarly throughout the conjugation.

Desŭ is an abbreviation of *de gozaimasă*; **deshĭta** of *de gozaimashĭta*, and **deshō** of *de gozaimashō*.

Examples.

Kore wa nan de aru (or da)? \ What is this?

Kore de mina desă ka, \ Is this all!

O-sawagi deshĭta, \ All was in an uproar.

Hiroi-totte kureta wa do pick-np-having-taken yave how in hĭto de atta, called mon was

Mazu sore-kkiri de gozaimasă, \ Well, that is about well that-only il (is) \ \ all.

Iru and Oru. The real signification of these verbs is "to dwell," "to live," "to be (in a certain place)," but they are employed mostly as auxiliaries, as explained on p. 93.

Naru, to be, appears more frequently in the classical language than in the colloquial, although it is not rare to hear the Couditional Form used as an auxiliary with the Indicative tenses of verbs. Thus iku nareba or iku nara, for "if he goes," are more common than ikeba, and similarly we may say itta nareba or itta nara, for "if he went" or "had gone," instead of ittareba.

N.B.—Naru, to be, should be carefully distinguished from naru, to become, which latter may usually be recognised by its being preceded by the postposition ni or to; as—

Chiri tsumotte, yama to navu, \(\right) Dust \(\rho iled up\) becomes a dust \(\rho iling up\) monutain becomes \(\right) \) monutain (Proverb). Shindai-kagiri ni natta, \(\line become benkrapt\).

Suru, to do, is at times employed as an equivalent of "to be" (see p. 104).

Causal or Causative Verbs.

In Japanese there are large numbers of phrase-verbs denoting causation of action, e.g. "causing to eat," "causing to read," etc. These causal verbs, or causative verbs, as they are sometimes termed, are formed by the addition of seru to the Negative Base in verbs of the First Conjugation, and by the addition of saseru to the same base in the Second. Many causals are better translated by different words in English, as shiru, to know, causative shiraseru, to inform, i.e. to cause to know.

Examples of Causals.

First Conjugation.

Neg. Base. Causal.

yomu, to read, yoma, yomaseru, to cause to read. shiru, to know, shira, shiraseru, to cause to know. tsukuru, to make, tsukura, tsukuraseru, to cause to make. Second Conjugation.

First Form.

Neg. Base. Causal.

eru, to obtain, e, esaseru, to cause to obtain, i.e.

to give.

taberu, to eat, tabe, tabesaseru, to cause to eat, i.e. to feed.

Second Form.

miru, to see, mi, misaseru, to cause to see. abiru, to bathe, abi, abisaseru, to cause to bathe.

The conjugation of all Causals is in accordance with that of the First Form of the Second Conjugation given on p. 60, and they are, in common with other verbs, susceptible of the passive voice: thus—

Causal. Passive.

shiru, to know, shiraseru, to cause to shiraserareru, to be know. caused to know.

eru, to obtain, esaseru, to cause to esaserareru, to be obtain.

miru, to see, misaseru, to cause misaserareru, to be to see. caused to see.

It must be noted that although there are passive forms of causals, no causal forms of the passive are employed. Thus such constructions as "to cause to be seen," "to cause to be eaten," are inadmissible; the corresponding active being used instead. A sentence like "I will let some books be brought (i.e. I will cause [somebody] to bring some books)" will therefore be changed before translating into "I will cause some books to come," and similarly with other like phrases.

It should also be noted that the causals in seru and the transitives in su (First Conjugation) are used indiscriminately. Thus the same speaker will use matashite (from

matsu, to wait) at one time, and matasete at another, though the former word is, strictly speaking, the correct one.

Causal verbs possess various slight divergencies of signification, and their English translation must therefore vary according to circumstances. For example, naosaseru (from naosus to mend) may be translated "to cause to mend," "to make . . . (e.g. a servant) mend," "to allow to mend," or "let . . . mend."

In phrases containing Causals the postposition ni is associated with the substantive which denotes the one caused to perform the action, whilst the postposition no accompanies the substantive denoting the person or thing acted upon.

The Causals of the Irregular verbs kuru, shinuru, and suru are respectively kosaseru, to cause to come; shinaseru, to cause to dic; and saseru, to cause to do.

Examples.

Sugu ni kikashite kudasai. \ Please let me know causing to-loar condescent at once. Inu ni niku kuwaseta ka, Did you give the dog meat made-cut dog its meat? Shizuka ni sasenakereba. You must make quiet them keep quiet. ikenai. I have kept you Taihen ni o matase moshita. waiting a dreaddreadfully. ele-to-mail fully long time. It will be as well Ima onna ni ii-tsükete heva to get the woman now woman communding room no soji wo saseru to come and clean cleaning cause-to-do is-yood the room. Havaku kikasete kudasare, APlease let me quickly having-made-hear give hear quickly.

Ambiguous Verb-forms.

It will be observed that in the First Conjugation a large number of verbs have stems terminating in r, and that the same letter also appears in two of the bases (Certain Present and Conditional) in verbs of the Second Conjugation. Owing to this fact beginners are often at a loss to know to which Conjugation a certain verb, e.g. teru, to shine, belongs. Nothing but a thorough mastery of the rules which have been fully set forth in preceding pages relating to the formation and uses of verb-forms can furnish the student with the ability to at once discriminate with accuracy in such cases, and if the remarks and examples in the preceding sections have been carefully followed he would immediately assign the above-mentioned verb- teru—to the First Conjugation, as the stem is ter, the Indefinite Form teri, and the Negative Base tera. In like manner, the verb makeru, to lose, will be recognised as belonging to the Second Conjugation, because the r in this case is part of the termination and not of the stem. Similarly shir-u, to know, is of the First Conjugation, whilst mi-ru to see, is of the Second.

A still further degree of difficulty is presented by such pairs of verbs as kaeru (First Conjugation), to return, and kaeru (Second Conjugation), to change; kiru (First Conjugation), to cut, and kiru (Second), to wear; and until some material progress has been made in the language, it will be found difficult to distinguish readily all the forms of, say, kakaru, to hang (intransitive), from those of kakeru, to hang (transitive).

The differences existing between the various verbal forms in instances such as those just referred to are clearly and concisely demonstrated in the paradigms appearing on the opposite page. The three verbs shown are all in common use. They are—

Iru (First Conjugation; stem ir), to enter, to go in.

Ireru (Second Conjugation, First Form; stem iv), to insert, to put in.

Iru (Second Conjugation, Second Form; stem i), to be, to dwell.

COMPOUND VERBS.

The Japanese language is very rich in verbal combinations which partake more or less of a compound character, and these verbal compounds serve in many cases as equivalents for English prepositional verbs, but in others they replace complete phrases; thus—

buchi-korosu, to kill by beating (from butsu, to beat, and korosu, to kill.)

mi-tsükeru, to fix by seeing, i.e. to notice (from miru, to see, and tsükeru, to fix.

In the majority of instances such compounds are formed by using certain verbs as affixes to other verbs and the meaning of the verb employed as an auxiliary is frequently lost, the basal verb receiving merely an increase of force from the association.

In compounds consisting of two verbs in juxtaposition, the first component is put in the Indefinite Form, which remains unchanged, whilst the second component is inflected throughout the Conjugation.

Usually the second component is modified adverbially by the first, as in **kiri-korosu**, to kill by cutting, where kiri (from kiru, to cut) denotes the mode of action of **korosu**, to kill.

In some cases, however, each member of the compound contributes its own particular meaning as in **wake-ataeru**, to give in shares, from "to divide" and "to give."

The verbs of most frequent recurrence as second members of compounds are—

1 Dasu.

This usually denotes the action of commencing, coming out or taking out; as-

okoru, to get angry,

naku, to cry,

furu, to fall (of rain,

snow, etc.),

hashiru, to run,

tsukuru, to compose, to grow,

omou, to think, toru, to take,

okori-dasu, to begin to get angry.

naki-dasu, to begin to cry.

furi-dasu, to begin to rain.

hashiri-dasu, to run out.

tsŭkuri-dasu, to produce, to bring forth.

omoi-dasu, to recall to mind. tori-dasu, to take out.

2. Kiru.

The literal meaning of this verb is "to cut," but as the second member of a compound it usually denotes completeness or totality; as-

kariru, to hire,

kari-kiru, to hire the whole (of a building, etc.).

kau, to huy,

kai-kiru, to buy up the lot (of goods, etc.).

shimeru, to shut up,

shime-kiru, to shut up completely (a shop for alterations, etc.).

omou, to think,

omoi-kiru, to decide finally.

Komu.

This verb has the sense of the English "in" or "into"; thus---

tobu, to jump,

tobi-komu, to jump in.

furu, to fall,

furi-komu, to come in (said of rain, snow, etc., coming into a house).

kiru, to cut, agaru, to rise, kiri-komu, to cut into.

agari-komu, to force a way up into.

4. Sokonau.

This implies failing to do something, or just escaping something; thus-

kiku, to hear, kiki-sokonau, to fail in hearing, i.e. to hear wrongly.

miru, to see, mi-sokonau, to fail in seeing, i.e. to see wrongly.

kaku, to write, kaki sokonau, to fail in writing, i.e. to make an error (in writing).

shinuru, to die, shini-sokonau, to fail in dying, i.e. to burely escape death.

5. Tsükeru.

Tsukeru means literally "to fix," "to affix"; hence-

iu, to say, ii-tsükeru, to fix by saying, i.e. to command.

kaku, to write, kaki-tsükeru, to fix by writing, i.e. to jot down.

kiku, to hear, kiki-tsükeru, to fix by hearing, i.e. to happen to hear.

miru, to see, mirtsükeru, to fix by seeing, i.e. to notice.

tataku, to knock, tataki-tsükeru, to fix by knocking, i.e. to knock on.

THE ADJECTIVE

In Japanese, the words and locutions employed to describe, limit or define the significations of substantives differ considerably in construction and modes of use from those fulfilling similar functions and termed "Adjectives" in Western languages. Thus Japanese adjectives ignore all distinctions of number and gender, as well as the ideas

denoted in English by the degrees of comparison. They have, however, inflectional forms, which, so far as they extend, are almost identical with those of verbs.

I. Primary Inflections.

The crudest and most elementary form of the adjective is what may be termed the "Stem." From the Stem by the agglutination of affixes are produced the various adjectival words and phrases which are used as simple adjectives, adverbial adjectives, and verbal adjectives; thus -

(a). By adding i to the Stem, the simple adjective is produced, and this form is both attributive and predicative, being employed either attached directly to a substantive or else at the end of a phrase, with the English verb "to be" understood. For example, from the Stems Juka and atsu are formed the simple adjectives fukai, deep, and atsui, thick, which may be used thus :-

Attributive.

Predicative.

Fŭkai kawa, a deep river.

Kawa ga fŭkai, the river is deep.

Atsui kami, thick paper.

Kami ga atsui, the paper is thick

N.B.—In predicative phrases like the two above, ga must not be regarded as corresponding to the word "is." It is a particle serving approximately to indicate the nominative case (see p. 36).

The terminal i of the adjective in the attributive relation is a contraction of a somewhat obsolete form in ki. The complete syllable is still retained in formal speeches and in some proverbs, as for instance in

Furuki wo tazunete, atarashiki,
Old (things) studying new (things)
wo shiru,

New things are
learned by studying the old. knows

The attribute form in ki is also used in the words gotoki, similar, like, and in the termination beki.

The terminal *i* of the adjective in the *predicative* relation is a contraction of an archaic form in *shi*. In some phrases the complete syllable is still in use; thus—

```
Yoshi! Yoshi! All right! (literally, is good, is good).

Kurasa wa kurashi! darkness (it is) dark

Kizukai nashi, is-not 

All right! (literally, is good, is good).

It is dark (and no mistake)!

There is no cause for alarm.
```

When employed attributively the adjective is sometimes accompanied by the postposition *no* which serves to convey the idea of the English indefinite pronoun "one." In this connection *no* is probably an abbreviation of **mono**, thing; thus—

```
Warui no,
A bad onc.

Akai no,
A red onc.

Akai no bakari aru,
red only is

There are only red ones.
```

Examples of the Attributive and Predicate uses of Adjectives.

```
Awoi kao.
     Tuce
Yoi onna,
Warni no da,
                      It is a bad one.
buil
     one is
Samui koto!
cold thing
                     The weather is fine.
Tenki wa voroshi,
weather
           is-good
                      The rope is long.
Nawa ga nagai,
rope
         is-long
```

(b). By adding ku to the Stem there is produced a form which is employed in cases where a verb other than aozaimasŭ follows. This form is also used as an adverb corresponding very often, though not invariably, to an English adverb in "ly." When adverbial it is followed by the verb which it modifies.

Examples.

Yoku dekita, $\}$ It is made well. well Kawa ga fukaku miemasu, | The river looks deep. Yasuku dekimashita, — It is made cheaply. Hayaku kite kudasai, \ Please come quickly. anickly

(c). When gozaimasŭ is used a form of the adjective in o or u is employed, this form being deduced from that in ku by first discarding k and then combining into one syllable the final vowel of the stem and the u remaining from ku. In cases where the adverbial form of an adjective terminates in iku the k is rejected, but no further change is made.

Examples.

```
nagaku (from nagai, long) becomes nagar, and then nago
yoroshiku ( ,,
              voroshi, good)
                                   noroskin,
                                                    noroskiù.
hiroku
              hiroi, wide)
                                   hiron
         į ..
                                                    hirō.
              yasui, cheap)
yasuku
                                  nasim
                                                    บตรนี.
    Kawa ga fukô gozaimasů, The river is deep.
    Kono hon wa goku tako
                               This book is very dear.
       gozaimasu.
     Kami ga atsū gozaimashō, The paper is probably thick.
     Mada hayō gozaimasenŭ ka, } Is it not early yet!
     yet
```

The student should note that the verb "to be" is affected equally with other verbs by the rule by which a verb must be preceded by the form in kn, so that it is quite allowable to say, for example:

```
Ano kawa ga fukaku

thet river deep
gozaimasü,

Kami ga atsuku
gozaimashö,

That river is deep.

The paper will probably be
thin.
```

The use of the adverbial form is governed by a Rule somewhat analogous to that given for the employment of the Indefinite Form of verbs (p. 80). This rule is generally followed only in set speeches, and by pedantic speakers, and is as follows:—

"Where in English two or more adjectives are coupled together by the conjunction 'and' (expressed or understood), all but the last assume the adverbial form in ku:" thus—

```
Ano utsukushiku chisai

pretty little
kodomo,
child

Kami no ke ga kuroku,
head of hair black
me ga akai otoko,
eyes brown man

That pretty little child.

A man with black hair
and brown eyes.
```

It should be observed, however, that the foregoing rule is now rarely heeded in conversation, the sentence generally receiving some other construction; thus—

```
Hako mo yoroshikereba,
also whereas-is-good
nedan mo yasui,
price also (is) cheap
```

It will have been observed that the adjectival inflections are all affixed to stems terminating in one of the vowels a, i, o or u, no stems in e being found in modern Colloquial. In a few instances this stem is used alone, as, for example, Shiro, White (a dog's name), and in one or two phrases such as—

Makkuro ni natta, It has become perfectly black. Naga no toshi tsuki, Long months and years.

The stem is used most frequently in helping to form compounds; as—

Aka-gane, copper, from akai, red, and kane (nigoried), metal.

Shiro-kane, silver, ,, shiroi, white ,, kane.
Hoso-nagai, slender, ,, hosoi, narrow ,, nagai, long.
Nagasaki, "long-cape" (the name of a place) from nagai, and saki, a cape.

From a consideration of the foregoing principles it is now possible to formulate a table of the primary adjectival inflections in modern colloquial use, and as illustrations we have chosen the adjectives **nagai**, long; **yoroshii**, good; **hiroi**, wide; and **furui**, old, i.e. one for each of the four vowels a, i, o, u with which, as has been mentioned before, adjective stems terminate.

Stem.	Simple Adj.	Adverbial Form.	Predicate with "to be."
long, naga, good, yoroshi,	nagai, yoroshii,	nagaku, yoroshĭku,	nagō. yoroshiū.
wide, hiro,	hiroi,	hiroku,	hirō.
old, furu,	furui,	furuku,	furū,

II. SECONDARY INFLECTIONS.

In addition to the primary inflections just discussed, the adjective has tense and mood inflections like true verbs. These secondary inflections are produced in most cases by affixing various forms of **aru**, to be, to the adverbial form in ku, certain orthographical modifications, chiefly phonetic, occurring as will be observed from a comparison of the following table with the paradigm of the First Conjugation, to which aru belongs. The Imperative forms are not inserted, as they are never heard in practice.

Furui, old.

INDICATIVE MOOD.

Certain Present or Future.

furui,
(Polite form), furu, gozaimasu, } is old, or will be old.

Probable Present or Future.

furukarō, \ \ probably is old, probably (Polite), \ furū gozaimashō, \ \ \ ably will be old.

Certain Past.

 $\left. \begin{array}{cc} & \text{furukatta,} \\ \text{($Polite$),} & \text{furu gozaimashita,} \end{array} \right\} was old.$

Probable Past.

Frequentative Form.

furukattari, being sometimes old.

Gerund.

furukŭte, being old.

SUBJUNCTIVE MOOD.

(a) Conditional.

Present.

furukereba,

if (it) is old.

Past.

furukattara(ba),

if (it) had been old.

(b) Concessive.

furukeredo(mo),

though (it) is old.

III. NEGATIVE ADJECTIVES.

A highly important and frequently used adjective is that termed "the negative adjective nai" whose real signification is "non-existent." It is generally employed as an equivalent for the negative conjugation of aru, to be, and also at times to render the notion of the English preposition "without."

The inflections of mai are shown in the following table.

Primary.

Attributive: nai. Predicate: nai (rarely nashi).

Adverbial: naku.

N.B.—The contracted form $u\bar{u}$ is not in ordinary use.

Secondary.

INDICATIVE MOOD.

Certain Present or Future.

nai, is not, or will not be.

Improbable Present or Future.

nakaro, probably is not or will not be.

Certain Past.

nakatta,

was not.

Improbable Past.

nakattarö,

probably was not.

(And so on, through all the forms shown in the paradigm of adjectives on p. 121.)

Affixed to the adverbial form of adjectives, *nai* serves to produce their negative conjugation; thus—

INDICATIVE MOOD.

Certain Present or Future.

furuku nai,

is not old, will not be old.

Improbable Present or Future.

furuku nakaro,

probably is not, or will not be old.

Certain Past.

furuku nakatta, was not old.

Improbable Past.

furuku nakattaro, probably was not old.

(And so on through the remaining tenses and moods.)

In polite intercourse, however, for the negative conjugation in *nai* there is usually substituted another with the verb **gozaimasen**, *not* to be; thus—

Certain Present or Future.

furū gozaimasen, is or will not be old.

Improbable Present or Future.

furū gozaimasumai, probably is not or will not be old.

(And so on through the remaining tenses and moods.)

N.B. Care must be taken to distinguish adjectives in the negative form from positive adjectives like, e.g., abunai, dangerous, which happens to terminate in nai. The negative of abunai is abunaku nai which follows the paradigm in the preceding table, and similarly with sükunai, scarce; kitanai, dirty; etc.

Examples of Adjectival Inflections.

Amari muzukashi, | It is too difficult. too is-difficult Go tsugō ga o warukereba,

convenience if-is-bad
o yoshi nasaimashĭ,

lf it is not convenient,
please don't do it. Wakaranai. Kurokute yoroshi, \ Its being black is concenient. If it is fine to-morrow, I will come. Mionichi tenki ga. to-morrow weather yoroshĭkereba mairimasŭ, If he does not know, I will make enquiries. Shiranakereba sensaku if-not-know enquiry shimashò. will-do Abunakeredo shikata Though dangerous, it can-not be helped. though-dangerous ga nai, It is so cold I cannot endure it.

Some must be bought at once. Samukŭte tamarimasenŭ. being-cold (cannot) endure Sugu ni kawanakute at-once not-buying narimasenŭ. does-not-do

IV. COMPOUND AND DERIVED ADJECTIVES.

This class is very numerous. They are formed mostly upon definite principles and as their meanings can be easily obtained from the dictionary a few only of their leading characteristics need be discussed here.

I. A number of derived adjectives are produced by affixing to substantives the termination rashii (literally, "like" or "appearance") which corresponds to the English terminations -ish and -ly; as—

otoko, man, otoko-rashii, like a man, i.e.
manly.
hontő, truth, hontő-rashii, like the truth, i.e.
truth-seeming.
baka, fool, baka-rashii, foolish.

II. Substantives followed by the postposition *no* serve as adjectives; as—

kin, gold, kin no, of gold, i.e. golden.
makoto, truth, makoto no, of truth, i.e.
truthful, true.
gwaikoku, foreign parts, gwaikoku no, foreign.

konaida, a short while ago, konaida no, recent.

Furansu, France,

Furansu no, of France, i.e.

French.

III. Some adjectives are produced from nouns by affixing to the latter the syllable *na*, which is an abbreviation of **naru**, to be, and which must be distinguished from **naru**, to become; thus—

muda, uselessness, muda na, useless.
baka, fool, baka na, fool-being, i.e. foolish.
shizuka, quiet (noun), Shizuka na, quiet (adj.).
akiraka, bright ,, akiraka na, bright ,,

Belonging to this class are a large number of words which are produced by agglutinating sō, appearance, to the stems of simple adjectives or to the Indefinite Form of verbs; thus—

oishii, nice to eat, oishisō na tasty.
omoshiroi, interesting, omoshirosō na, interesting looking.
aru, to be, arisō na, likely to be, in
existence probably.
ochiru, to fall, ochisō na, likely to fall.

IV. Many locutions are in use, consisting chiefly of substantives (and indefinite verbal forms used as such) followed by no, a/, and a simple adjective, as ashi no hayai (literally, "quick of foot"), swift. Examples of these are—

ishi no õi, abounding of stone, i.e. stong.
me no chikai, near of eye, i.e. short-sighted.
iji no warui, bad of spirit, i.e. ill-tempered.
mimi no tõi, distant of ear, i.e. deaf.
wakari no hayai, quiek of understanding, i.e. quiekwitted.

V. Not infrequently present and past forms of verbs are in practice employed adjectivally. Thus dekiru and dekinai signifying "able to do" and "not able to do," when employed as adjectives, serve to render the English "possible" and "impossible." The following are exemplifications:

mieru, to appear, hence visible.
yomeru, reads (intrans.), , legible.
shireta, was knowable ,, self-evident.
fŭtotta, has become fat ,, fat.
choito shita, did slightly, ,, slight.

tsumi no aru, is of guilt—hence—guilty.
aita, has become open, ,, open.
tai shita, did great, ,, important.
nakereba naranai (lit. if it is not, won't do), hence,
indispensable.

ki no kiita (lit. spirit of, was efficacious), hence, sharpwitted.

These examples are all attributive in form, but most of them may be used predicatively at the end of a phrase. In such connections, however, ga must be substituted for uo, and the simple past tense in ta must be replaced by the compound present in . . te ira (p. 93); thus—

Needless to mention, the polite inflection in masi may always be substituted for the simple verb. Except when addressing inferiors, this substitution invariably takes place; thus the preceding examples would become, in polite conversation: Komo daiku wu, ki gu kiite imasu (or orimasu), and Sono hito wa futotte imasu (or orimasu).

N.B.—Adjectives of this class terminating in *shita* (as *choito shita*) are never employed predicatively.

V. Comparison of Adjectives.

In English the degrees of comparison are expressed by the terminals in -er and -est, or by a succession of auxiliaries of relation—"more," and "most," but in Japanese the adjective undergoes no change of form for this purpose, the idea being conveyed in the following ways:-

(a) Comparative Degree.—Two things only, being compared, that with which the comparison is made is marked by the postposition yori, than; thus--

Iku yori wa ikanai,
going than not-going It is better not to go than
hō ga yoroshi, to go. side

Frequently in sentences similar to the first quoted above, the first part is discarded if no ambiguity is occasioned thereby; thus, anata wa o oku gozaimasu, you are the bigger, or anato no hō ga o okū gozaimasū, your side is big.

In negative sentences hodo (literally, "quantity," "amount") is substituted for yori; thus-

The fact that a certain thing possesses a given quality or attribute in a greater degree than another thing is sometimes expressed by such adverbs as motto, more, or nao, yet, still, as motto nagai, more long, i.e. longer, still longer; nao takai, get dear, i.e. dearer, still dearer.

Examples. Sore wa nao yoroshiu That is still better. \ Please make it a little still good that gozaimasŭ, Motto o make nasai,

more cheapen deign

To express "the" with a repetition of the comparative, the word *hodo* is employed; as—

$$\begin{array}{ccc} \text{Mijikai hodo} & \text{wa, yorosh,} \\ \textit{short} & \textit{amount} & \textit{is-good} \end{array} \right\} \ \textit{The shorter the better.}$$

(b). Superlative Degree. To denote the extreme degree of quality, such words as ichi-ban, number one, and dai ichi, first, principal, are employed; as—

```
Kore wa ichi-ban nagai,

this no. 1 is-long

This is the longest.

Kore ga ichi-ban sŭki da,

I like this best.
```

Various other locations are used to convey the idea of the Superlative among which are those with the words uchi and naka (literally, among, in); as—

```
Yotsu no uchi ni kore wa,

four among the
ichiban kirei de,
no. 1 pretty
gozaimasū,

Naka ni sore wa takai,
among that is high

This is the prettiest of
the four.

Thut is the highest.
```

Very frequently, however, the first part of sentences similar to the above, is discarded, thus when making an enquiry as to prices, a Japanese will not say "which is the cheapest," but "which is cheap" (dochira qu qusui), meaning "which is cheap as compared with all the others."

NUMERALS. METHODS OF COMPUTATION.

I. CARDINAL NUMERALS.

In Japanese the methods of enumeration and computation are much more complicated and lengthy than in most European languages. Usually in grammars of the latter tongues the treatment of numbers is discussed in connection with the adjective, but in Japanese, numerals are rather substantival in character although owing to various characteristics peculiar to themselves they are generally regarded as forming a separate part of speech.

Two series of numerals are in use, one of Japanese origin and the other borrowed from the Chinese. Except in a few compound words the Japanese group are now obsolete for the numerals above ten. Those remaining in common use are:—

1.	Hitotsu.	6.	mutsu.
2.	fŭtatsu.	7.	nanatsu.
3.	mitsu.	8.	yatsu.
4.	yotsu.	9.	kokonotsu
5	itantan	10	tō.

These ten numbers may be used (a) quite independently; (b) following a noun; or (c) followed by the postposition no preceding a noun. They are seldom placed before a noun without no being inserted between. Thus—

```
Ikutsu gozaimasŭ ka,
how-many are (there)
Mitsu,
Mono fŭtatsŭ,
(m) Futatsŭ no mono,
Yotsu bakari, kudasai,
four about condescend

How many are there!

Three.

Two things.

Please let me have four
```

The termination tsu is rejected before nouns of Japanese origin and in compounds; thus—

Mi-hako,	Three boxfuls.
Yo-hako,	Four boxes.
Fŭta-ban,	$Two\ nights.$
Mi-tsutumi,	Three parcels.

The Chinese group of numerals is:---

1.	ichi.	5.	go.	9.	ku.
2.	ni.	6.	roku.	10.	jũ.
3.	ŝan.	7.	shichi.	100.	hyaku.
4.	shi.	8.	hachi.	1,000.	sen.
•		10.000	man or l	nan.	

Ichi is also used to signify "whole, all," as ichi ni one day: all day long.

Ni is often replaced by $ry\bar{o}$, both, as $ry\bar{o}$ san nin, two or three people.

The higher numbers are expressed by combinations of the first ten Chinese numerals; thus—

11. jū-ichi.	31.	san-jū-ichi,
12. jū-ni.		etc.
13. jű-san.	40.	shi-jù.
14. jū-shi.	50,	go-jú.
15. jü-go.	60.	roku-jú.
16. jü-roku.	70.	shĭchi-jü.
17. jū-shĭchi.	80.	hachi-jū.
18. jű-hachi.	90.	ku-ju.
19. jú-ku.	100.	ip-pyaku (<i>for</i> ichi hyaku).
20. ni-jū.	200.	ni-hyaku.
21. ni-jū-ichi.	300.	sam-byaku (tor san hyaku).
22. ni-ju-ni.	400.	shi hyaku.
23. ni-ju-san.	500.	go-hyaku.
24. ni jū-shi.	600.	rop pyaku (<i>for</i> roku hyaku).
25. ni-ju-go.	700.	shichi-hyaku.
26. ni-jū-roku.	800.	hap-pyaku (Jor hachi hyaku).
27. ni-jū-shǐchi.	900,	ku-hyaku.
28. ni-jū-hachi.	10,000.	ichi-mau.
29. ni-jū-ku.	100,000.	jū-man.
30. san-jū.	1,000,000.	hyaku-man.

105 is hyaku go. 473 is shi-hyaku shĭchi-jū-san. 1898 is is-sen hap-pyaku ku-jū hachi.

The first ten of the Chinese numbers are only used independently, and to precede uncompounded or monosyllabic nouns derived from the Chinese; as ichi-nen, one year; san-gin (for sau-kin) three pounds; sam-byaku (for san-hyaku) three hundred.

The orthographical modifications which occur will be best understood from the examples on p. 133 et seq.

In many contexts the Japanese numeral **yo**, *four*, is substituted for the Chinese *shi* as the latter is regarded as unlucky because it also means "death"; as—

yo-nin, four persons (instead of shi-nin, which means "dead person," i.e. "corpse").

ni-jū yo-ban, number 24.

Similarly the Japanese nana, secen, is sometimes substituted for the Chinese shichi as the latter is easily confounded with shi, four; thus—

nana-jis-sen, secenty cents.

II. AUXILIARY NUMERALS.

We have seen that in some cases the numeral is joined directly to the noun, e.g. futa hako, two boxes; ichi-nichi, one day. It is, however, very seldom that the numbers are thus used, and in enumerating objects the Japanese generally reckon them as so many things of a certain species or class, the substantive being placed first, the number and class following. For example, the word "pencil" will come under the category of the cylindrical

class of objects which includes pencils, pens, poles, and the like, and for this group the class-name or "auxiliary numeral," as it is termed, is "hon." Thus in rendering "five pencils" we should say "pencil five cylindrical class," and translate by

fude go hon.

pencil five cylindrical class.

Similarly, the auxiliary numeral for *flat*, *broad things* such as *sheets of paper*, *plates*, *coins*, etc., being "mai" we shall translate "one sheet of paper" by

kami ichi mai.
paper one flat class.

This peculiarity is somewhat analogous to the English idiom illustrated in such expressions as "three pairs of shoes," "a hundred head of cattle," "two brace of pheasants," "one yoke of oxen," etc.

The following scheme shows the principal auxiliary numerals now in use, with the phonetic modifications which occur when they are combined with the numbers.

Cho, for things with handles, such as tools, guns, jinrikishas:

- 1. it-chô
 4. shi-chô
 7. shichi-cho

 2. ni-chô
 5. go-chô
 8. hat-chô

 3. san-chô
 6. roku-chô
 9. ku-chô
 - 10. jit-chö

Hai, for cupfuls, glassfuls, and bowlfuls of any liquid:

- 1. ip-pai 4. shi-hai 7. shichi-hai 2. ni-hai 5. go-hai 8. hachi-hai 3. sam-bai 6. roku-hai 9. ku-hai
 - 10. jip-hai

Hiki, for most animals (excepting human beings and birds); also for certain quantities of textile materials and sums of money:

- 1. ip-piki
- 4. shi-hiki
- 7. shichi-hiki

- 2. ni-hiki 3. sam-biki
- 5. go-hiki
- 8. hachi-hiki
 9. ku-hiki

- 3. sam-biki
- 6. rop piki 10. jip-piki

Hon, for cylindrical things such as pencils, pillars, posts, masts:

- 1. ip-pon
- 4. shi-hon
- 7. shichi-hon

- 2. ni-hon
 3. sam-bon
- 5. go-hon6. rop-pon
- 8. hachi-hon 9. ku-hon

- 1/
 - 10. jip-pon

Ken, for houses, and buildings in general:

- 1. ik-ken
- 4. shi-ken
- 7. shichi-ken

- 2. ni-ken
- 5. go-ken6. rok-ken
- 8. hachi-ken 9. ku-ken

- 3. san gen
- 10. jik-ken

Mai, for flat objects such as sheets of paper, plates, coins, clothing:

- 1. ichi-mai
- 4. yo-mai
- 7. shichi-mai8. hachi-mai

- 2. ni-mai 3. sam-mai
- 5. go-mai6. roku-mai
- 9. ku-mai
- 10. jū-mai

Nin, for human beings:

- 1. ichi-nin
- 4. yo-nin*
- 7. shichi-nin

- 2. ni-nin
- 5. go-nin
- 8. hachi-nin

- 3. san-nin
- 6. roku-nin 10. jū-nin
- 9. ku-nin
- * See p. 132.

So for boats, and vessels generally:

 1. is-sō
 4. shi-sō
 7. shichi-sō

 2. ni-sō
 5. go-sō
 8. hachi-sō

 3. san-zō
 6. roku-sō
 9. ku-sō

10. jis-sõ

Soku, for pairs of boots, sandals, clogs, socks:

 1. is-soku
 4. shi-soku
 7. shichi-soku

 2. ni-soku
 5. go-soku
 8. hachi-soku

 2. san-zoku
 6. roku-soku
 9. ku-soku

 10. jis-soku

Wa, for birds, and bundles (of wood, etc.):

 1. ichi-wa
 4. shi-wa
 7. shĭchi wa

 2. ni-wa
 5. go-wa
 8. hachi-wa

 3. sam-ba
 6. rop-pa
 9. ku-wa

 10. jip-pa

Note. -Roku-wa is sometimes used for rop-pa.

For "volumes" of a book the auxiliary is *satsu*, but for complete copies of a work, regardless of the number of volumes in it, it is *bu*.

It will be observed that all the foregoing examples of auxiliary numerals are Chinese, with the exception of wa which has been inserted because it invariably has associated with it the Chinese numerals ichi, mi, etc.

The native auxiliary numerals are comparatively few in number, the only ones calling for notice being:

Hashira, for Shintō deities.

Kabu, for shrubs.

Kumi, for sets of things like toys and clothes.

Ma, for rooms.

Mune, for ridge-like things such as houses, haystacks.

Suji, for line-like things such as rivers, roads.

Soroe, for suits of clothes, armour.

The Japanese numbers below eleven are used to precede the above native auxiliaries; thus

fita-hashira; hito-soroe; mi-ma.

From cleven upwards the Chinese numbers are used, without any phonetic modifications taking place; thus

jū-ni-hashira; ni-jū-soroe; shi-jū-ma.

The Japanese forms *hitotsu*, *fūtatsu*, etc., are employed to enumerate objects to which no special auxiliary numeral has been assigned.

In the Classical form of the language the Japanese numbers are employed to enumerate rational beings, and when thus used, the numbers have affixed to them the syllable *turi*, the origin of which is unknown. In the Colloquial, of these words only the following are retained:

hítori(for hito-tari)one person.fútari(for fúta-tari)two persons.yottarifour persons.

The Chinese synonyms of these (i.e. ichi-nin, etc.,) are also used, but less frequently.

Examples (Auxiliary Numbers).

Ko-gatana ni-chō, Two pen-knives.

Suzume ni-wa, Two sparrows.

Maki sam-ba, Three bundles of wood.

Hon go-satsu, Five volumes (of a book).

Gunkan jis-sō, Ten men-of-war.

Mizu ip-pai kudasai, Give me a glass of water.

Kuruma it-chō wo kaitai, I wish to buy a 'riksha.

Kutsu is-soku utte kudasai, Sell me a pair of boots.

Mekura sen-nin, me-aki
blind 1000-persons eye-open
sen-nin,
1000-persons (are)

For every thousand blind,
there are a thousand
who can see (Proverb).

III. ORDINAL NUMERALS.

The Ordinals are formed by adding me to the Japanese, or ban(bamme) to the Chinese cardinal numbers. The word dai may also be prefixed and bamme added, or dai may be prefixed with no addition, to the Chinese numerals. When preceding a noun, all these forms assume the postposition no; as—

ichi-ban,
ichi-bannne,
dai-ichi,
dai-ichi-ban,
dai-ichi-bannne,
futatsu-me,
ni-ban,
ni-bannne,
dai-ni,
dai-ni-bann,
dai-ni-bannne,

dai-ichi no isha.

ni-ban no kisha.

sam-ban no fune.

hĭtotsu-me.

Second.

First.

the first (chief) doctor. the second train. the third ship.

Frequently dai-ichi-ban or ichi-ban alone, is used to render "number one," and similarly with the other numbers.

IV. Fractional and Multiplicative Numbers.

Fractional and Multiplicative quantities are expressed with the aid of the word bu or bun, "a part," and bui, "double"; thus—

sam-bun no ichi, sam-bun no ichi, shi-bun no ichi, shi-bu no ichi no i

```
jū-bun no ichi,
jū-bu no ichi,
jū-bu no ichi,
sam-bun no ni,
sam-bu no ni,
shi-bun no san,
shi-bu no san,
hyaku bun no ni
jū ichi,

one-tenth,
jū-ba, ten-fold.

two-thirds.

three-quarters.

three-quarters.
```

"One-half" is han, or, when employed substantively, ham-bun; as—

Hambun wo chōdai, Please give me half. Han-ne, Half-price.

Sometimes *mitsu ichi* is used for "one-third," and *yotsu ichi* for "one-fourth," but these are exceptions which have the sanction of custom, such combinations of Japanese and Chinese numerals not being allowed generally.

The time of the day and night is expressed by the use of the Chinese word ji, time, hour, with the Chinese numerals prefixed; thus—

```
ichi-ji, one o'clock. shichi-ji, seven o'clock. ni-ji, two ,, hachi-ji, eight ,, san-ji, three ,, ku-ji, nine ,, yo-ji, four ,, jū-ji, ten ,, go-ji, five ,, jū-ichi-ji, eleven ,, roku-ji, six ,, jū-ni-ji, twelve ,,
```

A.M. is indicated by prefixing the word gozen, and P.M. by go-go; thus—

```
gozen-ku-ji, 9 A.M. go-go jū-ichi-ji, 11 P.M.
```

To express the minutes the word fun is employed, but

the initial f is changed to p in the following combinations:—

ip-pun, one minute. sam-pun, three minutes. rop-pun, six minutes. jip-pun, ten minutes.

Examples.

San-ji ni-jip-pun, twenty minutes past three.
yo-ji ju-go-fun, a quarter (literally, fifteen minutes)
past four.
hachi-ji-han, half-past eight.

It is not usual to say "ten minutes to three," "a quarter to four," etc., the general practice being to state the number of minutes *pust* the hour; thus—

ni-ji go-jip-pun, 2.50, i.e. ten minutes to three. san-ji shi-jù-go fun, 3.45, i.e. a quarter to four.

The counting of the days of the month is effected by a mixture of native and Chinese words. In the following table the Japanese words are given in italics and the Chinese in ordinary Roman type:—-

ichi-nichi,	the first of	ja-ichi-mchi,	11th.
tsuitachi,	f the month.	jū-ni-nichi,	12th.
futsăka,	2nd.	ju-san nichi,	13th.
mikka,	3rd.	jů- <i>yokka</i> ,	14th.
yokka,	4th.	jū-go-nichi,	15th.
itsŭka,	5th.	jü-roku-nichi,	16th.
muika,	$6 ext{th}.$	jū-shĭchi-nichi,	17th.
nanuka,	7th.	jū-hachi-nichi,	18th.
yōka,	8th.	jū-ku-nichi,	19th.
kokonoka,	9th.	hatsŭka,	20th.
tōka,	10th.	· ni-jū-ichi-nichi,	21st.

ni-jū-shǐchi-nichi, 27th. ni-jū-ni-nichi, 22nd. ni-jū-san-nichi, ni-jū-hachi-uichi, 28th. 23rd. ni-jū-yokka, 24th. ni-iū-ku-nichi. 29th. ni-ju-go-nichi, 25th. san-jū-nichi, 30th. ni-jü-roku-nichi, 26th. san-ju-ichi-nichi, 31st. gwanjitsu, first day of the year. ō-misoku, last day of the year. misoka. last day of the month (whether the 30th or the 31st).

The preceding forms, which are really cardinals, are also used for such phrases as "three days," "fifteen days," etc. For "one day," however, we must say ichi nichi, not tsuitachi, as the latter is derived from tsüki tachi, the moon rising, i.e. the first day of the moon. Nor can misoka be employed for "thirty days" or "thirty-one days," although it is derived from miso, thirty, and ka, days, both components being ancient native forms.

"January" is termed shō-gwatsu, literally "chief month," sometimes also ichi-getsŭ, literally "one month." The remainder are formed by prefixing the Chinese numbers to the word gwatsu; thus—

ichi-getsu, $sh\bar{o}$ -gwatsu, January. shichi-gwatsu, July. hachi-gwatsu, August. ni-gwatsu, February. September. ku-gwatsu, san-gwatsu, March. October. jū-gwatsu, shi-gwatsu, April. ju-ichi-gwatsu, November. jū-ni-gwatsu, } December. go-gwatsu, May. roku-gwatsu, June. shiwasŭ,

"One month," "two months," etc. are expressed by prefixing the Japanese numbers to the native word tsüki (month); thus hitotsüki, one month; fütatsüki, two months; etc.

Years are usually reckoned by what are termed "year-names" (nengō), i.e. arbitrary periods distinguished with names arbitrarily chosen. The present period is known as Meiji, which commenced on the 25th January 1868, but the Japanese government adopted the Gregorian Calendar as from 1st January 1873, so that the Japanese year now coincides with the English, and thus begins on the 1st January.

```
1890.
          Meiji Ni-jū-san-nen.
1891,
                Ni-j\bar{u}-\eta o-nen.
               Ni-jū-go-nen.
1892.
               Ni-jū-roku-nen.
1893.
            ,,
1894,
            " Ni jū-shichi-nen.
            " Ni-jū-hachi-nen.
1895.
            " Ni-jū-ku-nen.
1896.
            " San-jū-nen.
1897.
               San-jū-ichi-nen.
1898.
            ,,
            " San-jū-ni-nen.
1899.
                San-jū-san-nen.
1900,
            ,,
       Etc.
                    Etc.
```

Thus, to express, for instance, 8th September 1900, in Japanese, we must say:

Meiji San-jū-san, ku-gwatsŭ, yōka,

in which it will be observed that the arrangement of the words is exactly the reverse of that in English.

Foreign dates are expressed as follows, prefixing the word "Sei-reki" (literally, Foreign Calendar):—

8th February 1890 = Seireki Issen-happyaku ku-jū-nen, Ni-gwatsu, yōka.

Interrogations relating to number and quantity are asked by means of the word iku, which, however, is

never employed independently but always in combination; thus—

```
Ikutsů? How many?
Ikura? How much?
Ika-hodo? How much?
Iku-satsů? How many (books)? !
Iku-sō? How many (ressels)?
Iku-tabi? How often!
Iku-nin? How many (persons)?
```

and so on with all the auxiliary numerals, no phonetic modifications taking place in the latter.

The word *nani* (usually contracted to *nan*) may be employed in place of *iku*: thus—

```
Nan-nin? How many (persons)?
Nan-gen? How many (houses)?
```

"How much" is often translated also by dore-hodo? or dono-kurai? as--

Dore-hodo hairi masŭ ka! How much will it contain!
Dono kurai irimasŭ ka! How much do you require!

The Collective numbers are: -

```
Roku-tabi,
                                                                   } Six times.
} Seven times.
                                              Mu-tabi.
   (or)
Hito-tabi.
                                              Shĭchi-tabi.
Ni-do,
Futa-tabi, \} Twice.
San-do,
M: 4-1.; \} Thrice.
                                              Nana-tabi,
                                              \left. \begin{array}{ll} {
m Hachi-tabi,} \\ {
m V}_{n-tabi} \end{array} \right\} \ {\it Eight times}.
                                              Ya-tabi,
                                              Ku-tabi,
Kokono-tabi, \} Nine times.
Jit-tabi,
\] \} Ten times.
Mi-tabi,
Yo-tabi,
Go-tabi,
                   Five times.
Itsu-tabi,
                                              To-tabi,
```

The following miscellaneous phrases should be noticed:—

Futatsu zutsu, (or) Ni-mai-zutsu, mitsu zutsu, sam-mai zutsu, ni-do-me, the second time.

san-do-me, the third time.
dai ni ni, secondly, in the second place.
dai san ni, thirdly, in the third place.
hitotsu oki, every other one (lit. one omitting).
futatsu mitsu, two or three.
go bu, fice per cent.
ichi-wari, ten per cent.
ni-wari, twenty per cent.
ni-wari go-bu, 25½ per cent.

THE ADVERB, CONJUNCTION AND INTERJECTION.

Note,—The Preposition has been dealt with previously under the head of "Postpositions,"

I. THE ADVERS.

The Japanese language is almost devoid of true adverbs, but the deficiency is amply replaced by numerous words and locutions with functions equivalent to them. Most of these equivalents are nouns, adjectives or verbs, which, by the aid of postpositions and combinatives serve to denote the conditions which limit or distinguish an action or attribute.

The following lists contain the principal words performing the office fulfilled by European adverbs, in addition to those mentioned later.

(a). ADVERBS OF PLACE.

achi, achira,	} then	re, thither.	koko, kokoni,	}	here.
asuko, asukoni,	then	re.			below. 😱
atode, doko,			sochi, sochira,	}	there, thither.
doko, dokoni, dochi,			soko, sokoni,		
		ere, whither.	soto, uyeni,		outside.
kochira,	} her	e, hither.	yokoni,		

Examples.

```
Omaye koko ni matte ore, you here waiting remain} You wait here.
                             Danna wa kochira de.
master here
  gozaimasŭ ka.
Doko de sono hako wo o
                              Where did you buy that box!
where that box
  kai nasatta?
  buy did
Dare ka soto de matsŭ,
                             \ Someone is waiting
someone outside waits
Dochira ye o ide de.
where
  gozaimasŭ ka,
  is
Yō ga aru kara, kochi
           is because here
business
  o ide.
```

(b) ADVERBS OF TIME.

ashita, to-morrow. ima, now. itsu? when? itsademo, always (with a negative, "never"). jikini, soon. kesa, this morning. mata, again. mada, still (with a neg. verb, not yet).

mettani (with a negative), seldom. mionichi, to-morrow. mo, already (with neg. verb, "no more"). mōhaya, already. nochihodo, by-and-by. sendatte, some days ago. sudeni, already. sugu, at once, immediately. tabi tabi, several times. tadaima, presently, im mediately. toki, when (relative). vube, last night,

Examples.

Λ iu hanashi wa mettani) called story kikimasenŭ, hear Mō o kayeri ni natta, already return has-become Mada ki ya shimasŭmai, come will-not-do Sakujitsu kita, this-morning atc Mionichi made naorimasumai, \ He will not be well by to-morrow till recover-will-not Mada hayō gozaimasenti ka, early is not

H is seldom we hear a story of that kind.

He has already gone away.

} He cannot have come yet.

He came yesterday.

tabemashīta ringo, \ The apples I ate this apples \(\) morning.

Is it not yet early?

Sugu ni kawanakŭte

at-once not-buying narimasenu. does-not-do Itsu iku d'arö? when go will-be Yübe ame ga futta,

last-night rain fell

Some must be bought at once.

} When is he likely to go? } It rained last night.

(c) ADVERBS OF QUANTITY.

amarı, vokeini. } too much. bakari, about, only. chitto, $\left. \right.$ choito, $\left. \right.$ a little, slightly. chotto. donokurai? how much? iku bun ka, more or less, rather.

ikura? how much? ikutsă? how many? jiubun, enough. motto, more. sappari, wholly. taiso, \ much, very, takŭsan, ! enough. zuibun, a good deal, pretty

Examples.

Sono kasa wa ikura? umbrella how-much Hiôgo made donogurai what-quantity to aru? is Amari takai, too-much is-dear Yūbe — wa taiso atsŭkatta, \ It was very hot last lust-night Ikutsŭ gozaimasu? Sore de takŭsan. Motto arimasŭ ka.

We much is that

It is too much (in price).

night. How many are there?

That is enough. Have you any more? Chitto o kake nasaimashi, a-little place deign

Taisō nigiyaka de gozaimashita, at was very lively.

Kore bakari de tarani d'arō, at little sufficient.

Taisō ni o kawari nasatta cery change dono ne!

Please sit down a little.

It was very lively.

This alone will not be sufficient.

This one will not be sufficient.

(d) Adverbs of Manner.

dō, how.
dōmo, howsoever.
goku,
hanahada,
very.
ikaga? how?
kayoni,
kō,
in this way.
kitto, positively.
makoto, truly, indeed.
ma, quite (always combined with the following adjective, of which the initial consonant is doubled, as makka (for ma-aka).

naze, why?
sayoni,
sö,
 in that way, so.
sakasama, upside down.
sonnani, so.
tokoro ga, nevertheless,
still.
tokoro de, thereupon, and
so.
yahari,
yappari, (emph.)
yohodo,
yoppodo,
yoku, well.
zehi, positively.

Examples.

Dare ga sō iimashĭta?
Naze hayaku konai?
why quickly not-come
Sonnani yasuku wa,
so cheap
uranakatta,
did-not-sell

Who said so?

Why don't you come quickly?

I did not sell it so cheaply as that.

```
Kono kasa wa goku,

this umbrella very
takô gozaimasu,
deur is

Kona shina ga makoto,
article truly
ni yasui,
is cheap

Shinsetsu wa arigatai ga,
kindness thanks
zehi ikaneba naranai,
positively if-not-go docs-not-become

Makka na kao,
quite-red face

This umbrella is very dear.

This article is truly cheap.

You are very kind,
but I must positively
be going.
```

It will no doubt have been observed that in the preceding tables there are no equivalents for the adverbs of affirmation and negation "yes" and "no." This is owing to the fact that answers to questions in Japanese have not yet been reduced to the simple "yes" or "no" in English. The words he! hei! or hai! it is true, may mean yes! but they are most frequently employed as ejaculations to signify that the speaker has heard and understood, or that he is paying attention to what is being addressed to him. Thus, when a waiter is summoned he will exclaim hei! merely to notify that he has heard and will come.

The word *iye* (or *ie*) signifies *no!* but it is rarely employed except when the speaker desires to emphasise his denial.

The simple affirmative yes! is usually rendered by so da, so desŭ (more respectful), or sayō de gozaimasŭ (most respectful), all of which mean, literally, "that is so." In familiar intercourse, these are often contracted to the one word sayō.

Similarly the counterpart of the simple negative no!

is found in sō ja nai, and sayō de gozaimasen (more respectful), which mean "that is not so."

The same ideas are also conveyed by repeating the verb of the question either affirmatively or negatively; thus—

```
Mō kimashĭta ka, Has he come yet!

Sayō de gozaimasū, Yes.

O wakari ni narimashĭta understanding has-become ka,

Wakarimashĭta,
(I)-huve-understood Yes.

Wakarimasen,
(I)-understand-not Yo.
```

The indefinite forms in ku of adjectives are employed adverbially and form counterparts (though not exclusively) for the English adverbs in -ly; as, yasuku, cheaply, easily; hayaku, quickly.

Nouns which are rendered adjectival by the addition of no or na, are made to serve as adverbs by substituting ni for no or na; as—

```
daiji ni, carefully. teinei ni, politely. makoto ni, truthfully, really. shinsetsu ni, kindly. shizuka ni, quietly, gently.
```

An adverbial signification is imparted to some words merely by reduplication; thus—-

```
tokoro-dokoro, here and there (tokoro, a place).
dan-dan, gradually (dan, a step).
hō-bō, everywhere (hō, side, direction).
iro-iro, various kinds (iro, sort, kind).
toki-doki, sometimes (toki, time).
tabi-tabi, often (tabe, a time [French, fois]).
nichi-nichi, daily (nichi, day).
naka-naka, very, more than one might imagine
(naka, inside).
```

In numerous instances words which have to be rendered by adverbs or adverbial phrases in English, are the gerunds of verbs, which have passed into use as adverbs; thus—

damatte, silently (damaru, to keep silence).
hajimete, for the first time (hajimeru, to begin).
yorokonde, gladly (yorokobu, to rejoice).
kaette, on the contrary (kaeru, to return).
machigatte, wrongly (machigau, to err).
sadamete, probably (sadameru, to confirm).
kesshite (used with a negative verb), never (kesshiru,
to determine).

The particles de, mo and to are in some cases employed to produce adverbial phrases; thus—

marn de, quite. tonto mo (with neg. verb), not in the least.

waza to, on purpose. don to, with a bang.

Onomatopoetic compounds like the English ding-dong, slap-bung, higgledy-piggledy, etc. exist extensively in Japanese, and are usually classed as adverbs. Examples of these are :—

pon-pon, the sound of a gun. para-para, sound of rain. pisshari, slamming of doors. goro-goro, rolling of thunder. bon-yari, expressive of listlessness.

domburi to, falling with a flop.

patchiri, sudden breaking. guzu-guzu, complainingly.

pika-pika, *glitteringly*. butsu-butsu, *grumblingly*. kyan-kyan, *yelping like a dog*.

gata-gata, with a rattling noise.

soro-soro, slow or laboured movement.

katchiri, with a click. burra-burra, saunteringly.

II. The Conjunction.

In Japanese, conjunctions can scarcely be regarded as a separate part of speech, the service they render in English being performed partly by postpositions, partly by nouns, and partly by conjugational forms of the verb, as has been abundantly demonstrated previously.

The most frequently recurring conjunction in most languages-"and"-is sometimes rendered by mi or to as shown on pp. 41 and 45, but in most cases its signification is imparted by merely placing the nouns in juxtaposition, as sake sakana, sake-beer and tish.

The necessity for "and" between verbs or clauses is very nearly obviated by the construction with the Indefinite Form or Gerund shown on pp. 79 and 80.

"But" at the beginning of a phrase may be translated by shikashi, shikashi nagara, datte, or demo; as-

Hidoi furi ni natte kimashita; hard; but as it is only shĭkashi, yudachi desŭ kara, athunder-shower, perjiki agarimashō,

\ It has begun to rain - haps it will soon clear - again.

"Or" may be rendered by nari, or by ya, or it may be omitted entirely; thus-

Toka nari, hatsuka nari, Nido va sando. Go roku nen.

Ten or twenty days. Two or three times. Five or six years.

"As," used with the signification "in the same manner as" is translated by tori (literally, "way, road"); thus—

Go zonji no tori, Watakushi no iu tori ni nasai, Kindly do as I say. Mae ni mo moshĭta tori,

As you know, As I have already said.

III. THE INTERJECTION.

The Japanese language is abundantly supplied with words which are used to express some emotion of the mind, but as in other languages the interjection is a nondescript kind of word not entering into the construction of sentences so that it can hardly be considered as having any grammar.

The following are the interjections most frequently heard:—

A! shows attention, and often assent on the part of a listener.

Aa! may express either admiration or grief, and when long drawn out, usually tells of weariness.

Aita! a cry of pain.

Ara! tells of either joy or fear. Spoken quickly by women it shows surprise.

Ai! often answers a call.

Dokkoi! or Dokkoisho! is a signal for encouragement like the English, "Now then, altogether!" or "Up with it!" when lifting heavy weights. It is also a sigh of relief when the weight is safely lifted into its place.

Domo! shows the speaker to be puzzled, not knowing just what to do. It also expresses astonishment, corresponding somewhat to "Well I never," "Indeed," and "Really."

Hate na! equivalent to our "Well I never."

Koso! an emphatic particle used to strengthen the word which precedes it.

Ma! betokens surprise and wonder like "Oh!" and also entreaty like "Do! do please!" It is used chiefly by women.

Naruhodo! has no exact counterpart in English. It stands for attention, surprise, sympathetic wonderment in conversation, and corresponds pretty nearly to "Who

would have thought it!" "You don't say so!" Sometimes, when pronounced in an assenting tone of voice it means "Yes, I see," "Oh, indeed," "Really." When someone is telling a long story it is common for listeners to insert a naruhodo! when he pauses for breath. Instead of naruhodo we may say sō desu ku? literally, "is that so?" or, less politely, "so ku."

Ne! serves to draw attention to a preceding word or clause, something like the English "you know," or the French "n'est-ce-pas?"

Oi! is an exclamation used to call the attention of people.

Oya! is an expression of astonishment heard chiefly from the mouths of women.

Sa! is an exclamation used to urge or hurry anyone. It is often used with $say\bar{o}$; thus, $say\bar{o}$ sa! "of course," "yes."

Yo! indicates address to some one. It is also often used at the end of a sentence to show emphasis.

Yai! betokens terror.

Yā! an expletive accompanying expressions of profound contempt.

Ya! shows pleasurable excitement over what is being witnessed. It is often heard in theatres as an expression of applause.

Zo! at the end of a sentence gives it a strong emphasis.

Examples.

Sayō sa!

Hate na! Kinō no asa Tokyo ye dashita henji ga mo kuru waka da ga,

lkaga de gozaimasă? Kitsuenjo de ip-puku itashimasho ka, Sa! o tomo itashimasho. Ma! Yo gozaimasen ka, Oya! kwaji to miete, hansho) Halloo! there appears to conflagration wo utteru ga, Mö ku-ji sugi da, Naruhodo! Aa! sappari shimashita! Oi! kyuji, hi wo o-kure,

waiter light

That it is! Of course it is! I can't make it out! There should be a reply to the letter 1 sent to Tokio yesterday morning. Suppose we go and have a pipe in the smoke-All right, come along! Oh! why hurry so? a fire; they are ringing the fire-bell. It's past nine o'clock. You don't say so! Ah! I feel quite refreshed. Waiter! oblige me with

a light.

HONORIFICS.

Probably the most perplexing task which the student of Japanese finds in his path is the attainment of a correct use of the honorific and humble forms of expression which permeate the entire language.

In social intercourse, whether between servant and master, host and guest, men and women, or parents and children, various alternatives are provided in the grammar and vocabulary to indicate the relations of superior and inferior, real or formal, and although the subject of honorifies has been incidentally referred to in many places previously, it has been considered desirable to defer until now the full and detailed explication of their leading characteristics.

Although it is impossible to formulate precise rules for the employment of honorific idioms, the following main principles may be said to underlie their Japanese usage.

- I. In speaking to equals, or to any persons except intimate friends or one's own servants, the honorific forms are used?
- II. In speaking of oneself or one's own possessions the honorific forms are never employed.
- III. In speaking of absent persons (the *third person* in English) custom varies. Should the person spoken about be decidedly superior in rank to the person spoken to, or should he be present and at least an equal, then honorifies are used.

Speaking generally, the beginner in the study of the language should avoid the forms of address set apart for the speech of superiors to inferiors, and even in conversation with his own servants he would do well to employ at least polite verbal forms, that is, the forms inflected with the verb masă. He should not, of course, employ honorific forms in intercourse with decided inferiors, but for all relationships, except those of his immediate family and of intimate friends polite verbal forms are appropriate.

Respect and humility are denoted in the following ways:--

- 1. By honoritic prefixes.
- 2. ,, ,, suffixes.
- 3. ,, special honorific and humble nouns, pronouns, and verbs.

I. Honorific Prefixes.

The prefixes o and go are employed with nouns, adjectives and verbs to indicate respect. Usually, though not invariably, these prefixes denote that the words with

which they are associated are in the Second Person, or refer to something connected with the person addressed, and thus by their use, the necessity for the employment of pronouns of the Second Person is largely obviated. Thus o taku and go shōchi will generally signify respectively "your house" and "your consent," without the intervention of a pronoun.

O being a word of Japanese origin is usually prefixed to native words, whilst go, a Chinese importation, is generally used before words borrowed from the Chinese, although neither of these rules is without exceptions. Subject to the restrictions laid down on page 155, o and go may be applied to the third person, thus o rusu may signify either "your absence," or "his absence"; go son, "your loss," or "his loss"; etc. Sometimes, in order to render the phrase still more respectful, the word sama, Mr, is superadded; thus—

Maido go yakkai sama cach-time (hon.) help desŭ, is I have guite recovered; O kage sama, sukkari thanks for your kind shade Mr quite enquiries (more liternaoimashite gozaimasü, ally, "thanks for your recovered influence"). Go taikutsu sama, It must be tedious for you. tedium Mr O kinodoku poison-of-spirit gozaimasŭ, is

Note.—Zannen is substituted for kinodoku to express regret on one's own account.

In such sentences as the following beginners are often at a loss to account for the use of o and go, which at first sight seem to be employed in contravention of Rule II. on page 155.

```
O itoma moshimashö, (hon.) leave will-probably-say | I think I must now take my leave.

O tomo itashimashö, (hon.) companion will-probably-do | I should like to go with you.

O jama wo itashimashita, Excuse me for having (hon.) interference did | interrupted you.

Ato kara go aisatsu wo afterwards (hon.) answer moshimasho, will-say | I will send my answer moshimasho, will-say | Go shiu wa ikaga de (hon.) sake how gozaimasu, | May I offer you some sake-gozaimasu, | beer!
```

In constructions such as the above, one might naturally infer that the honorifies are being applied by the speaker to himself, but this is not the case. He intends by their use to convey the idea that his answer, his refreshment, his companionship, and even his interference are dignified by their being associated with the person to whom he is speaking.

In some cases the honorities are used, especially by women and members of the lower classes, not as a token of respect for the person addressed, but with honorific intent for the things to which they are applied. This usage originates probably in the ancient deification of the objects represented, or from the use of the words in connection with deified objects.

The following are examples:-

```
o cha.
                         the sun.
                                  o tento sama.
tea.
                                   o tsŭki sama.
hot water, o yu.
                         the moon,
                         the weather, o tenki.
cold water, o hiya.
                         cash, o ashi.
soup,
          o tsuyu.
                                 o kane.
                         money.
food,
          go zen.
a tray, o bon.
                         a funeral. o tomurai.
```

O is also frequently associated with adjectives; thus-

```
Danna wa, o isogashiù

Master (hon.) busy
gozaimasŭ,
is

Yohodo o kirei desŭ,
very (hon.) pretty is

O wakō gozaimasŭ,

You are young.
```

The locution o saki (or o saki ye) is employed with two distinct meanings. It may be an apology for going on in front of a person, like our "please excuse me for going first (upstairs, etc.)," or it may mean "you go first, please."

II. Honorific Suffixes.

Gata and tachi, the plural suffixes, are employed to convey a moderate degree of respect, whilst shiu expresses still less. Ra and domo have no honoritic meaning.

Sama (more commonly san) corresponds to the English Mr and Sir, and is placed after the name, description or title in addressing, or speaking about, superiors; thus—

```
Ikeda san, Mr Ikeda.

Kōshi sama, The Minister (plenipotentiary).

Danna san, Sir (used by servants, to or of, masters, or a tradesman to a customer.
```

At times the Chinese word Kun (literally, Prince) is substituted for sama and san; thus Kanda Kun, Mr Kanda. Members of Parliament, and students generally, employ it in referring to each other.

Very recently Sun has passed into common use indifferently for Mr, Mrs or Miss in cases where no misconception can arise, although our words Mrs and Miss are generally rendered by such periphrases as—

The personal names of women (corresponding to European Christian names) are preceded by the honorific o and followed by san, but in familiar intercourse the latter word is generally omitted. In the majority of instances these feminine names are taken from natural objects, preferably those of an elegant or pleasing nature; thus—

O Hana San,	Miss Blossom.
O Tsuyu San,	"Dew.
O Matsu Sau,	" Pine-tree.
O Yone San,	"Rice.

Usually, feminine names of more than two syllables are used without the honorific o, which is also discarded before surnames and men's personal names. Sun, however, may be affixed either to personal names or to surnames.

Note.—In Japanese the surname precedes the personal name just as if we should say "Smith John" instead of "John Smith."

To one's own wife or servant the personal name with or without o is used,

In speaking of her husband a wife usually says yudo or teishiu (generally pronounced teishi).

San is not used to the servants of one's friends, and to the servants of strangers it is replaced by don. One's own male servants are addressed by their personal names which are usually abbreviated, as Tsune for Tsunekichi.

Between themselves children employ the first part of the personal name with or without sun.

San is in frequent use after names of trades and professions, as kajiya san, the blacksmith; isha san, the Doctor, both in the second and in the third person.

"Madame" is rendered by oku san, or more familiarly o kumi san, and Mademoiselle is o jo san, or o misume go.

III. HONORIFIC AND HUMBLE NOUNS.

The gradual infiltration of Chinese words into the Japanese language for over a thousand years has tended to develop a contempt for the native equivalents, and consequently Chinese words are usually considered more elegant than their Japanese synonyms. Thus in polite speech go shin is usually preferred to o sake (sake-beer); the general term for "head" is atama, the polite one, o tsumi; for ōki na ki the Japanese for "a large tree," the Chinese tai-boku is preferred; and so on.

It is, however, principally in speaking of the relatives of oneself and of others that humble and honorific nouns are employed, of which the following are the chief:—

$$Grandfather, \left\{ \begin{array}{ll} \textit{Sofu}, & \textit{Another's.} \\ \textit{sofu}, & \textit{go sofu sama.} \\ \textit{jiji}, & \textit{go sofu.} \\ & \textit{o ji sama.} \\ & \textit{o ji sam.} \end{array} \right\} \ \textit{to children.}$$

One's o	non.	Another's.	
Grand-	csobo,	go sobo.	
mother,	baba,	o bå san (<i>to children</i>).	
	(oyaji,	go shimpu.	
Father,	chichi,	go sompu. ototsu san (<i>to children</i>). otottsan.	
	(haha,	go bokö.	
Mother,	okka (<i>by children</i>)	go bokö. haha sama.) okka san (<i>to children</i>). go robŏ (<i>when aged</i>).	
	(ani,	o ani san (elder).	
Brother,	ototo,	go sonkei (,,). go shatei sama (younger). go shatei (,,). otōto go (,,).	
Sister,	(ane, \imōto, (tsure-ai(<i>lower class</i>)	o ane san (elder). ane san. o imóto go (younger).	
Husband,*	(tsure-ai(lower class) danna or teishin, yado uchi taki	, danua. teishi (<i>familiar</i>). go teishi. ouse."	
Wife,	(niōbō, sai, kanai,	o kami san (lower class). saikun go shinzo oku san oku sama, go naishitsu lower class. middle class. upper class.	

^{*} In general, the husband's surname is employed both to a wife and also by her in mentioning her husband, in the former case with sen added, in the latter case without san.

One's	own.	Another's.
	segare,	go shĭsoku.
	musŭko,	o musuko san.
Ø.,,	kodomo (and for	
Son,	sōriō,	go sōriō (<i>eldest</i>).
	jinan,	go jinan (<i>seconc¹</i>).
	sannan,	go sannan (third).
	(musume,	go sokujo.
Daughter,	{	o musume go.
	(o jo san.
Daughter, Uncle,	∫oji,	oji san.
O new,	1	oji sama.
Aunt,	(oba,	oba san.
21 (0/(),	{	oba sama.
Ne phew,	oi,	o go sama. *
Niece,	mei,	o mei go sama.
Father-in-	<i>law</i> , shiuto,	shiuto go.
	<i>law</i> , shiutome,	shiutome go.
	, muko,	o muko san.
v	in-law, yome,	o yome go.
Grand-chi	ld, mago,	o mago.

Remarks.

- 1. In speaking of their elder relatives, children (and to a certain extent, women), add san, saying, for example, otottsan, "my father"; ane san, "my elder sister."
- 2. For the nominative particle ga, de wa is usually substituted, with the humble terms for "husband" (yado, uchi, taki); thus—

Taku de wa, tabi ye dete

journey to having-gone
rusu de gosaimasŭ,
absent is

My husband is away;
he has gone on a journey.

- 3. The terms applied to one's own relatives may also be employed for those of absent persons when no special respect is intended to be paid to the latter, and even for the relatives of the person spoken to, if he is decidedly inferior in rank to the speaker. Segare, however, should only be employed for one's own son.
- 4. Little boys up to six or seven years of age are called botchan.

Examples. Go shimpu wa, ikaga de | How is your father irasshaimasu? Ano Daiku san wa o kami) Has that carpenter a san ga arimasu ka, Sore ra no koto wo segare Theard about those things that (plu.) thing SOIT kara kikimashita. from my son. from heard san no go bički Yome go Macss How is your (sick) daughter-in-law wa ikaga de gozaimasŭ, -daughter-in-law? how isKono ko wa, anata no go \ Is this little Jellow your shĭsoku de gozaimasŭ ka, He! wataküshi no sõrio de Yes, he is my eldest. gozaimasŭ, Sā, botchan! koko ye o kake \ Here, my little man, sit Ane hodo ôkiku wa nai, \ She is not so tall as her is not Haha ga naku narimashita not became My mother is dead, so kara ni san nichi o itoma I beg you to give me because two three day two or three days' leave. wo negaimasŭ,

request

IV. HONORIFIC AND HUMBLE VERBS.

Verbs are rendered polite by substituting the paradigms of masň (p. 75) for the ordinary forms given on pp. 58, 60, and 62. Formerly masň was exclusively honorific, but modern usage sanctions its employment as a respectful termination which may be used indiscriminately with any person of the verb.

The student should bear in mind that masň is a constituent of the abbreviations desň, deshčta and deshō, which are therefore more respectful than da, datta and darō. It should also be noted that the use of an abbreviation including an honoritic or polite form always shows less respect than does the unabbreviated form.

It must be observed, however, that the forms in masic are not honorities, strictly speaking, being employed in most cases merely as indications of a courteous manner rather than of any special respect granted to the person addressed. When respect is intended to be shown it is usual to employ a periphrasis with the word o, "honorable," the Indefinite Form of the verb, and mosu, I say, if the first person is meant, or masaru (less commonly, mi naru) for the second or third person. Nasaru signifies "to deign"; ni maru, "to become."

Examples.

O tanomi mõsu,
o tanomi nasaru,
o tanomi ni naru,
O kashi nasatte kudasare,

Please be kind enough to
lend me ——.

Masi may be superadded; thus—

O negai möshimasu, I ask a favour of you.

Another method of rendering a verb honorific is by substituting the Causal or Potential (passive) verb for the simple verb, on the principle that it is more polite to suggest that a person is able to do a thing or causes it to be done rather than to state that he does it.

A yet curther method is the employment of a separate verb according as the phrase is intended to be honorific or humble. The following are those in most general use:--

		Neutral.	Humble, .	Honoviție.
To	lu',	irn ; <i>or</i> oru.	iru; or oru;	o ide nasaru ; <i>or</i> irassharu.
			haishaku suru ; mairu ; agaru ; makaru,	
,,	do,	suru,	•	nasaru; asobasu.
	eut,		itadaku ; chodai suru,	(meshi-) sageru.
,,	give,	yaru,	ageru ; shinjo suru,	kudasaru; kureru (less polite).
,,	go,	iku,	mairu; agaru; makaru,	o ide nasaru; irassharu.
,,	hear,	kiku,	uketamawaru,	o kiki nasaru.
			o me ni kakaru,	o ai nasaru.
,,	receive,	ukeru,	itadaku; chodai suru,	o uke nasaru.
,,	say,	iu,	moshi-ageru,	ossharu.
,,			haiken suru,	goran nasaru.
,,	show,	miseru,	o me ni kakeru,	o mise nasaru.

Examples.

```
Donata de irasshaimasŭ ka, May I ask who you are, who are Sirol !

Möshi-kanete orimasŭ, I can hardly say it (said to-say-unable am I asking a favour).
```

```
Where are you going.
Doko ye irassharu?
                               (Sir)?
where to deign-to-go
Tkö-
    to omou.
                            I am thinking of going.
        think.
will-ao
Nan'to osshaimashita,
                            ig\} What did you say (Sir)?
what say
Sore de nan'to itta?
                              What did he say then?
                              When will you come?
Itsŭ o ide nasaru ka.
                              I will come again.
Mata mairimasu,
```

The Imperatives of the Honorific verbs in the preceding list are used thus:

```
deign to be (come or go)! { irasshai! or irasshaimashi! o ide nasai! o ide nasai! asobase! asobase! meshi-agare! kudasai! osshaimashi! deign to say! osshaimashi! deign to look! goran nasai!
```

Note.—0 ide nasai is often familiarly contracted to o ide; goran nasai to goran.

The Imperatives of other verbs are very seldom used except when addressing one's own servants or coolies, as such modes of address sound, in Japanese ears, too blunt and abrupt. Thus the common verb naosu, to mend, when employed in a command would not be naose! mend! but rather naoshite kudasai, mending condescend = please mend, or o naoshi nasai mase, honorably mend deign = please mend. In like manner kake, the Imperative of kaku, to write, would be replaced by o kaki nasai, or o kaki kudasai, or kaite kudasai.

Speaking generally, it may be held that the difference

between nasai and kudasai is one of degree, the former being usually a very polite command, whilst kudasai is a request and would be employed, for instance when one asked a friend to do something for one.

Examples.

SYNTAX.

The normal arrangement of the Japanese sentence is— First, the nominative case.

Second, the indirect object of the verb, or a noun followed by a postposition.

Third, the direct object of the verb (accusative case). Fourth, the verb, or the verbal form of an adjective.

Examples.

Watakŭshi wa tabako ga,

I (nom.) tobacco of dai-suki desŭ,
very-fond am

Natsu ga kimashĭta,
summer (nom.) has-come

O-cha ga dekimashĭta,
tea (nom.) is-made

I am very fond of tobacco.

Summer has come.

```
Watakushi wa zeikan no

I (nom.) custom-house of
yakunin de gozaimasu,

Ano hito wa junsa de
he (nom.) policeman
gozaimasu,

Watakushi ga ashi wa itande iru,

my foot (nom.) painful is

I am a custom-house
officer.

He is a policeman.
in my foot.
```

An exception to the above normal order occurs in comparisons, where the object with which the comparison is made is usually placed first; as—

```
Watakŭshi yori, anata o

I than, you
wakô gozaimasů,
young arc

Kono yama yori arc
this mountain than that
wa takai,
(nom) is-high

Than I, you are younger than
I.

Than this mountain, that i
high(er), i.e. That mountain is higher than this.
```

The relative sequence of the direct and indirect objects is sometimes varied. As a rule whichever of the two it is meant to emphasise comes first. Thus in rendering into Japanese the sentence "He went away without giving the horse its fodder," if it is meant, for instance, that he had fed the other animals but not the horse, we should, in English, render the word horse emphatic by placing stress of the voice on it, but to render the same idea in Japanese the word would simply be placed first; thus—

```
Mŭma ni kaiba wo )
horse to fodder (acc.)
tsŭkezu ni itte He went away without giving
giving-not having-gone the horse its fodder,
shimatta,
finished
```

If, however, it is meant that the person had given the horse his water, etc., but not his fodder we should, in English, stress "fodder," and put it first in Japanese; thus—

Kaiba wo muma ni, etc.

When a subject to the verb is expressed it is generally placed at the beginning as already stated, but usually verbs are subjectless, and instead of expressing an act as performed by some person they intimate rather a "coming-to-be" on his part. Where no subject is named, the word on which it is desired to lay most stress is frequently placed at the head of the sentence and followed by the isolating postposition wa (see remarks on this particle, p. 47).

Examples.

Sonna koto wa, ii ya
such thing as for saying as for
itashimasen,
do-not-do

Kyō no atsusa wa
to-day of heat as for
koraeraremasen,
cannot-bear

Kore wa, nan de dekite
this as for what by eventuating
orimasu,

It is quite tiresome, the

Kono mono wa, Nihon-go de this thing as-for Jap.-lunguage by nan to moshimasŭ ka what that say ?

What is this called in Japanese (literally, "As for this thing, what do (people) say that it is?").

Qualifying words or phrases precede the words which they qualify; thus—

- (a) the adjective and the verb in the attributive form precede the word to which they refer, as atsui¹ kami,² thick¹ paper²; kuru hito, the person who comes (literally, "the comes person").
- (b) the adverb precedes the verb, adjective or other adverb which it modifies; as--

```
Hayaku o ide nasare,

quickly come do

Kono műma wa goku,

this horse (nom.) rery
takö gozaimasű,
dear is

Amari mutsukashí,
too is-difficult

Taisō nigiyaka de

very lively
gozaimashíta,
(it) was

Come quickly!

This horse is very dear.

It is too difficult.

It was very lively.
```

(c) the noun followed by the possessive particle no or ga precedes the noun to which it is joined; as---

```
Neko no tsume,

cat of claves

Kin no kahei,

gold of coins

Jü-nen ga aida,

ten-years of space

The claws of a cat; a cat's

claws.

Coins of gold; gold coins.

For the space of ten years.
```

Particles denoting number and case, with wa, ya, ga, mo and to follow the noun; as—

Okŭsama gata,	ladies.
onna shū, onna domo,	women.
yakunin-tachi,	officers.
tori ni,	to a bird.

When two or more verbs or adjectives are co-ordinated in a sentence, only the one placed last assumes the inflection or particle belonging to all, the others taking the Indefinite Form. This rule has been given previously, and a rule somewhat analogous governs the use of nouns and pronouns, by which particles belonging to several nouns or pronouns are not placed with each of them, but only with the last of the series;* thus...

```
Watakushi to omaye wa Yoroppa

I and you Europe When you and I came kare toki,
from came

Kōri to mizu wo motte koi, Bring ice and ice and water (acr.) having-carried come arater.

Ya ka tama ni atatte arrow or bullet by striking a bullet.

Taisetsu na tegami hon ni kane important teller book money mo haitte imashita, having-entered was

Hone to kawa to ni natta, He has become skin and bonz
```

^{*} See, however, "Dano" p. 33,

Mo (with any other particle preceding it), however, accompanies each substantive in a series; thus—

Făransu ni mo, Doitsu
France in also Germany
ni mo,
in also

Expressions of time are usually put before expressions of place; as—

Tonen mo Tōkyō ni hakurankwai this-year at exhibition ga arimashō ka? will-be /

Kionen no natsu watakushi no last-year sammer my tokoro ni kita hito, place came man

Toshi ni nido gurai dzutsu year twice amount each
Hiōgō ye dete kuru wake ni
to out come reason
wa ikumai ka,
will-not-oo?

Is there to be an exhibition at Tokio this year?

The man who came to my place in the summer of last year.

Would it not be possible to go to H. twice each year?

Explanatory or dependent clauses precede the principal clause; as—

Miōnichi tenki ga yoroshikereba, to-morrow weather if-good mairimasŭ, come

Sono tegami wo yonde nan' that letter (acc.) having-read what to itta,

If the weather is fine,

I will come tomorrow.

What did he say when he read that letter?

Final verbs and adjectives are frequently omitted in cases where no misconception or ambiguity can arise, especially in short idiomatic sentences; as—

```
O hayō (gozaimasū),
hon. early (is)

Dōzō kannin shite
please patience having-done
(kudasare)

Cood morning!

Please have patience with me.
```

This example of ellipsis is the one of most frequent recurrence, but it is by no means the only one. A feature of speech much in vogue is the breaking-off of a phrase in the middle, leaving the rest to be inferred; thus—

```
Kochira de zonjite oreba,

here in knowing if-be
moshi-agemasu ga
say-will-lift-up although

Cha wo irete (o kun nasai),
tea (acc.) putting-in

Ikitai mono desŭ keredo
like-to-go is although

Sayō demo gozaimashō ga,
thus even will-probably-be but

I would tell you if I knew
(but I don't know).

Make some tea.

(I am afraid I can-
not).

That is perhaps so, but
(it does not affect the
question, etc.).
```

Conjunctions are usually placed at the end of the sentence or clause to which they belong; as-

Ii keredo, ne ga takai, \ Though it is good, the it-is-good though, price is-high \ price is high. Uso da to iimasu, Lie (ii) is that (he) says Lie (iii) is that Lie (he) says Lie Aite iru nara, kashite kudasai, please lend it to me if open it-is if lending condescend und pour do not require it at present. Kutabiremashĭta kara, chotto Let us rest a little have-become-tired because a-little because Lam tired. vasumimashō,

In English, interrogation is indicated by an inversion of the normal construction of the sentence, but in Japanese no alteration is made, the interrogation being denoted merely by placing the postposition ka at the end of the phrase; as

will-probably-rest

Kimashĭta, He has come. Has he come? Kimashĭta ka.

As in English, two negatives make an affirmative, and thus destroy each other; thus-

Shiranu koto wa gozaimasenu, \ He certainly knows. not-know thing already if-do-not-go is-not Kö shinakereba narimasen, thus if-ant-do is-not

In Japanese, the personification of inanimate objects is almost entirely unknown. Thus we find no counterparts for such expressions as "the flight of Time," "Smiling Morn," "the sting of Death," etc., and even the employment of the name of an inanimate thing as the subject of a transitive verb is repugnant to the matter-of-fact Fareastern mind. For example a Japanese will not say, "This heat knocks me up," but rather—

Kono atsusa ni dômo yowatta,
this heat on-account-of have-become-weak,

i.e. "I am knocked up on account of this heat."

Similarly, where we should say "His not-understanding annoys me," he would embody the notion in the words—

Wakarani de komaru, (his) not-understanding at (I) am-annoged

i.e. "I am annoyed at his not-understanding."

REPORTED SPEECH; INDIRECT NARRATION.

In English, a sentence when reported by another person is usually reconstructed; thus, if I say "I shall come," another person, in reporting my intention uses the words "He said he would come." In Japanese, however, the sentence is repeated exactly as spoken and the particle to, that, is placed after it to denote that it is a quotation; thus—

Mairu to iimashita. "I-will-come," that (he) said.

Examples.

Sore wo Komuro San kikaremashite, that Mr having-heard
"sō omou mono mo arō," to
so think people may-be
iwaremashita,
(he) said

Hearing of that, Mr Komuro said there might be some people who thought so. Enzetsu ga mõ shimai ni lecture already finish natta to iimashĭta, became (he) said

Iku, to iimashita, } He said he would go.

I-will-go that he-said

Haha ga sono koto wo

mother that thing

moshimashitara, ko-toshi
when-she-spoke-of this-year
wa ayaniku shirabe-mono
unfortunutely investigation
ga aru kara yenkai wa
is because entertainment
gozaimasenŭ to
is-not that
kotayemashita,

kotayemashita,
he answered

Taiso ni kirei desu to hito
greatly pretty is that people
ga iimasu,

(nom.) say

When my mother asked him about it, he said that unfortunately he would be prevented from giving an entertainment this year, by an investigation which he had in hand.

He said that the lecture

It is said to be extremely pretty.

Conversational Phrases on Subjects of Every-day Life.

Note.—The words used in the following phrases will be found in the Vocabularies at the end of the book. The construction of the respective sentences will be readily understood if the grammatical portion of this work has been diligently studied. In many cases the English phrases are given in a brief and abrupt form, but the Japanese equivalents are uniformly polite and may be addressed to all classes,

Questions.

Do you speak English? What do you call it in Japanese?

How do you say it in Japanese?

What is this used for?
What is that? (which you have in your hand, etc.)
What is that (our shirt) called?

What is that—(e.g. ship) called? What do you want?

What do you say? Who is it?

What do you think of it? Which do you prefer?

Where are you going? Where have you been?

Where is it? Is it so?

Isn't it so? What are you doing?

Where has he gone?

Ei-go wo go-zonji desŭ ka. Nihon-go de nan to mõshimasu

Nihon-go de, dō iū fū ni iimasŭ ka.

Kore wa nani ni tsukaimasú ka. Sore wa nan desü!

Sono — wa nan' to iu ?

Nan desű ka. Nani wo osshaimasú ka. Dare desű ka.

Dō omoimasŭ ka. Dochira ga yō gozaimasŭ ka

Dochira ga yō gozaimasŭ ka. Dochira ye irassharu ka. Doko ye oide deshita ka.

Doko ni arn ka. Ső desű ka.

Sō ja nai ka. Nani wo shite iru no desû ka.

Doko ye mairimashita?

About the Way or Road.

Where does this road lead to? Please tell me the way to —.

Which way shall I go?
Shall I turn to the right (left)?
Turn to the right (left).
Must I keep straight on?
Keep straight on.
Is not this the —— road?

Kore wa doko ye iku michi da ? —— made no iku michi wo oshiete kudasai.

Dono michi wo ikimashō ka. Migi (hidari) ye magarimashō ka. Migi (hidari) ye magare. Massugu ni ikimasŭ ka. Massugu ni itte o-kure.

Kore wa — michi ja nai ka.

177

Kindly direct me to ----

Is this the right way? No. Sir, that is the way.

I do not know or I would tell you.

What is the distance to ---! What place is this, please?

Chotto ukagaimasŭ ga, ----- ye iku ni wa dochira ye mairimashite yoroshiй gozaimasű ka.

HOSSFELD'S CONVERSATIONAL METHOD

FOR THE

Study of Modern Languages

(FOR SCHOOLS OR SELF-TUITION)

THE Publishers of this now World-renowned Method for the study of foreign languages respectfully submit the following Reviews and Letters to the notice of their readers, as convincing and indisputable evidence of the remarkable popularity it has attained, and this solely through its intrinsic value as a medium for acquiring languages in the easiest and most attractive manner, and in an incredibly short time.

"The increasing intercourse between nations, and development of international trade, with its keen rivalry between the competitors, have in our time considerably increased the importance of a Working Knowledge of Modern Languages," and this is exactly what may be acquired by a student of the Hossfeld Method. The difficulty of the study of a foreign language may be easily overcome by a little attention on the part of the student if he uses the Hossfeld Method, which, to assist him in the accomplishment of this object, lays down

such rules for his guidance as will place him in a position to master the same with comparative ease and satisfaction.

The publishers have given many years' earnest attention to the subject, and it has been their aim to make their books really trustworthy and reliable guides from which any student of ordinary intelligence may, with a modicum of industry and perseverance, obtain a thorough and practical knowledge of the language he is studying.

The Hossfeld Method is planned on a perfectly rational and scientific basis, the books are divided into 62 lessons, and each sub-divided into four parts, comprising from the first lesson:—

Conversations. Translations. Readings. Grammar.

It will thus be seen that, as one of our correspondents states, this one Method embraces the four recognised up-to-date modes of teaching and learning, carefully avoiding those extremes which are so unsatisfactory and disappointing in their results.

The plan of the lessons is very fascinating, and one in which the student himself becomes greatly interested, hence he makes that **rapid progress** which is so marked in all students of the Hossfeld Method, and which is, happily, fast doing away with the stigma cast upon our young men and women for their deplorable ignorance of foreign tongues. This was, however, not attributable to any incapacity or lack of intelligence in themselves, but entirely owing to the inadequate and false means of instruction.

The Hossfeld Method, unlike others which promise so much and perform so little, gives from the very beginning ample proof of its efficiency, and the publishers urge you to give it a trial without delay and judge its merits for yourself.

They would also call your attention to the cheapness of these volumes in comparison with others.

HIRSCHFELD BROTHERS LIMITED, 13 FURNIVAL STREET, LONDON, E.C.

for the Study of Modern Languages

A SELECTION OF UNSOLICITED TESTIMONIALS

H.M.S. CLEOPATRA, COLONIA, URUGUAY,

DEAR SIR.

The Grammar in French, of Hossfeld's, having been mainly instrumental in my having gained the quality of Interpreter, R.N., in that language in six months, I take the earliest opportunity of acknowledgment, and also of suggesting the propriety and immense advantage to the public service should every library in H.M. ships of war be supplied with your Grammars in, say, French, German, Italian, and Spanish, etc.—I may mention that our libraries are supplied free to us, and at the public expense, and that the addition would represent a merely trilling cost, and that I believe that should you represent the advisability, their Lordships would acquiesce, in the interests of the public services.

"You are at liberty to make what use you please of my views, as I was the first to elect the present regulations, granting four months' study on the Continent, and therefore I need lose no time in consultation," I

am, Str. Yours sincerely,

L. B. DENMAN (Lieutement), H.M.S. Chopatra, S.E. Ceast, America (Montevideo),

CHARTER HOUSE, GODALMING,

DEAR SHIS.

"I thank you for a copy of your Italian Grammar Hossfeld's System], with which I have been for some time well acquainted. The system is excellent and the book is admirably arranged. My experience of the Italian Grammar was so satisfactory that I recommended a pupil of mine, who wished to learn Spanish, to get your Spanish Grammar in the same series. He made rapid progress, and required very little help beyond that which the book gave him."—Yours faithfully,

W. HAIC BROWN (Principal),

Polytechnic Institute, Regent Street,

GENTLEMEN.

"I use Hossfeld's German Grammar for our large day and evening classes at this Institute, and I appreciate the work highly. In proof of the good results attending its introduction to the classes, I may mention that out of 98 students presented for examination by the Society of Arts, 18 gained first class Certificates. 4 second class, and 72 third class, and only I failed; a student also gained the prize for German given by the Chamber of Commerce, value £5, and Certificates," Yours truly.

M. SEIFERT.

MANCHESTER, 3rd October 1903.

"For many years I have used your Spanish Grammar, Hossfeld's Method, at the Central Commercial Schools in this city, and also at various other institutions and with private pupils, and I may say that I consider this Method the most interesting, satisfactory, and complete of all the text-books of a similar kind which have come under my notice. It contains all the necessary matter for a student of languages, Grammar with examples, Exercises for translation to and from Spanish, Questions on the Grammatical Rules already given, and a Reading Lesson in Spanish, preceded by conversation in Spanish and English on the whole of latter, and on every-day topics. What more could be desired even by the method-ridden modern student? Some say 'Grammar is useless,' some say 'Translation only is necessary,' some, 'Conversational Phrases, in question and answer form, only are needed,' and finally, some say 'only connected ideas (as shown in your reading lessons) are of any avail,' and they evolve phrase after phrase in successive order on all the ordinary topics of life. Now, what do we find in your Hossfeld's Method of all these four up-to-date modes of teaching and learning? Everyone: Grammar, Conversation, Translation, and Reading, and that right from the very beginning, from the first lesson in the book.

"If proof be needed of the efficiency of the Hossfeld Method, any one can find it for himself by consulting the Result Sheets of the Laucashire and Cheshire Union of Institutes' and of the 'Society of Arts' Examinations each year, where he will find that the Spanish students of the Central Commercial Evening Schools, Manchester, invariably stand at the head, and often with one or more prize-winners and medallists. This year's Society of Arts' results includes first and second prize-winners from these schools, where all the students use Hossfeld's Method for Spanish. It is well to state that I have had occasion to use your other Grammars in French and German, and have found them always equally satisfactory.

"You are quite at liberty to make any use you think fit of this letter, as I do not hesitate to confirm to everybody what I have written above."

ALFRED CALVERT,

Lecturer on Modern Languages at the Manchester Central Commercial Evening Schools and Manchester Athenaum.

TECHNICAL SCHOOL, BLACKBURN, 25th July 1904.

"I have used your French, German, Spanish, and Italian Grammars for many years. I selected them for my Classes and private students after a careful perusal of every system published in English, both here and in U.S.A. My students always figure conspicuously in Exam. results, and several times have earned medals and been first in lists of results.

"The Grammars are the nearest to my ideal of what a Grammar should be, and because the rules are so well explained and exemplified, I am able to spend nearly all the one poor hour per week we overning class teachers can get in per language to the 'spoken' and 'dictation' aspects, instead of being compelled to spend the all-too-short time in wearisome explaining of the Grammar sections that should be (as they are in your Grammars) clearly enough set forth in easily comprehensible English in the book itself.

"As 'imitation is the sincerest form of flattery,' I have imitated your system for the most part in my Portuguese Conversational Grammar published by your firm."

FRANK THOMAS,

Professor of Modern Languages at Blackburn Technical Schools, and Blackburn Grammur School. Shipley, Yorkshire, 20th June 1904.

"It is, of course, superfluous to add that I am practically acquainted with your Grammars. I have used them for many years with most gratifying results."

H. J. WEINTZ.

ALLEYN'S SCHOOL, LEWISHAM.

"I have gone through your Hossfeld Grammars very carefully, and like them very much indeed. The Method is clear and lucid, the task is not made too irksome for the student, and the happy-medium is nowhere missing in the arrangement of matter. The hand of experienced teachers is clearly perceptible in the disposition of the books, and I shall be glad to use them whenever opportunity occurs."

L. HIRSCH, Ph.D.

BIRKBECK COLLEGE, BREAM'S BUILDINGS,

DEAR SIRS.

"The success of my pupils has been phenomenal since I adopted Hossfeld's Spanish and Italian Methods in my classes for teaching these languages. I have examined every Grammar for teaching languages that exists, and do not find one so admirably adapted for classes and private tuition as Hossfeld's. These books are marvellously clear and in every way fitted for teaching a language in the simplest and easiest way."—Yours very truly,

RAFAEL DEFFERARI MONTEVERDE, B.A., Teacher at above Institute and King's College, Wimbledon, Skerry's College, itc., Sworn Interpreter by Royal Authority.

THE COLLEGE, EAST ACTON.

DEAR SIRS,

"Early last autumn you sent me a specimen copy of your Hossfeld's Spanish Grammar, which I am pleased to say I decided to adopt as a text-book. The result has proved most satisfactory. All the pupils I sent in for examination were successful—one took premier position out of several hundred candidates. Having lately been appointed an Examiner to one of our great Examining Bodies, I shall certainly recommend your works to other teachers."—Yours truly.

W. RADFORD, Principal,

Commercial School, Queen's Road, Dalston, 1903.

"It is satisfactory to note that in our German, Russian, and Spanish Classes where the Hossfeld Grammars are exclusively used, we have during the last two sessions won four Society of Arts' bronze medals and £16 in prizes."

J. SINCLAIR, M.A.

Hossfeld's Conversational Method

LONDON, 16th March 1903.

"I have had great pleasure in introducing your 'Hossfeld's' German Grammar into my German Classes both at Kennington Road and Balham Commercial Schools, and it has met with the greatest approbation. I admire the method and arrangement of the Grammar greatly."

E. BROOKS.

COMMERCIAL SCHOOL, CHAUMERT ROAD, 1904.

"The German and Spanish books of the Hossfeld Method are being used in above school, and are giving every possible satisfaction."

A. A. KEMP.

LEIPSIC ROAD COMMERCIAL SCHOOL, 1904.

"I have thoroughly examined your French Method, and find that the completeness of the Grammar, combined with well-selected Conversations and Readings, make it a most useful and attractive book to students of French. I am introducing it into the Classes here."

THOMAS LEA.

KENNINGTON ROAD COMMERCIAL SCHOOL, 1904.

"We are using your books in Italian and Spanish, and are very pleased with them."

F. W. BULL.

CAVENDISH ROAD COMMERCIAL SCHOOL, 1904.

"I have had great pleasure in introducing your Hossfeld German Grammar into my Classes both at above school and Kennington Road."

EVENING COMMERCIAL SCHOOL, BROCKLEY ROAD, 31st August 1903.

"I have your Spanish and German books in use at my school, and am introducing the French this Session,"

A. J. WREN, Responsible Teacher.

CRAWFORD STREET EVENING SCHOOL, June 1904.

"I think Hossfeld's Method is capital. I recommended it to the master who takes the Intermediate County Council Scholarship work, and he is now using it in his Class. I have your smaller book in use in the Evening Classes."

C. E. PANNELL.

EVENING CONTINUATION SCHOOL, FIRCROFT ROAD, BALHAM, July 1904.

"We used your French Books all through last session, and our Class was large and successful."

JOHN G. GRAY.

HIRSCHFELD BROTHERS LIMITED

for the Study of Modern Languages

EVENING CONTINUATION SCHOOL, RAYWOOD STREET, 27th June 1904.

"Please send me a copy of your Hossfeld Method. My French Instructor has already spoken of it to me in terms of praise."

E. B. LING.

EVENING COMMERCIAL CENTRE, GOREL OAK, 1904.

"I shall certainly recommend your Italian Method. I think it to be admirably adapted to the needs of our students."

J. H. GARSIDE.

Science and Art School, Brixton, July 1904.

"My teacher of German is anxious to introduce next session Hossfeld's System." W. C. EDWARDS.

LONDON, 5th February 1903.

"I have been using 'Hossfeld's German Grammar' at the Goldsmith Polytechnic Evening Classes for the last two years, and find it the most suited for the purpose of the rapid study of German.

J. FORTSCHUNK.

ARCHBISHOP TENISON'S SCHOOL, Leicester Square, London.

"Last term 1 introduced your large French and German Grammars and Exercises into the Upper Form of this school, and we like them very much."

J. F. ARNOLD.

LAUREL HOUSE, BRYMBO, N. WALES.

"I shall recommend your 'Hossfeld' French Grammar very strongly to my pupils, and will extend the sale of that valuable book."

FERNAND DELETTRES.

GEORGE HERIOT'S SCHOOL, EDINBURGH, 26th October 1903.

"I am using your 'Hossfeld's' German Grammar in all of my German Classes, and think it an excellent book. Your German Exercises and Idioms by Prof. Mengel also gives good results."

D. LOWE TURNBULL, M.A., LL.D.

ST George's Classes, Edinburgh, 13th October 1903,

"Your 'Hossfeld' Italian Grammar seems to me excellent, and I am sorry not to have known of it before. I shall be very glad to adopt it with my pupils," S. ALBEGGIANI.

SHARP'S INSTITUTION, PERTH.

"I have formed a very high opinion of your German Grammar, and have decided to introduce it here next session. Kindly let me have the name of your agent in this town."

A. WATSON BAIN, Modern Language Master.

CHAMBER OF COMMERCE, DUNDEE, 22nd June 1904.

"I brought to the notice of the examiner for Spanish on the Commercial Education Examinations of this Chamber, the copy of the Hossfeld Method received from you, and was informed that he already used it in his Classes."

G. C. KEILLER.

Edinburgh, 20th May 1904.

"I greatly approve of Hossfeld's System, and I have already introduced it into my French, Italian, and German Classes with much success," H. CANROBERT.

Craigholme, Glasgow, September 1903.

"I have gone through your 'Hossfeld's' French Grammar with my French teacher, and we both think it a very useful book, combining theory and practice and introducing a large and serviceable vocabulary."

J. MURDOCH, Principal.

"I have already introduced your book into my German Classes at the Manchester Atheneum, and in future intend to use it everywhere."
G. ALBERS.

MANCHESTER, 26th June 1904.

"All my private pupils are using Hossfold's Method and like it very much. I am determined to introduce it everywhere I can."

B. GAUME.

MANCHESTER, 4th April 1904.

"For many years now I have used various of your publications for the study of modern languages with great numbers of my pupils for University and other important examinations."

ARTHUR HORSFALL,

Presentation Brothers' College, Mardyke, Cork.

DEAR SIRS,

"I have been successful in introducing Hossfeld's German and Italian Methods and also the French and German Correspondents, of which you sent me specimens, and I must say that I am really astonished at the remarkable progress made by my pupils since they got your books into their hands. I shall do all in my power to make your publications known to and appreciated by my colleagues in other schools."

Yours faithfully, J. L. THEODORE GETZ, Back, ès Lett.

St. Faughnan's College, Ross Carberry, Cork,

"The two Grammars out the 'Hossfeld' system are just the thing we want, and I shall do my best to promote their introduction into this and other I rish schools. The German Grammar could positively not be better; it is unique."

Rev. PAUL A. PESCHEL.

Collegiate School, Cork.

"I think that the Hossfeld French Grammar is the best that I have seen, and I trust that I shall be able to introduce it into my school at no distant date."

II. WILLIAMS, M.A., T.C.D.

ST. PETER'S COLLEGE, WEXFORD.

"Your 'Hossfeld's' French Grammar seems to be excellent in every way, and the praises bestowed upon it by teachers who have introduced it into their schools shows that the Method must be well adapted for pupils. I shall recommend it here."

O. KING.

LIVERPOOL, 30th September 1903.

"Having found your Hossfeld's German Grammar a sensible and useful book, I have already introduced it into my German Classes held at the Y.M.C.A., also at the Balfour Institute and Wallasey Grammar School."

O. O. WICKEIVI.

South German Master.

Schoor German Master.

Holy Cross School, Liverpool, July 1904.

"I have tried many Spanish Grammars with my pupils, and think Hossfeld's is undoubtedly the best published." L. CONWAY.

EGREMONT COMMERCIAL SCHOOL, July 1904.

'I am very pleased with the style and the matter contained in your Spanish Grammar. When convenient I will use it in my Classes, as I consider the Method an intelligent and pleasant way of acquiring a knowledge of a language."

T. B. GERAGHTY.

Municipal Technical School, Lincoln, 1901.

"I am pleased to say I am using your Hossfeld Method, French and German, in a private class at present. Now that I have proved the excellence of the books I shall, in all probability, adopt them for my Classes at School the next session. Pupils using these books make splendid progress in a short time."

C. PHILLIPSON.

BIRMINGHAM, November 1903.

"I am pleased to say that I am using your Spanish and Italian Graumars at the Birmingham and Midland Institute; and your Spanish and French Grammars at the Walsall Science and Art Institute, and tind them very satisfactory."

E. EDMONDS.

· 13 Furnival Street, London, E.C.

SOUTHAMPTON, 17th July 1904.

"Some of my students have begun their studies on Pitman's and Hugo's Methods, but these have given such unsatisfactory results that I wish to substitute Hossfeld's and gradually make use of the other works published by you. Pitman's Method was chosen owing to its special commercial character, but on examination I think it is plagiarized from Hossfeld."

C. E. L. WRIGHT.

Leicester, 19th August 1902.

"Your German Course has met with great success here. It is the finest work I have seen." E. CUNLIFFE,

Teacher of Languages at the Y.M.C.A. and Union Street College.

> RATCLIFFE COLLEGE, Leicester, January 1904.

"We are using your German and Italian books and are much pleased with the German especially."

J. CREMONINI.

WAREHAM TECHNICAL INSTITUTE.

"I find 'Hossfeld's Method' a most practical one; the conversations, reading lessons, questions and exercises, all comprised in a neat form, display much judgment and care. The conversations and remarks embrace all topics, and are worded in the most elegant French of to-day. It is a practical System which will prove very useful to those who are anxious to speak French with thency and correctness. The book in fact is a model of the way in which French should be taught."

I. WALTER, B.A.

Collegiate School, Sleaford.

"I have carefully tested your German Grammar and have now decided to adopt it for general use. The graduation of the lessons and the combination of theory, exercise, questions, conversation and reading make it a model lesson book."

E. R. DIBBEN.

Technical Institute, Coventry, September 1903.

"I have introduced 'Hossfeld's Grammar' this winter at the Technical Institute French Class, and if I am as well satisfied with same as with the German Grammar, intend introducing it later into the Advanced French Class as well, giving up other books."

J. F. RUEGER.

MUNICIPAL TECHNICAL SCHOOL, HULL, September 1903.

Your French, German, and Spanish Grammars on the 'Hossfeld Method' are being used in this school through my recommendation."

C. KESSLER, M.A., Lecturer on Modern Languages.

British Evening Classes, Northampton, 27th June 1904.

"An earnest student with a good teacher for pronunciation should have no difficulty in rapidly acquiring a sound and extensive knowledge of a language by your methods."

E. PARNELL.

Sprach-u, Uebersetzungs-Institut, Leipzig, Germany, 1903.

"I take great pleasure in telling you that I have used 'Hossfeld's' German Grammar with my pupils for the past three months and find it a most excellent book. It has the great advantage over all other Grammars I know that all dullness has been avoided, the scholar soon takes a liking to his German studies, and all rules being explained very lucidly, speaks and writes German correctly in a short time."

M. MULLER-BONJOUR.

AMERICAN TESTIMONIALS

University of Rochester, Office of the President,

DEAR SIRS.

OI have examined with great care and much gratification your Italian, German, and Spanish Grammars in the Hossfeld Series. I find them quite equal to the French Grammar, of which I sent you a notice. The method seems to me in all respects admirable, combining with a wonderful skill grammatical and conversational exercises so as to convert theory immediately into practice. I shall bring them to the attention of our Professors in these Departments with a strong commendation."—Respectfully yours.

D. J. IIIIA. President.

ST FRANCIS SERAPHICUS COLLEGE, CINCINNATI, OHIO,

"I am happy to state that the Professor of French at our College is highly pleased with your Hossfeld Grammar, and wishes to have it introduced at once in place of the text-book we have hitherto been using. Please send six copies at once."

REV. P. BERNARD NURRE, O.S.F.

TEMPLETON, IOWA.

"Your Spanish Grammar is eminently what is claimed for it—a Practical Method for learning the Spanish Language. The lessons in conversation are taken from life, and introduce the realities of life in a familiar and untural way so as to make the scholar feel at home and help binself. The reading exercises are likewise ingeniously devised and practically arranged so as to afford many opportunities of readily recognising the idiomatic peculiarities of the language, and gradually becoming familiarised with the same. Therefore I say, to whom it concern, take and read and reap its manifold benefits, as the best proof of its evellence."

REV. B. A. SCHUKTE.

COLLEGE OF ST THOMAS, MERRIAM PARK, ST PAUL, MINN.

"I was so pleased with the copy of your French Grammar that I immediately ordered thirty copies."

J. C. BYRNE.

CHURCH OF IMMACULATE CONCEPTION, ALLENTOWN,

"I received your Hossfeld's French Grammar, and am impressed that it meets the wants of the times, and, in my opinion, is the best I have seen."

REV. P. F. DONEGAN.

HENRYVILLES COLLEGE, CANADA.

"I think that your German Grammar is one of the best I ever saw."

BROTHER JOSEPH.

NEWARK, N.J.

"I am a teacher of Modern Languages, and all my pupils are using the Hossfeld Grammar. It is, in my opinion, the best teaching method I know. Its clear, easy, and methodical arrangement renders the study of modern language pleasant and easy. The sub-division of each lesson gives the pupil from the start an idea of the language he is studying. Since I have used Hossfeld's Mothod the success has been beyond expectation."

ALBERT J. FREICHLER.

NEW YORK.

"After careful examination of your French and Spanish Grammars, I am pleased to say that the Hossfeld Method is in every way one of the best I have ever seen. I cannot show my appreciation better than by saying I shall place your books in the hands of my pupils with the greatest confidence as to results."

EUGINIE RIVARDE.

GEORGETOWN UNIVERSITY, WASHINGTON, D.C.

"I take much pleasure in informing you that I think the Hossfeld Method most excellent. I deem it peculiarly well suited for private or self instruction, and for this purpose I shall heartily recommend it to our students."

B. J. LAUTERBACH, S.J., Professor of German.

CATHEDRAL OF THE IMMACULATE CONCEPTION, BURLINGTON.

"After a careful examination of your French Grammar I am happy to concur with those who have already extolled its merits. I find its Method remarkably clear and well adapted to the wants of those who cannot conveniently procure the assistance of experienced teachers."

C. C. DELANEY, B.A.

CHARTER OAK, IOWA.

"We use your German Grammar, and consider it ahead of anything we have yet seen. It seems to embrace the happy combination necessary to make the study of the language interesting and easy."

Professor A. J. BAUMAN.

CHRISTIAN BROTHERS' COLLEGE, ST LOUIS,

"I am much pleased with your Hossfeld Method. It is one of the best that has come under my notice, and I will give it a practical test.'

BROTHER FELIX.

ST MARY'S COLLEGE, SAN ANTONIO, TEXAS.

"The perusal of Hossfeld's Spanish Grummar forces upon me the admission that it is an admirable work tending towards the acquisition of the musical Castillan tongue. The varied reading exercises presented in such a novel, and at the same time attractive form for the beginner, I consider as one of the characteristic features of the production in question."

Bro. CHARLES AUL. Teacher of Spanish.

PRESS OPINIONS

The Schoolmaster says: "Hossfeld's French Grammar is a book of more than average morit. It is a thoroughly practical work, combining rules, illustrations and practice in a very judicious manner. Grammar, Conversations, Reading Exercises follow each other so rapidly and are interspersed in such continual variety, that if the Student finds the work dull the fault must be in himself and not in the book. We are glad to find so much use made of the double column system, by which very rapid progress may be made by a diligent student,"

The School Guardian says: "This Method of teaching possesses many advantages and is well worked out in the Grammars before us."

Life says: "Hossfeld's Grammar is almost entirely free from the tiresome repetition of the same words and sentences, indeed one of the aims has been to make it a vehicle of teaching as many words as possible. This, however, is only one of the number of recommendations which this work possesses. The work, in short, strikes us as being a sound and highly meritorious performance. It has the additional advantage of being excellently printed and remarkably cheap."

The Oldham Chronicle says: "Messrs Hirschfeld Bros. did a splendid work in issuing the various text-books in Hossfeld's New Method of studying languages. It is quite free from all those irksome methods which have made the study of foreign languages so repulsive to the average Englishman. All the definitions are crisp, clear, discriminating, and all the exercises are developed on the soundest principles, hence the works are the handiest and most interesting in our language. No one can blunder through the Grammar, they are made to understand it line for line as they go on. The books will prove a boon to the private student as well as to those who study in a class-room; they are accurate, comprehensive and captivating, and cannot be too widely known amongst those desirous of mastering languages. Governesses, private pupils, teachers and schoolmasters will find these volumes all that they could desire."

The London Press Co. says: "Learners cannot do better than to obtain the interesting and extremely cheap series of Grammars, Readers, et all that can be desired and are the best guides extant for learning languages. Everything is set forth in a plain and concise manner, rendering the task an easy one and making the student soon proficient in the languages. The Readers form a collection of the most interesting prose and poetry of each country."

The Birmingham Doity Post says: "The plan of the Hossfeld Grammars is rational, and we think the acquisition of a foreign language by means of them is likely to prove pleasant and rapfd."

The Bristol Times says: "'Hossfeld's Method' offers the easiest and quickest way of learning the French language. The progressive exercises are arranged with skill and care, and the extracts of prose and poetry are well chosen. No better book than this could be recommended to the student of French."

Civil Service Review says: "These volumes, we should say, require only to be mentioned to be bought far and wide, and only to be bought to be appreciated."

The Standard says: "The diligent student of French may obtain a very serviceable mastery of the language in a comparatively short time by means of these excellent guides."

The Nonconformist says: "The Grammars and the Commercial Correspondent are marvels of cheapness, of compression, and of fullness of information. The Dictionaries are also very cheap, yet they are accurately compiled."

The Publishers' Circular says: "The excellence of 'Hossfeld's Series' is now so well known that additional volumes come before the public with the hall-mark of assured ability, and require little comment at our hands."

 $Daily\ News$ says: "We heartily commend these books to all wishing to master these languages with easo and small outlay."

Daily Post says: "These books are as remarkable for their cheapness as they are for their usefulness; the type is large and clear."

Mercury says: "They are marvels of cheapness and brought within the reach of all classes of persons."
